FORWARD-LOOKING STATEMENTS

This report includes statements that are, or may be considered, "forward-looking statements". These forward-looking statements can be identified by the use of forward-looking terminology, including the terms "believes", "estimates", "anticipates", "plans", "expects", "targets", "aims", "intends", "may", "will", "can", "can achieve", "would" or "should" or, in each case, their negative or other variations or comparable terminology. These forward-looking statements include all matters that are not historical facts. They appear in a number of places throughout this report, including in the Chairman's Statement. They include statements regarding the intentions, beliefs or expectations of the Company or the Investment Manager concerning, among other things, the investment objectives and investment policies, financing strategies, investment performance, results of operations, financial condition, liquidity prospects, dividend policy and targeted dividend levels of the Company, the development of its financing strategies and the development of the markets in which it, directly and through special purpose vehicles, will invest and issue securities and other instruments. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. Forward-looking statements are not guarantees of future performance. The Company's actual investment performance, results of operations, financial condition, liquidity, dividend policy and dividend payments and the development of its financing strategies may differ materially from the impression created by the forward-looking statements contained in this document. In addition, even if the investment performance, results of operations, financial condition, liquidity, dividend policy and dividend payments of the Company and the development of its financing strategies are consistent with the forward-looking statements contained in this document, those results or developments may not be indicative of results or developments in subsequent periods. Important factors that may cause differences include, but are not limited to: changes in economic conditions generally and in the structured finance and credit markets particularly; fluctuations in interest and currency exchange rates, as well as the degree of success of the Company's hedging strategies in relation to such changes and fluctuations; changes in the liquidity or volatility of the markets for the Company's investments; declines in the value or quality of the collateral supporting any of the Company's investments; legislative and regulatory changes and judicial interpretations; changes in taxation; the Company's continued ability to invest its cash in suitable investments on a timely basis; the availability and cost of capital for future investments; the availability of suitable financing; the continued provision of services by the Investment Manager and the Investment Manager's ability to attract and retain suitably qualified personnel; and competition within the markets relevant to the Company.

These forward-looking statements speak only as at the date of this report. Subject to its legal and regulatory obligations (including under the rules of Euronext Amsterdam, the FCA and the London Stock Exchange) the Company expressly disclaims any obligations to update or revise any forward-looking statement (whether attributed to it or any other person) contained herein to reflect any change in expectations with regard thereto or any change in events, conditions or circumstances on which any statement is based.

The Company qualifies all such forward-looking statements by these cautionary statements. Please keep these cautionary statements in mind while reading this report.

VOLTA AT A GLANCE

The investment objectives of the Company are to preserve its capital across the credit cycle and to provide a stable stream of income to its Shareholders through dividends that it expects to distribute on a quarterly basis. Volta seeks to achieve its investment objectives by pursuing a diversified investment strategy across structured finance assets. Volta measures and reports its performance in Euro.

Key performance indicators

|--|---|--|--|
| €5.6914 | (22.5)% | (31.2)% | 6.0% |
| NAV per share as at 31 July 2020 | NAV total return ¹ (with dividends re-invested at NAV) for the twelve months to 31 July 2020 | Share Price Performance ^{1,3} (dividends re-invested) for the twelve months to 31 July 2020 | Share Price Performance ^{1,3} (dividends re-invested) from inception to 31 July 2020 (on an annualised basis) |
| €0.53 | 17.7% | 12.1% | (23.0)% |
| Dividend per share for the twelve months to 31 July 2020 | Projected Portfolio IRR ¹ (under standard AXA IM scenarios) | Dividend Yield ¹ for the twelve months ended 31 July 2020 based on the share price as at 31 July 2020 | Discount ¹ between share price and NAV per share as at 31 July 2020 |

NAV performance analysis for the years ended 31 July 2020 and 31 July 2019 – contributions to NAV change (Euro per share)

Ongoing charges²

The ongoing charges ratio is calculated according to AIC methodology using the actual costs incurred in the year which are likely to recur in the foreseeable future and which relate to the operation of the Company divided by the average net assets during the year. The ongoing charges ratio for the year ended 31 July 2020 was 2.14% (2019: 1.93%).

¹Refer to the glossary on pages 84 and 85 for an explanation of the terms used above and elsewhere within this report.

²The Company's ongoing charges are calculated according to the methodology outlined on page 77 and differs to the costs disclosed within the Company's KIDs which follows the methodology prescribed by EU PRIIPs rules. The Company's most current KIDs are available on the Company's website.

CHAIRMAN'S STATEMENT

When I wrote to you last, at the end of April, the world faced great uncertainty. Much has changed in both economies and financial markets since then, albeit along divergent paths. Yet, in another sense, fundamentally, little has changed. As I noted in April, it seemed to me that the massive fiscal and monetary stimulus that had been unleashed was very necessary. But it was not sufficient to put economies back on a path to more certain, self sustaining growth. That required a medical solution. That remains the case. It does seem, however, that it was sufficient to stabilise and reverse much of the swift losses in financial markets. In that respect I was most definitely wrong. Little did we know then, at the end of April, that the low of financial markets sentiment was already a month behind us.

Whether the divergence between a deteriorating economic environment and thriving financial markets is sustainable remains to be seen but the recovery has been impressive in most areas of the capital markets. This recovery is most dramatic in the US equity indices. Most have gone on to record new highs, albeit driven largely by a narrow cross section of large technology names. Remarkably, the S&P500 index generated a total return of 9.8% in the 12 months to 31st July 2020. Public credit markets have also recovered significantly, aided notably by central bank buying of many sectors. By way of illustration, the average credit spreads on single-A rated US corporate bonds are unchanged on their levels of a year ago, with the actual yields that borrowers pay, of course, being much lower as sovereign yields have fallen. One area that has seen less dramatic recovery has been the structured credit markets. I hesitate to suggest that this is an "anomaly" but substantially elevated yields are still available in, for instance, mid and lower rated tranches of CLOs. This reflects, I believe, two things – the lack of central bank buying of these assets and worries about possible future defaults. Whether public credit spreads are to widen, or CLO spreads are to narrow, some convergence seems likely over time and some relative protection for future adverse developments seems embedded in structured credit asset yields.

The consequence of this in the short term though is a less marked recovery of Volta's portfolio than might have been expected. In the 12 months to 31st July 2020, Volta's Net Asset Value ("NAV") total return per share fell by 22.5%. At its most stark, this compares to the gain quoted above for the S&P500 of 9.8%. Rarely does this type of disparity occur. I am sorry to say that the share price performance was worse, with a fall of 31.2% on a total return basis for the financial year, as the share price discount to NAV widened from under 12% to 23% at the financial year end. Encouragingly, the NAV has continued to recover since the year end but the divergence to the S&P500 has only widened and the share price discount is also wider.

Such disappointing performance might normally be indicative of inherent problems within the portfolio but this couldn't be further from the truth for Volta. None of our assets are distressed. All CLOs, bar one small historical position, continue to pay full cash flows. Our liquidity is strong, even bountiful. AXA IM Paris, our investment manager, has shown great skill in orientating the portfolio effectively. Without their skilful positioning, I would be unable to make those statements about our portfolio. Furthermore, without wishing to tempt fate, the metrics in our portfolio are notably superior to the structured finance markets as a whole.

I have to believe, therefore, that patience will be rewarded. As AXA IM note in their Investment Management report, defaults will, of course, rise from here. However, the current pace of defaults is moderate and the peak is unlikely to see default rates in excess of 6% in the US or 5% in Europe over the coming 12-24 months. The intervention of governments and central banks has bought sufficient time for CLO managers to re-orientate their positions and we do not forecast in any way outsized defaults in our aggregate portfolio. It seems sensible, therefore, simply to allow AXA to keep doing what they are good at. With time, the fruits of these labours will be seen. In the meantime, the portfolio is generating cash flows of approximately 17% annualised on the prevailing NAV and the predicted IRR of the portfolio is around 18%, even accounting for the rising default rates noted above.

During this crisis, the Board's principal focus has been on the maintenance of liquidity. As I reported in April, we moved swiftly to eliminate any potential areas of liquidity vulnerability given that the outlook was so uncertain: the last of the repurchase agreement was repaid (much had, thankfully, been repaid prior to the crisis); FX hedging was largely eliminated and the payment of the dividend was cancelled.

Subsequently, as it became apparent that liquidity would not become squeezed, a dividend was reinstated and FX hedging re-implemented for a portion of the US Dollar exposure. The Board had previously outlined an intention that dividends would generally be paid at around a level of 8% of NAV per annum and this is indeed the level that we have paid over the last two dividends since the teeth of the crisis. We anticipate that, as the NAV rises, we will continue to scale up the cents-per-share amount accordingly, in line with that target of 8%, as we have already commenced. We recognise the importance of a regular dividend flow to our shareholders and this level of payment has enabled us to satisfy that need and also to allow AXA to reinvest some cash flows in very attractively priced assets which should embed superior future returns for shareholders. To be clear, however, should the crisis escalate again, we would once again cancel dividends and remove other liquidity risks, as necessary, to ensure that Volta can weather whatever storms it may face.

The Board has been very active through the last few months, meeting frequently, and the combined experience and diverse knowledge of the Directors enabled us to think clearly and move decisively when we needed to. I would like to thank my colleagues for their hard work during a difficult and stressful time. It is with sadness, therefore, that we said goodbye to Atosa Moini as a director at the financial year end, for personal reasons. On behalf of the Board and the Investment Manager, I would like to thank Atosa for her service to the Company.

The Company had an agreed succession plan in place and this always envisaged that Paul Varotsis, our longest standing director, would retire no later than the 2021 AGM, as part of orderly succession. Given Ms Moini's resignation, the Board has reconsidered its succession plans. The Directors are very conscious of costs borne by shareholders and recently undertook a review of their own fees in light of the fall in the NAV of the Company. We have agreed a reduction in our fees and, given Ms Moini's resignation, we have also decided to keep Board membership now at a total of four directors rather than five in the medium term, after making allowances for handover periods. The combination of the reduced individual fees and a reduced complement means a saving to shareholders of €171,500 per annum. Consequently, the Board has decided not to seek to replace Ms Moini immediately but, rather, to seek a

CHAIRMAN'S STATEMENT (CONTINUED)

replacement for Mr Varotsis in early 2021. Preparatory work for this has commenced. I look forward to reporting to you further on this matter next year.

The risk of the recent crisis was that some other key issues might not be advanced as swiftly as had been the focus previously. One such could have been ESG (Environmental, Social & Governance) factors in investing. However, despite the siren calls of the doomsayers, ESG investments generally outperformed during the market turmoil and this has reinforced their importance to investors. AXA IM has been a pioneer in seeking to introduce these factors into loan and CLO selection. I would encourage you to read the feature section on pages 8 to 9 of this report, highlighting the work done to date and the further efforts that are needed to integrate this more widely into structured finance. Your Board fully supports the integration of ESG into our portfolio, are heartened by AXA IM's enthusiasm and their allocation of resource to the matter and I look forward to updating you further in due course.

To return to the market environment as a final note, none of us can have any great certainty on the medical or financial future. In times of such uncertainty it seems to me that the strong cash flows that underpin our investments, our broad diversification across the credit universe and the flexibility of our mandate remain as valuable and relevant as ever; perhaps even more so in these times. Volta is able to take those characteristics, be opportunistic and nimble and draw upon the proven skill and expertise of AXA IM. That is a compelling combination. Volta is a high risk investment and always will be. So, I cannot assure you that an investment today will make money tomorrow. However, it does seem likely that the inherent characteristics will, with a small dose of patience, make for a rewarding investment in the medium term.

As always, I thank you for your support and look forward to reporting to you again in the spring. In the meantime, I am always pleased to speak or meet with shareholders, or potential shareholders, so please feel free to contact me via the Company Secretary.

Paul Meader
Chairman
6 November 2020

INVESTMENT MANAGER REPORT

At the invitation of the Board, this commentary has been provided by AXA Investment Managers (“AXA IM”) Paris as Investment Manager of Volta. This commentary is not intended to, nor should be construed as, providing investment advice. Potential investors in the Company should seek independent financial advice and should not rely on this communication in evaluating the merits of investing in the Company. The commentary is provided as a source of information for Shareholders of the Company but is not attributable to the Company.

KEY MESSAGES FROM THE INVESTMENT MANAGER

The NAV performance of Volta over the last financial year as a result has been far weaker than the current and expected performance of the underlying investments would justify. There is now a significant gap between the level of defaults being priced into the structured debt market and those being experienced and projected to occur. That suggests a structural inefficiency that can be exploited by experienced investors who are able to keep their heads when those less familiar with the asset class are acting irrationally. In our report we seek to explain why we believe the medium to long term outlook for Volta is positive and to identify where we believe those opportunities lie.

At the time of writing, the COVID-19 crisis continues to have an impact on Volta’s current and projected cash flows. However we believe that the current NAV and the wide discount at which Volta shares are trading are both underestimating the long-term value of Volta’s positions as well as the attractive reinvestment opportunities.

Given that the current very low, even negative yield environment may prevail for some years to come, our view is that the type of assets held by Volta might see increased demand, potentially leading to stronger prices in the medium term.

Before the COVID-19 pandemic, we were already coming to the view that the end of the credit/economic cycle was in sight. For Volta, this had already translated to a reduction of leverage (via the repo that had been in place for several years) and larger investments in CLO equity tranches to benefit from the optionality of these tranches (the possibility that CLO equity payments increase through time when loan spreads widen).

As a result, we made the following key changes:

- The repo was closed (from \$50m borrowed initially)
- The CLO equity bucket was increased from 46% to 55% and the USD CLO debt bucket was reduced by c.15%.

The main consequence of the increase in the CLO equity allocation over the last 24 months is the significant increase in the level of interest and cash flows received from Volta’s assets. Most of the near term decrease reflects short term technical effects that should partially reverse in the coming periods.

Having reduced our level of leverage while receiving larger cash flows, we anticipate Volta having the ability to seize attractive reinvestment opportunities.

In reviewing the quality of Volta’s portfolio as at the end of July 2020, the key points to mention are the following:

- Although early in the COVID crisis almost 20% of the overall USD CLO universe suffered a partial or total diversion of cash flows due to a breach of the Reinvestment Test, none of Volta’s CLO equity positions breached that test and we expect this to remain the case for the next payment date (Q4 2020).
- Under reasonable assumptions (including an increase in loan default rates for the coming 24 months) Volta’s assets’ projected yield is close to 18%.

INVESTMENT MANAGER REPORT (CONTINUED)

CONSEQUENCES OF THE COVID-19 CRISIS ON VOLTA'S ASSETS

The main asset class held by Volta is CLO debt and equity tranches. A reason contributing to Volta's significant allocation to this asset class is our strong belief that corporate loans represent a systemic asset class. By systemic we mean that over the next year or two it is likely that loans will suffer more defaults, but governments and central banks will indirectly act to reduce the pain. Because corporate loans are made by companies belonging to all industry types (except finance), default rate increases are mechanically associated with an increase in the unemployment rate. Governments & central banks will likely act to limit social/economic difficulties. This is very different from many other ABS market segments. For example, CMBS may face difficulties without causing any meaningful reaction from governments or central banks.

The COVID-19 crisis is causing an economic impact that is roughly twice as severe as the impact seen during the Global Financial Crisis (in terms of GDP drop), but governments & central banks have generally taken decisive action to limit the consequences of the crisis and to avoid an overwhelming wave of defaults. It's clear we will not avoid an increase in defaults but, month after month, we have confirmation that such defaults may be spread over a period of years. That situation would enable the cost of defaults to be partially offset by reinvestment opportunities.

Taking Volta's CLO portfolio and simulating a base case scenario in which the default rate is 6% for the coming 12 months and then 3% thereafter (with 60% recovery) with a modest gain in terms of reinvestment (reinvestment price at 99% with a spread at 400bp), we obtained the following results (to simplify we used the same assumptions for US and Euro deals):

| Asset Class | Weight | Projected yield | Comment |
|----------------|--------|-----------------|---|
| USD CLO Equity | 25.3% | 20.3% | Some diversion of cash flows appears late in 2021 but it remains relatively rare |
| EUR CLO Equity | 21.5% | 20.5% | |
| USD CLO Debt | 19.0% | 15.7% | All positions end their lives without any loss despite some delays in coupon payments |
| EUR CLO Debt | 3.1% | 8.2% | These positions are all recent positions (post Covid-19). The 8.2% projected yield does not take into account the possibility that these positions are called at par in less than 1 year (average price is 94.6% as at end of July) |

Default rates are not only dependent on the economic situation of companies, but they are also highly dependent on the overall financial environment. The fact that private equity (PE) funds have billions to deploy and the possibility that we are going to live for years in a low or even negative yield environment may significantly help limit the development of defaults as huge competition is likely to develop between PE to acquire companies as well as ample funds to finance companies' debt.

In addition, it is worth mentioning that at the time of writing this report, spreads on CLOs most senior tranches in the primary market are almost back to pre-COVID levels. We have many signs that CLO senior tranches are attracting more and more investors. We have already entered into discussion with an arranging bank to partially refinance the debt of one of Volta's USD CLO positions. We are not there yet but the probability is growing that we may be able to lower costs through our CLO debts that finance our CLO equity positions, opening the door for higher cash flows.

Even if this route is not yet certain, it may be the case that the optionality we sought when deciding pre-COVID to increase Volta's CLO equity bucket will materialise at least partially. For the moment our positions are not breaching any reinvestment tests, the Weighted Average Spread (WAS) of the underlying portfolios are modestly increasing and we have the first refinancing coming. The COVID crisis will clearly reduce principal payments at the end of life of some of our CLO equity positions, jeopardizing the ongoing cash flows. This may however cause higher cash flows at some point in the same way, this happened to CLO equity positions from vintages 2005-2007 after the GFC.

The second main asset class for Volta is bank balance sheet transactions (also known as regulatory capital trades or Reg Cap). Volta's positions in this area are a mix of recent and older positions (some are prepaying every quarter) demonstrating what we consider as the most appealing characteristics: classic underlying corporate credit risk and very diversified pools made up of thousands of underlying loans either to very small businesses or to individuals.

Our philosophy regarding the sourcing of bank balance sheet transactions has always been to restrict ourselves to a limited number of transactions on which we can have a structuring impact. For example, for classic corporate credit risk, Volta never acquires an exposure to a blind credit pool. All underlying credits have been approved by our credit team.

As a result, as at the end of July, the impact of the COVID-19 pandemic on these Reg Cap positions has been relatively limited. Such impacts are translated into the valuations of our positions and typically, as we can judge as at end of July, the worst position is a portfolio of Middle-Market loans (from the UK and Europe) valued at the end of July at 88%. This position is a 0.5%-12.5% loss tranche benefiting from a 0.5% annual reserve to absorb annual losses and, we estimate, may suffer a principal loss corresponding to circa one year of coupon payments. The second worst is an Italian auto loan position that was valued at 90.6% as at the end of July, again reflecting that there is a only a minor risk of loss on this position.

Overall, the Volta Reg Cap bucket performed relatively well given the extent of the crisis, with an average price at 92.5% as at the end of July (excluding the positions that are already amortising).

The rest of the Volta portfolio is made up of loans and ABS. The largest loan portfolio is a European Middle Market Loan fund. Inside this fund are 22 loans of which eight have already been prepaid and, amongst the remaining 14, four of them are on the "watch list".

INVESTMENT MANAGER REPORT (CONTINUED)

On one loan the fund manager took ownership of the company and equitized a portion of the initial debt tranche. Another one benefitted from a significant equity injection from the sponsor and covenants have been renegotiated, and the two others are showing some improvements in the way they recently operated.

Overall, in relation to Volta's ABS/loan portfolio the impact of the COVID crisis is relatively modest:, roughly, the equivalent loss of one year's revenue

VOLTA'S PORTFOLIO POSITIONING AS AT 31 JULY 2020

As at the end of July 2020, the portfolio breakdown was the following:

The below chart shows the following changes in the overall asset allocation in the financial year:

As outlined earlier, the main strategy consisted in increasing our exposure to CLO equity tranches to benefit from the positive optionality that these investments can provide. This may seem counter-intuitive but more than 20 years of CLO equity investing shows otherwise. When spreads widen and loan prices fall, even with higher defaults, CLO equity positions benefit from the volatility and experience outsized subsequent returns.

INVESTMENT MANAGER REPORT (CONTINUED)

Below are the statistics from Wells Fargo Research regarding the vintages for which there are terminated deals (recent vintages had a few deals being terminated, hence the performances of these aren't pertinent):

| IRR (Terminated Deals) | | | | | | | | | | | | | |
|------------------------|-------|-------|-------|--------|-------|-------|-------|--------|-------|-------|-------|--------|--|
| BSL | | | | | MM | | | | Euro | | | | |
| Pur. \$: | Par | 0.90 | 0.85 | Sample | Par | 0.90 | 0.85 | Sample | Par | 0.90 | 0.85 | Sample | |
| 2003 | 3.7% | 6.0% | 7.4% | 32 | -5.0% | -2.3% | -0.8% | 4 | -3.6% | 1.1% | 3.0% | 6 | |

| 2013 | 5.6% | 9.4% | 11.5% | 47 | 19.7% | 24.5% | 27.2% | 6 | 9.1% | 15.3% | 17.8% | 6 | |
| 1.0 Med | 15.5% | 18.2% | 19.7% | 427 | 14.0% | 17.0% | 18.7% | 44 | 4.1% | 6.9% | 8.4% | 160 | |
| 2.0 Med | 7.1% | 11.2% | 13.5% | 208 | 12.3% | 17.5% | 20.7% | 23 | 7.1% | 15.3% | 17.8% | 8 | |

Source: Intex, Wells Fargo Securities

Date as of Q2 2020

Performances vary a lot depending on vintages and purchase price (AXA's ability to source assets at an attractive price in the primary market is key). One of the main conclusions of the above table is that pre-GFC vintages are the best performing vintages to date as these CLOs were fully able to benefit from reinvestment opportunities in the years 2008-2012. This conclusion helped drive our decision to source CLO equity positions in the primary market in the years 2018/2019 as our conviction was that we were nearing the end of the credit cycle and these positions would likely be able to benefit from some expected volatility.

Even though the COVID crisis and its consequences are different from the GFC, it is again creating strong reinvestment opportunities in loans. As most of Volta's positions are from 2018/2019 vintages, it is too early to have a clear idea of how these deals will perform as it is possible to reinvest these for years. Hence it makes sense to consider how AXA IM performed with 2005-2007 vintages, through the GFC:

| USD CLO Equity tranches (Terminated deals) | | |
|--|---------------------|-------------------------|
| Vintage | WellsFargo universe | AXA IM selected trances |
| 2005 | 14.1% | 14.9% |
| 2006 | 16.7% | 18.4% |
| 2007 | 18.4% | 21.2% |

The longer the reinvestment period at the time the crisis occurred, the better the final performance, both on average and for our positions.

Again, it is too early to know how CLO equity positions will be able to navigate through the consequences of the COVID-19 crisis, but through running a reasonable scenario analysis we obtain the following projected yield for Volta's assets from July 2020 NAV:

| Main Asset Class | Sub asset Class | %NAV | Projected IRR | Projected WAL |
|------------------|---------------------------------|-------|---------------|---------------|
| CLO | USD CLO Equity | 25.3% | 20.3% | 5.9 |
| | USD CLO Debt | 19.0% | 15.7% | 4.9 |
| | EUR CLO Equity | 21.5% | 20.5% | 5.2 |
| | EUR CLO Debt | 3.1% | 8.2% | 6.0 |
| | CMV | 4.3% | 20.0% | 5.0 |
| | CLO Warehouse | 3.8% | 15.0% | 0.3 |
| BBS | Bank Balance Sheet Transactions | 12.3% | 11.3% | 3.0 |
| Corporate Credit | Cash Corporate Credit Equity | 2.5% | 8.0% | 2.0 |
| ABS | ABS Residual/lease | 2.0% | 11.0% | 2.5 |
| | ABS Debt | 2.0% | 10.0% | 4.5 |
| | Average | | 17.7% | 4.7 |

Overall, as of the end of July 2020, Volta's assets have a projected yield close to 18% with a weighted average life in the area of 4.5 years.

INVESTMENT MANAGER REPORT (CONTINUED)

CURRENCY EXPOSURE

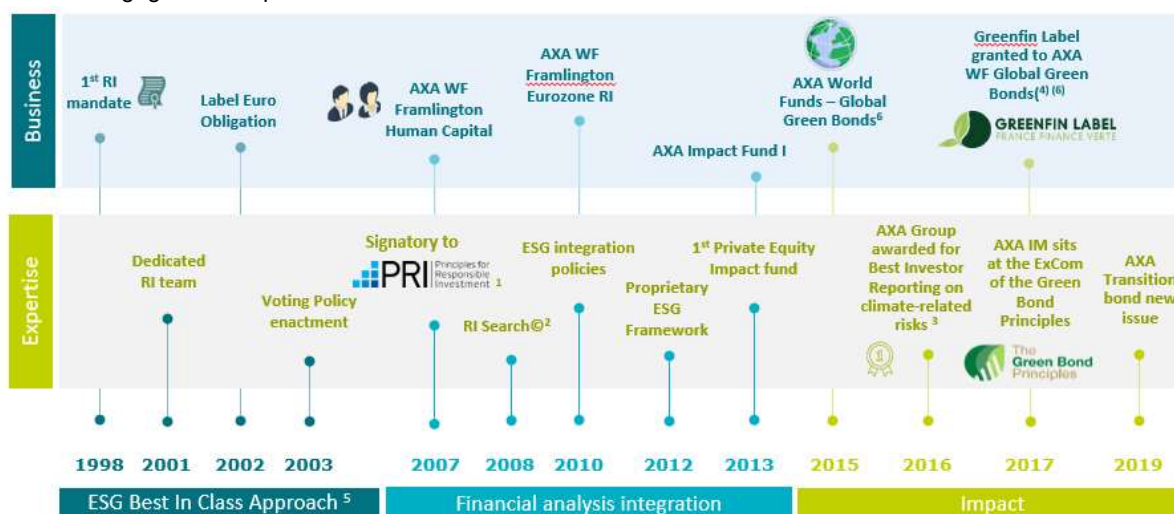

For many years (since the GFC) we have sought to limit the exposure to margin calls that might come from hedging non-Euro currency risk. Structurally, we have been selling forward USD against Euro to limit Volta's USD exposure despite having circa 60% of our assets in USD.

As a result, for years Volta was roughly hedging half of the currency exposure coming from its USD assets. During March/April USD/EUR was very volatile and to avoid taking the risk of being forced sellers of underlying assets due to margin calls from currency hedging, we reduced the quantum of currency hedging so that now, roughly, only one-third of the currency risk coming from the USD assets is hedged.

Our view has always been that being fully hedged means being forced to maintain a significant amount of cash to face potential margin calls. This has its cost. Since Volta's inception, 13 years ago, despite some volatility EUR/USD is still in the same area. We were right accepting some volatility coming from the remaining currency exposure instead of suffering cash drag on a long-term basis.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE ("ESG")

AXA IM has been engaged in Responsible Investment for over two decades:

Since 1998, Responsible Investment principles are part of our company's DNA

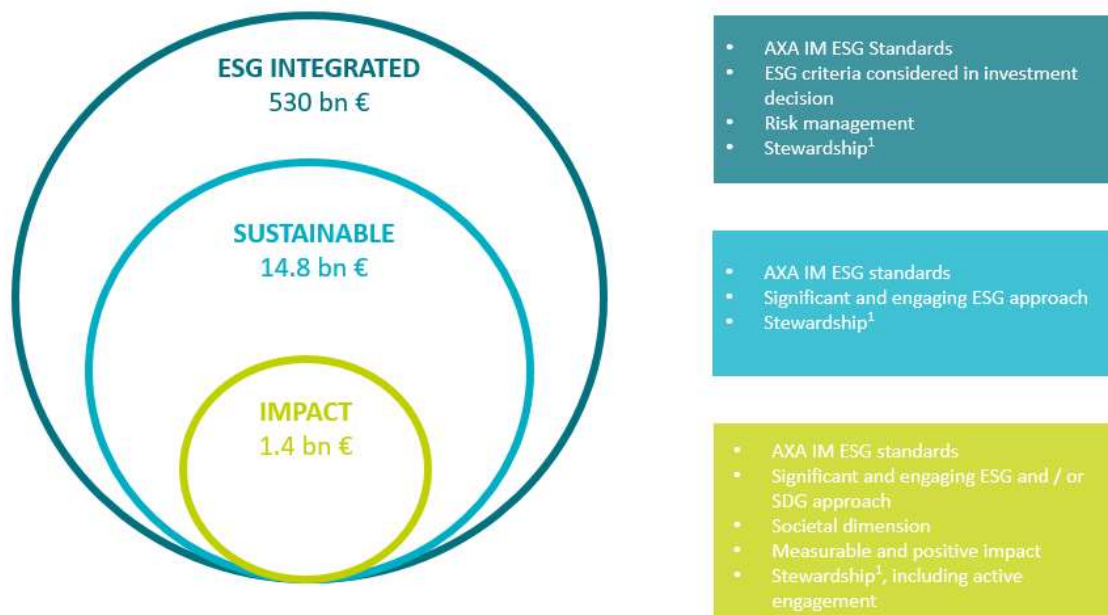

Source: AXA IM as at 31/12/2019. (1) Principle for Responsible Investment. RI = Responsible Investment ESG = Environmental, Social, Governance (2) In-house RI Platform (3) awarded by the Environmental French Ministry in 2016. References to league tables and awards are not an indicator of future rankings in league tables or awards. (4) Source Novethic Launched at the end of 2015 following the COP21 by the French Ministry of the Environment, Energy and the Sea, the "Transition Énergétique et Ecologique pour le Climat" label (Energy and Ecological Transition for Climate) helps to comply and fulfill a fund's commitment to financing the green economy. The Environment Ministry sets out the share of green activities to be held to claim the label. references to league tables and awards are not an indicator of future rankings in league tables or awards. Information contained in this document may be updated from time to time and may vary from previous or future published versions of this document (5) based on AXA IM's methodology, (6) before the 3rd of August 2018, its name was AXA World Funds-Planet Bonds fund

AXA IM again received the highest score available (A+) following a full review from UN PRI in 2020.

We are also classified as best-in-class ("Avant-Gardist rank") by H&K Responsible Investment Brand recognising that both our commitments and the architecture that is in place are amongst the best.

INVESTMENT MANAGER REPORT (CONTINUED)

Year after year, Responsible Investment is incorporated into a growing share of AXA IM's AUM:

Source : AXA IM as of 30/06/2020. Non audited figures. Inclusive figures with a cumulative approach.
 1 - AXA IM Joint Ventures have a specific approach with regards to ESG scoring and stewardship

In relation to Volta's investments we are making good progress year after year.

Our first step was to ask, systematically those CLO managers we invested with in the primary market, to exclude some areas of investment in line with the exclusion policy determined internally (and applied to all our direct investments). Typically we asked for inclusion of the following wording in CLO documentation: "will not invest in companies whose principal business is directly derived from the production or marketing of controversial weapons (including antipersonnel landmines, cluster weapons, chemical, and biological weapons); development of nuclear weapon programs or production of nuclear weapons and thermal coal production".

As of the end of July 2020, slightly more than 18% of our investments in CLO tranches including wording regarding a partial or complete exclusion in line with our request.

AXA IM being a direct investor in loans and managing its own CLOs, has been producing for the last two years ESG scoring on most of the European and USD loans purchased for Volta in the primary market. The effort has been amplified in 2020 so that almost 40% of the loans in AXA IM CLOs have an ESG scoring. We are not yet at a stage at which we can pursue a minimum score or specific target when building a CLO loan pool, but it is something that we are targeting for 2021/2022.

Our ambition for 2021 is to continue exercising pressure on external CLO managers. The aim is to have most of them applying exclusion criteria and have a growing portion of Volta's positions not only excluding some business areas but at some stage targeting minimum scores in some ESG criteria. There is not yet any significant research to demonstrate that for credit/loan investments a responsible investment approach provides superior returns but it would be surprising if responsible credit investments did not demonstrate the same type of outperformance evidenced by common equities.

For 2021, we are working with our internal Responsible Investment teams to develop a methodology to score external CLO managers. We will be able to report on that in 2021 and at some point, we will be able to exclude CLO managers that are not taking reasonable efforts and actions to integrate Responsible Investment into their investment process.

Despite the complexities involved, AXA IM is at the forefront of the promotion of ESG considerations into structured finance and is actively supporting the transformation of the industry.

AXA INVESTMENT MANAGERS PARIS

6 November 2020

STRATEGIC REPORT

Introduction

This executive summary is designed to provide information about the Company's business and results for the year ended 31 July 2020. It should be read in conjunction with the Chairman's Statement and the Investment Manager's Report which gives a detailed review of investment activities for the year and an outlook for the future.

Company Summary

The Company is a closed-ended limited liability company registered in Guernsey under the Companies (Guernsey) Law 2008 (as amended) with registered number 45747. The registered office of the Company is BNP Paribas House, St Julian's Avenue, St Peter Port, Guernsey, GY1 1WA, Channel Islands.

The Company is an authorised collective investment scheme in Guernsey, pursuant to the Protection of Investors (Bailiwick of Guernsey) Law, 1987 (as amended). The Company's Ordinary shares are listed on Euronext Amsterdam and on the premium segment of the Official List of the UK Listing Authority and are admitted to trading on the Main Market of the London Stock Exchange. Volta's home member state for the purposes of the EU Transparency Directive is the Netherlands. As such, Volta is subject to regulation and supervision by the Netherlands Authority for the Financial Markets, being the financial markets supervisor in the Netherlands.

Purpose, investment objectives and strategy

The Company exists to provide Shareholders with access to a broad range of structured credit investments actively managed by AXA IM. Through harnessing AXA IM's expertise, the Company invests in a diversified portfolio of structured credit assets with the objective of providing Shareholders with a regular and high level of income and the prospect of modest capital gains over the investment cycle.

The Company's investment objectives are to seek to preserve capital across the credit cycle and to provide a stable stream of income to its Shareholders through dividends that it expects to distribute on a quarterly basis.

Subject to the risk factors that are described in the 'Principal and Emerging Risk Factors' section and in Note 19, the Company seeks to attain its investment objectives predominantly through investment in a diversified portfolio of structured finance assets. The Company's investment strategy focuses on direct and indirect investments in, and exposures to, a variety of assets selected for the purpose of generating cash flows for the Company. The assets that the Company may invest in either directly or indirectly include, but are not limited to, corporate credits; sovereign and quasi-sovereign debt; residential mortgage loans; commercial mortgage loans; automobile loans; student loans; credit card receivables; leases; and debt and equity interests in infrastructure projects.

The Company's approach to investment is through vehicles and arrangements that essentially provide leveraged exposure to portfolios of such Underlying Assets. In this regard, the Company reviews the investment strategy adopted by AXA IM on a quarterly basis. The current investment strategy is to concentrate on the following asset classes: CLO (Debt/Equity/Warehouses); Synthetic Corporate Credit; Cash Corporate Credit; and ABS. There can be no assurance that the Company will achieve its investment objectives.

Principal and Emerging risks and uncertainties

The principal and emerging risks and uncertainties faced by the Company are described within the 'Principal and Emerging Risk Factors' section of the Annual Report on pages 20 to 22 and Note 19 in the financial statements.

The Investment Manager

AXA IM is a multi-expert asset management company within the AXA Group, a global leader in financial protection and wealth management, which has a team of experts concentrating on the structured finance markets. AXA IM is one of the largest European-based asset managers with €815 billion in assets under management as at the end of June 2020.

AXA IM is authorised by the AMF as an investment management company and its activities are governed by Article L. 532-9 of the French Code Monétaire et Financier. AXA IM was appointed as the Company's AIFM in accordance with the EU AIFMD on 22 July 2014.

Performance measurement and Key Performance Indicators

The Directors meet regularly to review performance and risk against a number of key measures.

Total return

The Board regularly reviews NAV and NAV total return, the performance of the portfolio as well as income received and share price of the Company. The Directors regard the Company's NAV total return as being the overall measure of value delivered to Shareholders over the long term. NAV total return is calculated based on NAV growth of the Company with dividends reinvested at NAV.

NAV, on a total return basis, was (22.5)% for the year ended 31 July 2020. Please refer to page 1 for NAV and share price performance analysis.

Concentration

The Board reviews the asset diversification of the investment portfolio to ensure that holdings are in line with the investment guidelines and also to monitor the concentration risk of the investment portfolio.

Refer to pages 55 to 57 of the Prospectus for further information regarding investment guidelines in place.

STRATEGIC REPORT (CONTINUED)

Refer to the Investment Manager's Report for analysis of Volta's portfolio position as at 31 July 2020. The Company publishes its portfolio composition on its website on a monthly basis.

Ongoing charges

The ongoing charges are a measure of the total recurring expenses incurred by the Company expressed as a percentage of the average Shareholders' funds over the year. The Board regularly reviews the ongoing charges and monitors all Company expenses. Refer to page 77 for methodology of calculation.

Premium / discount

The Directors review the trading prices of the Company's Ordinary shares and compare them against their NAV to assess quantum and volatility in the discount of the Ordinary share prices to their NAVs during the year. Please refer to page 1 for further analysis.

Environmental, social and governance issues

The Company itself has only a very small footprint in the local community and only a very small direct impact on the environment. However, the Board acknowledges that it is imperative that everyone contributes to local and global sustainability. The nature of the Company's investments is such that they do not provide a direct route to influence investees in ESG matters in many areas, but the Board and the Investment Manager work together to ensure that such factors are carefully considered and reflected in investment decisions, as outlined elsewhere in these financial statements.

Board members do travel, partly to meetings in Guernsey, and partly elsewhere on Company business, including for the annual due diligence visits to AXA IM in Paris and to BNPP in Jersey. The Board considers this essential in overseeing service providers and safeguarding stakeholder interests. Otherwise, the Board seeks to minimise travel by the use of conference calls whenever good governance permits.

For further information regarding the Company's approach to environmental, social and governance issues, please refer to the ESG Section within the Investment Manager's Report on pages 8 and 9.

Life of the Company

The Company has a perpetual life.

Future strategy

The Board continues to believe that the investment strategy and policy adopted is appropriate for and is capable of meeting the Company's objectives. The overall strategy remains unchanged and it is the Board's assessment that the Investment Manager's resources are appropriate to properly manage the Company's investment portfolio in the current and anticipated investment environment. Refer to the Investment Manager's report on pages 4 to 9 for details regarding performance to date of the investment portfolio and the main trends and factors likely to affect those investments.

Going Concern

Under the Listing Rules, the AIC Code and applicable regulation the Directors are required to satisfy themselves that it is reasonable to assume that the Company is a going concern and to identify any material uncertainties to the Company's ability to continue as a going concern for at least 12 months from the date of approving the financial statements.

The Directors have considered the state of financial market conditions at the period end date and subsequently. The developing situation with respect to the economic consequences of the COVID-19 pandemic has resulted in considerable volatility in financial markets generally, and has negatively impacted the market value of the Company's underlying investments. These falls have also impacted the price of the Company's own shares as the discount to NAV has widened. However, the impact on cash inflows to the Company has not been as large. The Investment Manager has taken appropriate steps to minimise cash out flows through margin calls and other commitments.

Whilst it is of course not possible to accurately predict future cash inflows – the incidence and impact of defaults in the Underlying Assets is impossible to predict – the Directors have concluded that any reasonably foreseeable fall in cash inflows would not have a material impact on the Company's ability to meet its liabilities as they fall due. Therefore, after making appropriate enquiries, the Directors are of the opinion that the Company remains a going concern and are satisfied that it is appropriate to continue to adopt the going concern basis in preparing the Company's financial statements.

Viability Statement

In accordance with the provision of the AIC Code, the Directors have assessed the viability of the Company over a period of four years from the date of approval of this report. In making this assessment the Directors have taken into account the impact that various plausible adverse scenarios might be expected to have on the Company's cash flows and its ability to meet its liabilities on a timely basis.

The starting point for this analysis was the Company's current financial position; current market conditions; the principal risks facing the Company, as described within the Principal Risk Factors section of the Annual Report on pages 20 to 22; and the risks arising from the Company's financial instruments set out in Note 19 to the financial statements, and their potential impact on the Company.

A four year forecasting period was considered to be appropriate (2019: a 3 year forecasting period was used), given the life cycle of the Company's particular investment universe and the structure and investment objectives of the Company, as it represents the time within which at least 50% of the value of the portfolio might be reasonably expected to have liquidated naturally despite unfavourable market conditions.

STRATEGIC REPORT (CONTINUED)

In making their assessment of the Company's prospects, the Directors have focused their attention on those risks impacting the carrying value and liquidity of the Company's investment portfolio and the Company's ability to generate cash from its activities, and thereby to enable it to meet its payment obligations as they fall due, including under derivatives contracts, as well as to continue to pay a stream of dividends in accordance with its investment objectives. The Directors consider that the greatest risks to the Company's ability to generate cash, and to the carrying value of its investments, would be a combination of inter alia: a significant and rapid appreciation on the US Dollar; a sustained increase in the default rate of the credit investments and/or underlying assets of the portfolio; and/or any change in market conditions which resulted in severe, prolonged damage to the liquidity and market value of the investment portfolio.

The Directors have considered income, expenditure and NAV projections for the Company, firstly under a base case that incorporates the impact of the ongoing COVID-19 pandemic, then under various stress test scenarios that are considered to be severe but plausible and including scenarios where default levels were modelled to peak at a level higher than those previously experienced by the Company during the 2008/2009 crisis and to persist for longer than the heightened default levels that were experienced by the Company at that time.

Specific variables adjusted to account for the impact of the ongoing COVID-19 pandemic included: using S&P pessimistic forward 12 month default rates for speculative grade issuers; eliminating any lag in the timing of the downturn; making no distinction between the performance of US and European CLO markets; assuming one or two industry sectors become severely stressed; and modelling the impact of +/- 20% moves in the Euro US Dollar exchange rate.

Under no plausible scenario modelled did the Company become cash flow insolvent but the modelling made two key assumptions: firstly, it was assumed that the portfolio would react to changes in underlying factors in a similar way to that experienced in the past; and secondly, the Directors made the assumption that the Investment Manager would be able to actively and conservatively manage the portfolio during the downturn.

The Directors noted that under various plausible adverse scenarios, while neither of the Company's objectives of providing a stable income stream and preserving capital across the credit cycle may be met, projected income exceeded projected expenses over the period.

The Directors note that the Company's shares trade at a discount to NAV. They actively monitor the discount and communicate regularly with Shareholders on this subject. In making their assessment of viability, the Directors have assumed that Shareholders will continue to recognise the value provided by the Company and will not petition to wind up the Company. The Directors have also assumed that no unforeseen change in, or change in interpretation of, the regulations and laws to which the Company is subject will have a materially negative impact upon its viability.

The Directors have and continue to monitor the uncertainties in the political and economic environments in particular the impact as a result of the UK leaving the EU.

The Directors therefore confirm that they have performed a robust assessment of the viability of the Company over the four-year period from the date of approval of this report, taking into account their assessment of the principal risks facing the Company, including those risks that would threaten its business model, future performance, solvency or liquidity.

The Directors, after due consideration and in the absence of any unforeseen circumstances, confirm that they have a reasonable expectation that the Company will be able to continue in operation and meet its liabilities as they fall due over the four-year period of their assessment.

STRATEGIC REPORT (CONTINUED)

Section 172(1) Statement

Through adopting the AIC Code, the Board acknowledges its duty to comply with section 172 of the UK Companies Act 2006 and to act in a way that promotes the success of the Company for the benefit of its Shareholders as a whole, having regard to (amongst other things):

- a) consequences of any decision in the long-term;
- b) the interests of the Company's employees;
- c) the need to foster business relationships with suppliers, customers and others;
- d) impact on community and environment;
- e) maintaining reputation; and
- f) acting fairly as between members of the Company.

The Board considers this duty to be inherent within the culture the Company and a part of its decision-making process.

The Company's culture is one of openness, transparency and inclusivity. Respect for the opinions of its diverse stakeholders features foremost as does its desire to implement its operations in a sustainable way, conducive to the long term success of the Company.

Information on how the Board has engaged with its stakeholders and promoted the success of the Company, through the decisions it has taken during the year, whilst having regard to the above, is outlined below.

The example outcomes below outline decisions taken during the year which the Board believes has the greatest impact on the Company's long term success. The Board considers the factors outlined under section 172 and the wider interests of stakeholders as a whole in all decisions it takes on behalf of the Company.

Stakeholder engagement

The Company is an externally managed investment company, has no employees, and as such is operationally quite simple. The Board does not believe that the Company has any material stakeholders other than those set out in the following table.

| Issues that matter to them | | |
|--|---|--|
| Investors | Service providers | Community and environment |
| Performance and liquidity of the shares Growth and liquidity of the Company | Reputation of the Company Compliance with Law and Regulation Remuneration | Compliance with law and regulation Impact of the Company and its activities on third parties |
| Engagement process | | |
| Investors | Service providers | Community and environment |
| Annual General Meeting Frequent meetings with investors by brokers and the Investment Manager and subsequent reports to the Board Monthly factsheets Key Information Document Publication of paid for research | The main two service providers – AXA IM and BNPP – engage with the Board in face to face meetings quarterly, giving them direct input to Board discussions. The Board also considers the interests of the Corporate Broker and Societe Generale as lender at each of its meetings. All service providers are asked to complete a questionnaire annually which includes feedback on their interaction with the Company, and the Board undertakes an annual visit to AXA IM in Paris and to BNPP in Jersey. | The Company itself has only a very small footprint in the local community and only a very small direct impact on the environment. However, the Board acknowledges that it is imperative that everyone contributes to local and global sustainability. |

STRATEGIC REPORT (CONTINUED)

| Rationale and example outcomes | | |
|---|--|---|
| Investors | Service providers | Community and environment |
| <p>Clearly investors are the most important stakeholder for the Company. Most of our engagement with investors is about “business as usual” matters, but has also included discussions about the discount of the share price to the NAV. The major decisions arising from this have been for the Board to seek to ensure long term value (eg the inclusion of warehouses within the portfolio to give access to beneficial terms in subsequent investments) and to seek greater liquidity for the Company’s shares through increasing its profile.</p> <p>In addition, the Board has focussed on valuation of assets, a key priority for Shareholders. As a result, it was decided to adopt a more sophisticated valuation methodology for the CMV investment and to engage JP Morgan Pricing Direct for all CLO valuations, thus ensuring a more robust and reliable methodology than previously.</p> <p>The Board also decided to reduce dividend payments in light of the uncertainty caused by the COVID-19 pandemic in order to preserve the Company’s liquidity</p> | <p>The Company relies on service providers entirely as it has no systems or employees of its own. No major decisions were made by the Board which affected service providers in the year, although in prior years the decisions to broaden the investment base of the Company (to include the CMV) and to change the administrator and depositary were only made after due consultation of those impacted.</p> <p>The Board always seeks to act fairly and transparently with all service providers, and this includes such aspects as prompt payment of invoices.</p> | <p>The nature of the Company’s investments is such that they do not provide a direct route to influence investees in ESG matters in many areas, but the Board and the Investment Manager work together to ensure that such factors are carefully considered and reflected in investment decisions, as outlined elsewhere in the document.</p> <p>Board members do travel, partly to meetings in Guernsey, and partly elsewhere on Company business, including for the annual due diligence visits to AXA IM in Paris and to BNPP in Jersey. The Board considers this essential in overseeing service providers and safeguarding stakeholder interests. Otherwise, the Board seeks to minimise travel by the use of conference calls whenever good governance permits.</p> |

Engagement processes are kept under regular review. Investors and other interested parties are encouraged to contact the Company via guernsey.bp2s.volta.cosec@bnpparibas.com on these or any other matters.

The Strategic Report was approved by the Board of Directors on 6 November 2020 and signed on its behalf by:

Paul Meader
Chairman

Stephen Le Page
Chairman of the Audit Committee

REPORT OF THE DEPOSITARY TO THE SHAREHOLDERS

As Depositary we are responsible for carrying out duties set out in Article 21 paragraphs (7) (8) and (9) of the AIFMD and can confirm that monitoring has taken place to ensure that AXA IM (the AIFM) is compliant with Article 21 paragraphs (7) (8) and (9) for the year ended 31 July 2020, and that we have no matters of concern to report.

6 November 2020

REPORT OF THE DIRECTORS

The Directors present their Annual Report and the Audited Financial Statements for the year ended 31 July 2020. In the opinion of the Directors, the Annual Report and Audited Financial Statements taken as a whole are fair, balanced and understandable and provide the information necessary for Shareholders to assess the Company's position and performance, business model and strategy.

Culture of the Company

The Board recognises that its tone and culture are important and will greatly impact its interactions with Shareholders and service providers as well as the development of long-term shareholder value. The importance of sound ethical values and behaviours are crucial to the ability of the Company to achieve its corporate objectives successfully.

The Board individually and collectively seeks to act with diligence, honesty and integrity. It encourages its members to express differences of perspective and to challenge but always in a respectful, open, cooperative and collegiate fashion. The Board encourages diversity of thought and approach and chooses its members with this approach in mind. The corporate governance principles that the Board has adopted are designed to ensure the Company delivers long term value to its Shareholders and treats all Shareholders equally. All Shareholders are encouraged to have an open dialogue with the Board.

Share capital

The Company's share capital consists of an unlimited number of shares. As at 31 July 2020, the Company's issued share capital was 36,580,580 shares (31 July 2019: 36,580,580 shares). In accordance with the provisions of the Articles of the Company, there is in issue 1 Class B convertible ordinary share of no par value which is issued to the Manager and gives them the right to elect (or remove) one member of the Board.

Results and dividends

During the financial year the Company's NAV decreased by €82.4 million or €2.25 per share. The net comprehensive loss for the year, amounted to €63 million.

On 2 April, the Board announced it had resolved to cancel the payment of the dividend planned for payment on 28 April 2020 as a result of the ongoing uncertainty being caused by the COVID-19 pandemic. The Board and the Investment Manager recognised the importance of dividends to Shareholders but believed the cancellation was the prudent course of action, noting liquidity and solvency were the paramount objectives of the Board. Following the receipt of cash flows expected during April 2020, on 11 May 2020, the Board announced the payment of its first interim dividend.

During the year, the Directors declared the following quarterly dividends: €0.16 per share paid in September 2019; €0.16 per share paid in December 2019; €0.10 per share paid in June 2020; and €0.11 per share paid in July 2020.

Share repurchase programme

At the 2019 AGM, held on 6 December 2019, the Directors were granted authority to repurchase 5,483,429 shares (being equal to 14.99% of the aggregate number of shares in issue at the date of the 2019 AGM notice). This authority, which has not been used, will expire at the upcoming AGM. The Directors intend to seek annual renewal of this authority from Shareholders.

Authority to allot

At the 2019 AGM, the Directors were granted authority to allot, grant options over, or otherwise dispose of up to 3,658,058 shares (being not more than 10% of the shares in issue at the date of the 2019 AGM notice). This authority, which has not been used, will expire at the 2020 AGM. The Directors intend to seek annual renewal of this authority from Shareholders.

Repurchase agreement with Société Générale

The Company had a repurchase agreement with SG. During the year between 1 August 2019 and 8 May 2020, the Company had drawn down finance of \$40 million, secured against a portfolio of USD CLO Debt securities. For reasons outlined in the Investment Manager's report on page 4, it was decided to fully repay the outstanding amount. As at 31 July 2020, the Company had no amount outstanding to SG. Refer to Note 12 to the financial statements for further details.

Alternative Investment Fund Managers Directive

The AIFMD seeks to regulate managers of AIFs that are marketed or managed in the European Economic Area. In compliance with the AIFMD, the Company has appointed AXA IM to act as its AIFM and, BNP Paribas Securities Services S.C.A. Guernsey Branch has been appointed to act as its Depositary. Refer to the legal and regulatory disclosures section on pages 79 and 80 for further information.

REPORT OF THE DIRECTORS (CONTINUED)

Directors

The Directors who held office during the financial year and up to the date of approval of this report are listed on page 81 and 82.

The Directors' interests in the Company's share capital as at the current financial year end were:

| | Number of shares at 31 July 2019 | New shares issued | Shares purchased on secondary market* | Shares purchased directly | Number of shares at 31 July 2020 |
|-------------|--|-------------------------|---|---------------------------------|--|
| G Harrison | 13,896 | 0 | 4,128 | none | 18,024 |
| S Le Page | 29,265 | 0 | 4,635 | none | 33,900 |
| P Meader | 33,794 | 0 | 5,271 | none | 39,065** |
| A Moini *** | 6,052 | 0 | 3,864 | none | 9,916 |
| P Varotsis | 194,702 | 0 | 4,128 | 7,500 | 206,330 |

Shares purchased after the year ended 31 July 2020 on the secondary market as part payment of Directors' fees for the year ended 31 July 2020:

| | Shares purchased on secondary market* after year end |
|-------------|---|
| G Harrison | 1,201 |
| S Le Page | 1,348 |
| P Meader | 1,533 |
| A Moini *** | 1,124 |
| P Varotsis | 1,201 |

* Shares purchased on the secondary market represent the shares purchased by the Company on the secondary market and transferred to the Directors as part payment of the Directors' fees.

**10,200 and 25,903 Ordinary shares are held by persons closely associated to Paul Meader.

*** A Moini resigned on 31 July 2020.

Shareholders' Interests

As at 31 July 2020, so far as the Directors are aware, no person other than those listed below and those parties disclosed in Note 20 to the financial statements was interested, directly or indirectly, in 5% or more of the issued share capital in the Company:

| Registered Shareholder | Number of Ordinary shares held | Percentage of Ordinary shares held |
|-------------------------------|--------------------------------------|--|
| AXA S.A | 11,060,060 | 30.24% |
| BNP Paribas Wealth Management | 5,737,188 | 15.68% |
| Deutsche Bank | 2,129,282 | 5.82% |
| Citibank | 2,085,282 | 5.70% |

None of the above Shareholders have Shareholder rights that are different from those of other holders of the Company's Ordinary shares, except for the holder of the Class B share, an affiliate of AXA S.A., which has the right to appoint a Director to the Board. This right is not currently being exercised.

Disclosure of information to Auditor

The Directors who held office at the date of approval of this Directors' Report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's Auditor is unaware and each Director has taken all the steps that he ought to have taken as a Director to make himself aware of any relevant audit information and to establish that the Company's Auditor is aware of that information.

Independent Auditor

KPMG served as Auditor during the financial year and has expressed its willingness to continue in office.

During 2019, the Audit Committee carried out an audit tender for the 2020 engagement and a resolution to re-appoint KPMG as Auditor was tabled and approved by Shareholders at the Annual General Meeting held on 6 December 2019.

Refer to page 30 for further detail regarding the audit tender process carried out by the Audit Committee.

REPORT OF THE DIRECTORS (CONTINUED)

Financial risk management objectives and policies

The Board is responsible for the Company's system of risk management and internal control and meets regularly in the form of periodic Board meetings to assess the effectiveness of such controls in managing and mitigating risk.

The Board confirms that it has reviewed the effectiveness of the Company's system of risk management and internal control for the year ended 31 July 2020, and to the date of approval of this Annual Report.

The key financial risks that the Directors believe the Company is exposed to include credit risk, liquidity risk, market risk, interest rate risk, valuation risk and foreign currency risk. Please refer to Note 19 for reference to financial risk management disclosures, which explains in further detail the above risk exposures and the policies and procedures in place to monitor and mitigate these risks.

The Administrator has established an internal control framework to provide reasonable but not absolute assurance on the effectiveness of the internal controls operated on behalf of its clients. The effectiveness of these controls is assessed by the Administrator's compliance and risk departments on an on-going basis and by periodic review by external parties. The Administrator's Fund Compliance Manager, acting on behalf of the Company, presents an assessment of their review to the Board in line with the compliance monitoring program on a quarterly basis which has revealed no matters of concern.

Events after the Reporting Date

The Directors are not aware of any developments that might have a significant effect on the operations of the Company in subsequent financial periods not already disclosed in this report or Note 22 of the attached financial statements.

The Report of the Directors was approved by the Board of Directors on 6 November 2020 and signed on its behalf by:

Paul Meader
Chairman

Stephen Le Page
Chairman of the Audit Committee

RISK COMMITTEE REPORT

The Risk Committee presents its report for the year ended 31 July 2020.

Terms of reference

The Board has established terms of reference for the Risk Committee governing its responsibilities, authorities and composition in accordance with the AIC Code.

The Risk Committee's responsibilities include, but are not limited to, the following:

- reviewing and monitoring the effectiveness of the Company's risk management and internal control procedures pertaining to the investment portfolio, focusing on identifying and overseeing those investment portfolio related risks that might impact upon the performance of the Company's NAV and/or shares, and reporting its findings to the Board;
- the development and maintenance of a risk matrix, incorporating risk mitigation measures, to assist the Risk Committee in identifying, recording and monitoring the key risks faced by the Company, having regard to all risks that may be identified, including those identified in the 'Principal and Emerging Risk Factors' section on pages 20 to 22;
- the recommendation of investment risk limits and tolerances to the Board and regular review of the suitability of those adopted;
- monitoring compliance with those investment risk limits and tolerances and notifying the Board of any breaches or material concerns on a timely basis; and
- monitoring compliance with operational and regulatory requirements relating to the Company's investment portfolio and notifying the Board of any breaches or material concerns on a timely basis.

The Risk Committee complements and enhances the work of the Audit Committee, which focuses on risks that might impact upon financial reporting and other areas that are not specifically related to the Company's investment portfolio.

Delegation of duties

The Risk Committee has no full-time employees as all day-to-day operational functions, including investment management, risk management and internal control, have been outsourced to various service providers. However, the Risk Committee retains full responsibility for the oversight of such service providers.

Composition

The Risk Committee, as of the date of approval of the financial statements, comprises Mr Harrison (Chairman), Mr Le Page, Mr Meader and Mr Varotsis. Only Independent Directors may serve on the Risk Committee. The Risk Committee meets at least four times each year. Ms Moini served on the committee throughout the year ended 31 July 2020.

Activities

During the financial year ended 31 July 2020 the Risk Committee met on four occasions. The due diligence visit to the Investment Manager took place on 11 August 2020 via video conference.

The Risk Committee reviews both quantitative and qualitative metrics in relation to the categories of risk which are relevant to the Company's overall activities, the particular characteristics of the Company's investments and the Company's investment objectives. These metrics are generally provided to the Risk Committee by the Investment Manager but, from time to time, the Risk Committee may also be provided with information by its Company Secretary or its Corporate Broker.

The Risk Committee constructively challenges the Investment Manager in relation to matters of investment risk. The Risk Committee ensures that the risk matrix is kept up to date in response to the evolving strategy and risk environment of the Company.

The principal and emerging risks facing the Company, as identified by the Risk Committee in conjunction with the Board, including those risks that would threaten its business model, future performance, solvency or liquidity are listed in the Principal and Emerging Risk Factors section on pages 20 to 22.

The Risk Committee has worked jointly with the Audit Committee to develop a framework for the analysis required for the Board to make the Viability Statement included on pages 11 and 12 of this report. This work included scenario and stress case modelling produced by the Investment Manager at the Risk Committee's request.

The Risk Committee has concluded from the results of its activities during the financial year that the risks faced by the Company, as described in this Annual Report, are appropriate to the Company's investment objectives and circumstances and are adequately monitored and controlled. The Risk Committee has reported accordingly to the Board.

Graham Harrison
Chairman of the Risk Committee
6 November 2020

PRINCIPAL AND EMERGING RISK FACTORS

Summary

An investment in the Company's shares is suitable only for sophisticated investors who are capable of evaluating the merits and risks of such an investment and who have sufficient resources to be able to bear any losses (which may equal the whole amount invested) that may result. The Company offers no assurance that its investment objectives will be achieved. Prospective investors should carefully review and evaluate the descriptions of risk and the other information contained in this report, as well as their own personal circumstances, and consult with their financial and tax advisors before making a decision to invest in the shares.

Prospective investors should be aware that the value of the shares may decrease, any dividend income from them may not reach targeted levels or may decline, and investors may not get back their invested capital. In addition, the market price of the shares may be significantly different from the underlying value of the Company's net assets. The NAV of the Company as determined from time to time may be at a level higher than the amount that could be realised if the Company were liquidated.

The following principal and emerging risks and uncertainties are those that the Company believes are material, but these risks and uncertainties may not be the only ones that the Company and its Shareholders may face. Additional risks and uncertainties, including those that the Company is not aware of or currently views as insignificant, may also result in decreased revenues, increased expenses or other events that could result in a decline in the value of the shares. A more comprehensive list of the risks faced by the Company may be found in the Summary Document that is posted on the Company's website.

| Strategic risks | |
|---|--|
| <p>These are the investment risks the Company chooses to take in order to meet its performance objectives. The Board has defined limits for various metrics in order to monitor and control the following strategic risks, which are reviewed by the Risk Committee on at least a quarterly basis. The Board also reviews regularly the broad investment environment and receives detailed reports, including scenario analysis, from the Investment Manager on the economic outlook and potential impact on the Company's performance.</p> | |
| Principal risks | Impact, tolerance, controls and mitigation |
| <p>Default risk – The risk that underlying loans or financial assets within the investment portfolio default, leading to investment losses, a reduction in cash flows receivable and a fall in the Company's NAV.</p> <p>The risk that a counterparty defaults leading to a financial loss for the Company.</p> | <p>Depending on the severity of any increase in default rates, particularly the duration of any such increase, the impact of underlying asset default risk could potentially be high. However, the Company is expected to be able to tolerate a short-term spike in defaults without any material impact on the Company. Default risk is monitored and managed by the Investment Manager through active portfolio management and is mitigated by the Company's broadly diversified investment portfolio. Individual and aggregated exposure limits and tolerances in relation to credit risk are set by the Company and reviewed regularly. Because most CLOs and some other investments in the Company's portfolio are actively managed and the Company invests at various levels in the capital structure of CLOs, the aggregate net credit exposure across the portfolio to underlying names cannot be fully controlled. However, the Investment Manager periodically provides granular impact analysis of credit exposure to the larger underlying obligors in order to allow the Board to be satisfied that the portfolio remains broadly diversified and that this risk remains at a tolerable level.</p> <p>The Company has a moderate credit exposure to counterparties through inter alia: derivatives; repurchase agreements; and cash deposits. On rare occasions, there may be short-term exposure via settlement processes. Limits are set for individual counterparty exposures. The Investment Manager monitors these limits and provides compliance reports thereon to the Risk Committee. The Investment Manager also monitors the quality and appropriateness of counterparties, upon which it performs regular due diligence.</p> |
| <p>Market risk – The impact of movements in market prices, interest rates and foreign exchange rates on cash flows receivable and the Company's NAV.</p> | <p>The impact of market risk on the Company's ability to achieve its investment objectives could potentially be high. To the extent that repurchase agreements are in place, sharp falls in market prices would require more eligible collateral to be posted at relatively short notice and a prolonged severe drop in NAV could ultimately trigger the termination of the Repo. Likewise, a combination of a sharp downturn in asset prices with sharp rise in the US Dollar would result in an FX margin call that might create a liquidity squeeze and result in assets being sold at distressed levels. Thus, both market and FX risk are monitored closely and these risks are managed and mitigated as far as possible by the Investment Manager through active portfolio management, the maintenance of a diversified investment portfolio and use of the flexibility of the Company's investment policy, which permits the Investment Manager to switch between asset classes and levels of risk.</p> |

PRINCIPAL AND EMERGING RISK FACTORS (CONTINUED)

| Strategic risks (continued) | |
|--|---|
| Principal risks | Impact, tolerance, controls and mitigation |
| <p>Market risk (continued) – The impact of movements in market prices, interest rates and foreign exchange rates on cash flows receivable and the Company's NAV (continued).</p> <p>The risk of severe market disruption leading to impairment of the market value and/or liquidity of the Company's investment portfolio.</p> <p>The market value of the collateral posted by the Company under the Repo is significantly higher than the amount of the loan due to the application of haircuts. The amount of collateral that would be required could increase significantly in the event of market disruption.</p> | <p>Given that the Company's investments have floating interest rate characteristics, the direct risk arising from interest rate volatility is modest. The Investment Manager carefully manages the Company's foreign exchange exposure hedging through derivatives to balance the partial mitigation of the impact of foreign exchange fluctuations upon the NAV with the need to ensure that any margin obligations can be met comfortably. The Risk Committee has set foreign exchange exposure tolerances and derivative margin tolerances.</p> <p>The Company is well positioned to be able to tolerate prolonged market disruption, as occurred in 2008/2009, due to the fact that the Company is currently financed by equity on which it is able to exercise discretion regarding dividend payments. The Company may utilise debt financing through entering into repurchase agreements. The Board monitors overall leverage levels and the Risk Committee oversees soft limits applicable to any Repo and associated collateralisation.</p> <p>When repurchase arrangements are in place, the Investment Manager monitors on a daily basis the collateral requirements under that Repo and ensures that a suitable amount of available cash and other liquid assets is available at all times to respond to any requirement to post additional collateral. The liquidity of the Company is controlled through limits set and monitored by the Investment Manager and by the Risk Committee. The Risk Committee and the Board require timely exception reporting from the Investment Manager upon any breach relating to these limits.</p> |
| <p>Re-investment risk – The ability to re-invest in investments that maintain the targeted level of returns at an acceptable level of risk.</p> | <p>The potential impact of this risk is considered to be moderate in that it would not be felt immediately, given the medium-term nature of the Company's portfolio. The Company fully tolerates this risk in order to achieve its investment objectives. In the Board's opinion, the ability of the Company and the Investment Manager to mitigate this risk is necessarily limited by external factors. Nevertheless, the Investment Manager is alert to the need to anticipate and respond to market and regulatory developments. Taking into account the reputation, size and presence in the market of the Investment Manager, which provide increased exposure to investment opportunities, and the Company's flexible investment mandate, the Board believes that this risk is mitigated as far as reasonably possible. The Board is aware of the risk of "creep" in risk tolerance in order to maintain returns in less favourable market environments and regularly challenges the Investment Manager on this point.</p> |

| Preventable risks | |
|---|---|
| Principal risks | Impact, tolerance, controls and mitigation |
| <p>These are the risks that the Board believes should be substantially mitigated by the Company's controls. The Board has defined limits for various metrics in order to monitor and control the following preventable risks, which are reviewed by the Risk Committee on at least a quarterly basis.</p> | |
| <p>Liquidity and going concern – The risk that the Company is unable to meet its payment obligations and is unable to continue as a going concern for the next twelve months.</p> | <p>If the Company were to be unable to meet its obligations as they fell due, the impact on the Company would be severe, although this risk is remote. Consequently, the Company monitors this risk and the potential threats to the liquidity of the portfolio. The availability of liquid resources is a high priority for both the Risk Committee and the Board. On a day-to-day basis, the Investment Manager monitors cash flow and payment obligations carefully and retains sufficient cash and/or liquid assets available to meet its obligations. The Investment Manager also monitors and reports to the Risk Committee on the market liquidity of the portfolio. Cash demands may arise from collateralisation and payment obligations under any Repo, FX margin calls and other payment obligations on hedging agreements and any other derivatives the Company might enter into, drawdowns on investment commitments and other payment obligations such as ongoing expenses.</p> |

PRINCIPAL AND EMERGING RISK FACTORS (CONTINUED)

| Preventable risks (continued) | |
|---|---|
| Principal risks | Impact, tolerance, controls and mitigation |
| <p>Valuation of assets – The risk that the Company's assets are incorrectly valued.</p> | <p>Whilst there might be no immediate direct impact on the Company from incorrect valuation of the Company's assets in its monthly NAV reports and annual and interim financial reports, this is considered to be a high risk area due to the potential impact on the Company's share price and actions that could arise from the provision to the market of materially inaccurate valuation data. Any material valuation error is reported to investors. The Company's accounting policies for the valuation of its assets are described in Note 3 in the financial statements. The Company's NAVs are calculated based on valuations provided independently by JP Morgan PricingDirect for the majority of positions.</p> |
| <p>Investment Manager risks – The risk that the Investment Manager may execute its investment strategy poorly.</p> | <p>This risk is mitigated by the fact that the Investment Manager is part of a very large organisation with deep resources. It manages a number of other funds in the same asset classes as the Company and has a strong track record over a long period in the Company's asset classes.</p> |
| <p>Key person risk – The risk that the Investment Manager resigns, goes out of business or exits the Company's asset classes.</p> | <p>The Investment Manager has large teams and deep resources of skills to replace key individuals.</p> <p>The Investment Manager must give three months' notice before resigning which would help mitigate the disruption caused by any need to appoint a new Investment Manager.</p> |
| <p>Legal and regulatory risk – The risk that changes in the legal and regulatory environment, including changes in tax rules or interpretation, might adversely affect the Company, such as changes in regulations governing asset classes that could impair the Company's ability to hold or re-invest in appropriate assets and lead to impairment in value and or performance of the Company.</p> | <p>The impact of legal and regulatory change, including tax change, could potentially be high. The Investment Manager continuously monitors the legal and regulatory environment in which the Company operates in order to enable the Company to continue to adapt to any legal and regulatory changes by investing in new asset classes and/or new investment structures in response to such changes.</p> <p>The Investment Manager reports to the Board at least semi-annually regarding any relevant upcoming regulatory and tax changes and on an ad hoc basis if appropriate.</p> <p>The Company also has an agreement with Fidal who assist with tax items as and when required.</p> |
| <p>Brexit – Risks arising from the proposed departure of the United Kingdom from the European Union.</p> | <p>In the Investment Manager's opinion, BREXIT could on a mid-term basis, result in some credit deteriorations that could have an adverse impact on the Company's assets, as European CLOs and some of the Bank Balance Sheet transactions are exposed to UK-based credits. The Board are monitoring developments closely with the assistance of the Investment Manager.</p> |

| Emerging Risks | Impact, tolerance, controls and mitigation |
|---|--|
| <p>COVID-19 The risk that the valuation of the Company's assets will be adversely impacted</p> | <p>The impact of the COVID-19 pandemic on financial markets has been to greatly increase volatility in financial markets and to bring severe stress to particular sectors (ie airlines; hospitality; retail). These impacts are already reflected above within market risk, albeit that the cause of market disruption is new.</p> |
| <p>The risk that service providers will be disrupted by partial or full lockdown provisions</p> | <p>The impact of the government response to the COVID-19 pandemic is an emerging risk. Lockdown has meant that service providers have needed to invoke business recovery plans and adjust ways of working. This has been successfully achieved thus far by all service providers but it is an area of ongoing focus.</p> |

CORPORATE GOVERNANCE REPORT

The Company is a Guernsey limited liability company with shares listed on Euronext Amsterdam and the Main Market of the London Stock Exchange. Volta's home member state for the purposes of the EU Transparency Directive is the Netherlands. As such, Volta is subject to regulation and supervision by the AFM, which supervises compliance with the Financial Markets Supervision Act in the Netherlands.

The Company is a member of the AIC and has elected to follow the AIC Code 2019. The AIC Code has been endorsed by the FRC as an alternative means for their members to meet their obligations in relation to the UK Code. The Company is not required to apply the Dutch Corporate Governance Code.

Portfolio composition

The Company publishes its portfolio composition on its website on a monthly basis.

The Board

The Board and its responsibilities

The Board is responsible for the determination of the Company's investment objectives, investment guidelines and dividend policy and has overall responsibility for overseeing the Company's activities. The Investment Manager has full discretion to make and implement decisions concerning the investments and other assets held by the Company within the guidelines and policies set by the Prospectus and amplified by the Board.

During the year under review the members of the Board consisted of five Directors. Refer to pages 81 and 82 for the biographies of each Director which demonstrates their professional knowledge and experience. Atosa Moini resigned with effect from 31 July 2020.

The Company's day-to-day activities are delegated to third parties, including the Investment Manager, the Administrator and the Depositary. The Company has entered into formal agreements with each of its service providers. Under the terms of the Investment Management Agreement, the Investment Manager is responsible for the management of the Company's investment portfolio, subject to the Company's investment guidelines and the overall supervision of the Board. The responsibilities of BNP Paribas Securities Services S.C.A. Guernsey Branch, in respect of its duties as the Administrator, including its duties as Company Secretary, are governed by an Administration Agreement and its duties as current Depositary are set out in a Depositary Agreement.

The Board has established the Management Engagement Committee who monitors the performance of each of its service providers on a continuous basis and reviews their performance on a formal basis at least annually (See Management Engagement Committee section on page 24). The Directors have also reviewed the effectiveness of the risk management and internal control systems, including material financial, operational and compliance controls (including those relating to the financial reporting process) and no significant failings or weaknesses were identified.

Board diversity

During the year under review the Board comprised one female and four male Directors. The Board has due regard for the benefits of experience and diversity in its membership, including gender, and strives to achieve the right balance of individuals who have the knowledge and skillset to aid the effective functioning of the Board and maximise Shareholder return while mitigating the risk exposure of the Company. The Board is committed to ensuring that any vacancies arising are filled by the most qualified candidates who have complementary skills or who possess the skills and experience which fill any gaps in the Board's knowledge or experience irrespective of gender, race or creed. The Company has no employees and therefore there is nothing further to report in respect of gender representation within the Company.

During the year under review, the Board chose to participate in the Board Apprentice Scheme, which aims to give appropriate individuals first hand board experience through observation of the workings and dynamics of boards. The Board selected one board apprentice, who has attended the Company's meetings and received relevant documentation. The Board views this as a valuable exercise in mentoring accomplished individuals to be future directors, fostering equality and developing board culture.

Board independence, composition and tenure

All of the Directors are non-executive. Mr Meader acts as Chairman of the Board and Mr Varotsis acts as the Senior Independent Director. Each of the Directors are independent from the Investment Manager and satisfy the independence criteria as set out in the AIC Code and as adopted by the Board as follows:

- the independent Board members may not be Directors, employees, partners, officers or professional advisors to other funds that are managed by the Investment Manager or managed by any other company in the AXA Group;
- the independent Board members may not be Directors, employees, officers, partners or professional advisors to the Investment Manager or any AXA Group companies;
- the independent Board members may not have a business relationship with the Investment Manager or any AXA Group companies that is material to the members (although they may acquire and hold AXA Group insurance, investment and other products on the same terms as those available to other parties unaffiliated with AXA Group); and
- the independent Board members may not receive remuneration from the Investment Manager or any AXA Group companies (although they may acquire and hold AXA Group insurance, investment and other products on the same terms as those available to other parties unaffiliated with the AXA Group and they may accept commissions or other payments from parties entering into transactions with AXA Group companies as long as those commissions and payments are on market terms and are not material to the members).

CORPORATE GOVERNANCE REPORT (CONTINUED)

Board independence, composition and tenure (continued)

Mr Varotsis has served on the Board for over 14 years. In the Board's opinion, Mr Varotsis continues to demonstrate objective and independent thought processes during his dealings with the rest of the Board and with the Investment Manager, and is therefore considered to be independent, notwithstanding his long service. Indeed, the Board consider that long service, which included the period of the Global Financial Crisis, to add value to the Company's actions during the current market crisis.

The Board reviews at least annually whether there are other factors that potentially affect the independence of Directors or involve meaningful conflicts of interest for them with the Company.

Committees of the Board

Audit, Risk, Nomination, Management Engagement and Remuneration Committees have been established by the Board and each Committee has formally delegated duties, responsibilities and terms of reference, which are published on the Company's website.

Audit Committee

Refer to the Audit Committee's separate report on pages 29 to 30 for details of its composition, responsibilities and activities.

Risk Committee

Refer to the Risk Committee's separate report on page 19 for details of its composition, responsibilities and activities.

Nomination Committee

The Nomination Committee currently comprised Mr Harrison, Mr Le Page, Mr Meader (Chairman), and Mr Varotsis. Ms Moini served on the committee throughout the year ended 31 July 2020. Only Independent Directors may serve on the Nomination Committee. The Committee meets at least once each year and considers the size, structure, skills and composition of the Board. The Committee considers retirements, re-appointments and appointments of additional or replacement Directors.

The Nomination Committee has considered the question of Board tenure and has concluded that there should not be a specific maximum time in position for a director or chairman. Instead, the Committee keeps under review the balance of skills of the Board and the knowledge, experience, length of service and performance of the Directors and focuses on maintaining the right mix of skills and a balance between bringing in new Directors with fresh ideas and preserving corporate knowledge and experience. When recommending new Directors for appointment to the Board, diversity of gender, age, ethnicity and cultural background are taken into consideration in accordance with the Company's diversity policy. In compliance with the AIC Code each Director stands for annual re-election.

During the year, Mr Meader conducted formal performance evaluations on each existing member of the Board and the Board as a whole and Mr Varotsis, as Senior Independent Director, conducted a formal performance evaluation on the Chairman. The evaluations included a discussion and evaluation of any training or development requirements. These performance evaluations were reported to the Committee and it was concluded that each such Board member had demonstrated during their current terms of office that they continued to demonstrate satisfactory independence; positively added to the balance of skills of the Board; has current and relevant expertise; effectively contributed to the Board; and demonstrates commitment to the Company's business. Accordingly the Nomination Committee has recommended that the Board should propose each remaining Director for re-election to the Board at the forthcoming AGM.

Management Engagement Committee

The Management Engagement Committee currently comprised Mr Harrison, Mr Le Page, Mr Meader, Ms Moini and Mr Varotsis. Only Independent Directors may serve on the Management Engagement Committee. The Committee meets at least once each year and the primary purpose of the Committee is to review the performance of, and contractual arrangements with the Investment Manager and other third party service providers of the Company (other than the external auditor) on a periodic basis, with the aim of evaluating performance, identifying any weaknesses and ensuring value for money for the Company's Shareholders.

The Management Engagement Committee was established on the 26 June 2019 and held one meeting during the year ended 31 July 2020 to establish the terms of reference and constitution. At the meeting of the Management Engagement Committee held on 18 September 2020 and the results of the third party service review were considered and discussed with no significant findings or issues.

Remuneration Committee

The Remuneration Committee currently comprised Mr Harrison, Mr Le Page, Mr Meader, and Mr Varotsis (Chairman). Ms Moini served on the committee throughout the year ended 31 July 2020. Only Independent Directors may serve on the Remuneration Committee. The Committee meets at least once each year to review the remuneration of the Directors and make recommendations to the Board in this respect.

The Committee last met on 25 June 2020, and in view of the significant fall in NAV of the Company, recommended a reduction in the amount of fees payable to Directors with effect from 1 August 2020. This recommendation was approved by the Board on the same day and an announcement of the new level of fees was made on 26 June 2020. Further details of the fees paid and payable are given on pages 31 and 32.

Committee composition and terms of reference

The composition of the aforementioned Committees and their terms of reference are kept under periodic review. The terms of reference of each of the Committees require that appointments to the Committee shall be for as long as that person remains as a Director or until otherwise removed, subject always to the satisfactory demonstration of independence as a Board member.

CORPORATE GOVERNANCE REPORT (CONTINUED)

Attendance at scheduled meetings of the Board and its committees

Number of attendances / number of meetings held during the year (where applicable, i.e. where the relevant Director was a Committee member as at the date of the meeting)

| | Board meetings | Audit Committee | Risk Committee | Nomination Committee | Remuneration Committee | Management Engagement Committee |
|------------|----------------|-----------------|----------------|----------------------|------------------------|---------------------------------|
| G Harrison | 13/14 | 6/6 | 4/4 | 1/1 | 2/2 | 1/1 |
| S Le Page | 14/14 | 6/6 | 4/4 | 1/1 | 2/2 | 1/1 |
| P Meader | 14/14 | - | 4/4 | 1/1 | 2/2 | 1/1 |
| A Moini | 13/14 | 6/6 | 4/4 | 1/1 | 2/2 | 1/1 |
| P Varotsis | 13/14 | 6/6 | 4/4 | 1/1 | 2/2 | 1/1 |

Directors' professional development

The Board believes that keeping up-to-date with key credit industry developments is essential for the Directors to maintain and enhance their effectiveness. The Chairman is responsible for agreeing and reviewing with each Director their training and development needs and all Directors receive other relevant training as necessary.

When a new Director is appointed to the Board, they are provided with all relevant information regarding the Company and their duties and responsibilities as a Director. In addition, a new Director will also spend time with representatives of the Investment Manager, Administrator and Company Secretary in order to learn about their processes and procedures, as deemed applicable.

The Board is confident that all its members have the knowledge, ability and experience to perform the functions required of a Director of the Company.

Relationship with the Investment Manager

Under the terms of the Investment Management Agreement, the Investment Manager is responsible for the management of the Company's investment portfolio, subject to the Company's investment guidelines and the overall supervision of the Board.

Currently, the Company's investment guidelines state that "the Company will not engage in portfolio transactions (e.g. the purchase or sale of securities) with the Investment Manager acting on a principal basis or with accounts or funds for which the Investment Manager acts as discretionary investment manager (although this restriction does not prohibit investments by the Company in AXA IM Managed Products)." From time to time and on a case-by-case basis, the Board has permitted the Investment Manager to engage in such transactions in order to prevent this restriction from limiting the Company's ability to take certain investment opportunities. The Investment Management Agreement was amended on 27 March 2018 to clarify that the Company may engage in portfolio transactions (e.g. the purchase or sale of securities) with the Investment Manager acting on a principal basis and cross-trades between the Company and accounts or funds for which the Investment Manager acts as discretionary Investment Manager are authorised provided they comply with the policies and procedures developed by the Investment Manager in order to eliminate or mitigate conflicts of interest and to ensure that the Company is treated in an equitable manner. In order to identify, prevent or manage and follow up any conflict of interest, the Investment Manager has set up a conflict of interest policy that is available on the following website: www.axa-im.fr.

The Board receives and considers reports regularly from the Investment Manager, with ad hoc reports and information supplied to the Board as required. The Investment Manager complies with the Company's investment guidelines and has systems in place to monitor cash flow and the liquidity risk of the Company. The Investment Manager and the Administrator also ensure that all Directors receive, in a timely manner, all relevant management, regulatory and financial information. Representatives of the Investment Manager and Administrator attend each Board meeting as required, enabling the Directors to probe further on matters of concern.

The Board, the Investment Manager and the Administrator operate in a supportive, co-operative and open environment.

Performance of the Investment Manager

The Board, reviews the performance of the Investment Manager on a regular basis and considers whether or not the continued appointment of the Investment Manager is in the best interests of the Company. The continued appointment of the Investment Manager was most recently reviewed and agreed by the Management Engagement Committee on 18 September 2020. If the Company elects to terminate the appointment of the Investment Manager without cause and without giving the Investment Manager two years' advance notice, the Company may do so upon not less than 60 days' prior written notice, but will be required to pay a termination fee to the Investment Manager. The termination fee shall be to compensate the Investment Manager for the Management Fees and Incentive Fees that the Investment Manager might have earned had the appointment of the Investment Manager not been terminated prior to the end of the two-year notice period.

The Board believes that the investment management fees are competitive with other investment companies with similar investment mandates. The key terms of the Investment Management Agreement and the investment management fee charged by the Investment Manager are set out in Note 20.

CORPORATE GOVERNANCE REPORT (CONTINUED)

Board meetings

Primary focus

The Board meets regularly throughout the year and a representative of the Investment Manager is in attendance at all times when the Board meets to review the performance of the Company's investments. The Chairman with assistance from the Investment Manager is responsible for ensuring that relevant financial information is available to the Board and discussed at Board meetings. The Chairman encourages open debate to foster a supportive and co-operative approach for all participants.

The Board applies its primary focus on the following:

- investment performance, ensuring that investment objectives and strategy of the Company are met;
- ensuring investment holdings are in line with the Company's investment guidelines;
- review and monitoring financial risk management, operating cash flows and budgets of the Company;
- review of share buyback and treasury share policy; and
- review and monitoring of the key risks to which the Company is exposed as set out in the Strategic Report.

At each relevant meeting the Board undertakes reviews of key investment and financial data, transactions and performance comparisons, share price and NAV performance, marketing and Shareholder communication strategies, peer group information and industry issues.

Overall strategy

The Board meets regularly to discuss the investment objective, policy and approach of the Company to ensure sufficient attention is given to the overall strategy of the Company. The Board considers the Company's investment objectives, their continuing relevance and whether the investment policy continues to meet those Company's investment objectives.

Monitoring and evaluation of performance of and contractual arrangements with service providers

The Board, with support from the Management Engagement Committee, is responsible for reviewing on a regular basis the performance of the Investment Manager and the Company's other third party service providers together with their anti-bribery and corruption policies to ensure that they comply with the Bribery Act 2010 and the Prevention of Corruption (Bailiwick of Guernsey) Law, 2003 and ensure their continued competitiveness and effectiveness and ensure that performance is satisfactory and in accordance with the terms and conditions of the respective appointments.

As part of the Board's evaluation it reviews on an annual basis the contractual arrangements with the Investment Manager and major service suppliers.

During this review, no material weaknesses were identified and overall the Board confirmed its satisfaction with the services and advice received.

The Directors have adopted a procedure whereby they are required to report any potential acts of bribery and corruption in respect of the Company to BNP Paribas Securities Services S.C.A., Guernsey Branch as the designated manager for GFSC purposes.

Shareholder communications

The main method of communication with Shareholders is through the Half-Yearly Report and Annual Report which aim to give Shareholders a clear and transparent understanding of the Company's objectives, strategy and results. This information is supplemented by the publication of the monthly NAVs of the Company's Ordinary shares on Euronext Amsterdam and the London Stock Exchange.

The Company's website is regularly updated with monthly reports and provides further information about the Company, including the Company's financial reports and announcements. The maintenance and integrity of the Company website is the responsibility of the Directors, which has been delegated to the Administrator. Legislation in Guernsey governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Information published on the internet is accessible in many countries with different legal requirements relating to the preparation and dissemination of financial statements and users of the Company's website are responsible for informing themselves of how the requirements in their own countries may differ from those of Guernsey.

Shareholders are able to contact the Board directly via the Company's dedicated e-mail address (guernsey_bp2s_volta_cosec@bnpparibas.com) or by post via the Company Secretary. Alternatively, Shareholders are able to contact the Investment Manager directly via the contact details as published in the Company's monthly reports. In addition, regular meetings are conducted by the Company's Broker and Investment Manager with Shareholders and other interested parties.

As a consequence, the Board receives appropriate updates from the Company Secretary and from the Investment Manager to keep it informed of Shareholders' sentiment and analysts' views.

CORPORATE GOVERNANCE REPORT (CONTINUED)

Statement of Compliance with the AIC Code of Corporate Governance

The Directors place a high degree of importance on ensuring that high standards of corporate governance are maintained and have therefore chosen to comply with the provisions of the AIC Code of Corporate Governance published in February 2019.

The Board has considered the principles and provisions of the AIC Code. The AIC Code addresses all the principles and provisions set out in the UK Corporate Governance Code, as well as setting out additional provisions on issues that are of specific relevance to the Investment Companies.

The Board considers that reporting against the principles and provisions of the AIC Code provides more relevant information to stakeholders. The AIC Code is available on the AIC website www.theaic.co.uk.

The Company has complied with all the principles and provisions of the AIC Code during the year ended 31 July 2020 except as set out below:

- Director Independence (provision 13)
- New companies (provision 21)

Director Independence (provision 13)

This provision relates to the independence of the non-executive directors.

Mr Varotsis has served on the Board for 14 years and notwithstanding his long service, the Board are of the opinion he continues to maintain his independence and positively added to the balance of the skills on the Board (see Board independence, composition and tenure on page 24).

New Companies (provision 21)

This provision relates to the appointment of the chair and of the board of a new company. As the Company was incorporated during 2006, this provision is not applicable to the Company.

Set out below is where stakeholders can find further information within the Annual Report about how the Company has complied with the various principles and provisions of the AIC Code.

CORPORATE GOVERNANCE REPORT (CONTINUED)

Statement of Compliance with the AIC Code of Corporate Governance (continued)

At the Company's Annual General Meeting on 6 December 2019, significant votes against the re-appointment of the directors, Graham Harrison, Stephen le Page, Paul Meader, Atosa Moini and Paul Varotsis were received. The votes against each resolution equalled to 37.05% of the total voted by proxy.

The Board, through its corporate broker, sought to engage with the dissenting Shareholders to understand their concerns. Unfortunately, despite multiple efforts, the Board and its advisers were unable to gain a response, and on 17 January 2020 released an announcement to the market, inviting the dissenting Shareholders to engage directly through the Chairman, the Senior Independent Director or the corporate broker.

On 11 March 2020, a further announcement was made, noting that the Directors were mindful of their responsibilities under 1.D.4 of the 2018 UK Code of Corporate Governance and principle 5.2.4 of the AIC Code of Corporate Governance, however, no dissenting Shareholders had engaged with the Company, so it was not possible for the Board to understand the reasons behind the votes against at the 2019 AGM, or the Shareholders concerns. Therefore, the Board, to the extent it was able, believes it has discharged its obligations under the codes.

AUDIT COMMITTEE REPORT

The Audit Committee presents its report for the year ended 31 July 2020.

Terms of reference

The Board has established terms of reference for the Audit Committee governing its responsibilities, authorities and composition (as stated in the Corporate Governance Report, the Company applies the AIC Code and accordingly the terms of reference of the Audit Committee comply with the AIC Code). Those terms of reference are available on the Company's website.

Delegation of duties

The Company has no employees as all day-to-day operational functions, including investment management, financial reporting, risk management and internal control, have been outsourced to various service providers. However, the Audit Committee retains full responsibility for the oversight of such service providers.

Composition

The Audit Committee currently comprises Mr Harrison, Mr Le Page (Chairman) and Mr Varotsis. Ms Moini served on the committee throughout the year ended 31 July 2020. Only Independent Directors may serve on the Audit Committee and members of the Audit Committee shall have no links with the Company's Auditor. Mr Le Page has relevant financial experience, having been a partner with PricewaterhouseCoopers in the Channel Islands from 1994 until September 2013, thereby enabling him to fulfil his role as Chairman of the Audit Committee. The other members of the Audit Committee have the knowledge and experience necessary to discharge their duties.

Activities

During the financial year ended 31 July 2020 the Audit Committee met on six occasions and met with the Auditor on two of these occasions. In addition, the Chairman of the Audit Committee has met separately with the Audit Partner responsible for the Company's audit on a number of further occasions. The Audit Committee also conducted due diligence visits to BNP Paribas Securities Services S.C.A, in Jersey, where the Company's day to day administration and accounting is carried out. As in previous years a due diligence visit to the Investment Manager in Paris was planned to take place in June 2020, but due to COVID-19 travel restrictions this was postponed.

Financial reporting risk area

The Audit Committee receives and reviews the Company's annual and interim reports and financial statements, including the reports of the Investment Manager and Auditor contained therein, as applicable. In the Audit Committee's opinion, the principal risk of misstatement in the Company's financial reporting arises from the valuation of its investments. In order to mitigate this risk, the Company's Administrator, overseen by the Committee:

- obtains a copy of the prices supplied by a third party for the purposes of valuing the interim and year end holdings of investments in CLO Debt and of CLO Equity at the year end, and ensures that such prices agree to prices used by the Company to value its investments;
- compares the fund valuations used in the Company's financial reporting to net asset value reports received from the relevant fund administrators and, when audited annual financial statements are available for each fund, compares the relevant net asset value reports to such audited financial statements; and
- In addition, the Committee reviews the Investment Manager's determination of the value of the Company's holdings in other components of the portfolio to ensure that such valuations are reasonable, consistent with the Committee's knowledge of the investments concerned and appropriate for inclusion in the financial statements.

The Audit Committee reviews these items and the Investment Manager's valuation assumptions prior to the publication of the Company's annual and interim reports. In carrying out the review of the valuations included in this report the Board discussed, in detail, the valuation sources and process with relevant staff members at the Investment Manager by video conference given that a physical due diligence visit was not possible. The results of these activities were satisfactory and the Audit Committee has concluded that the investment valuations in this report are fairly stated in accordance with the Company's accounting policies.

Other financial reporting areas

The Audit Committee has also reviewed the Company's accounting policies applied in the preparation of its annual and interim reports together with the relevant critical judgements, estimates and assumptions and has determined that these are in compliance with IFRS and are appropriate to the Company's circumstances.

The Audit Committee has reviewed and challenged the materiality levels applied by the Auditor to both the annual financial statements as a whole and to individual items and is satisfied that these materiality levels are appropriate.

Internal control

The Audit Committee focuses on ensuring that effective systems of internal financial and non-financial control are maintained and works closely with the Company's third-party service providers in this regard. As the Company's accounting functions are delegated to third parties, the Company does not have an internal audit function. The internal control environment of the Company is the product of control systems operated by its third-party service providers, together with the oversight exercised by the Audit Committee. To help satisfy itself as to the existence and efficacy of material controls affecting the Company, the Audit Committee requests its key third-party service providers to complete an annual questionnaire and reviews the responses provided to the questions contained therein. The Audit Committee has also obtained the latest ISAE 3402 Type II controls reports on the Company's Investment Manager and on its Administrator.

AUDIT COMMITTEE REPORT (CONTINUED)

External Audit

The Auditor, KPMG, presents its audit plan to the Audit Committee prior to each such audit. KPMG provided the Audit Committee with an overview of their audit strategy and plan for the year ended 31 July 2020 at a meeting on 24 June 2020. KPMG advised that it considered the valuation of investments to be a key audit matter due to the risks inherent in this area, as in previous years.

KPMG has been the Company's Auditor since 2006, first auditing the annual report for the period ended 31 July 2007, and therefore the audit of this annual report is its fourteenth audit of the Company. The Company has benefited from this service continuity as KPMG has been able to utilise staff with detailed knowledge of the Company's investment portfolio and its operations. While such staff continuity is beneficial to the Company, the Audit Committee has noted, as reported in previous years, the developments concerning the rotation of audit firms and audit tendering promulgated by the UK's FRC and the European Union. Although it should be noted that these developments are not directly applicable to the Company, a tender process for the external audit as at 2020 has been carried out. This date was chosen as 2019 was the last date on which the previous Audit Partner at KPMG was permitted to serve, having completed their five year tenure under the FRC. Further details are given below.

The Audit Committee carried out a detailed assessment of KPMG's performance, service level and quality during the year based upon their 2019 audit. In addition the following factors, amongst others, were considered in respect of each tendering firm as part of the tender process: their demonstration of knowledge of the Company and its investment portfolio; their demonstration of experience of auditing similar investment entities; the expertise and qualifications of the personnel assigned to the audit; their demonstration of quality independence and integrity; and their proposed communications to the Audit Committee. The Audit Committee has concluded that KPMG's performance continues to be highly satisfactory. Consequently, and considering the benefits highlighted in the previous paragraph, the Audit Committee recommended the re-appointment of KPMG as the Company's auditors.

The Audit Committee and KPMG have worked together to ensure that the independence and objectivity of the Auditor is maintained. In its formal communications with the Audit Committee, KPMG confirms its compliance with all applicable independence and ethical requirements, including, among other things, ensuring periodic rotation of the lead audit Partner, who is subject to rotation after five years of service. The Audit Committee has formally reviewed this confirmation, which includes a summary of KPMG's controls to ensure compliance with professional and regulatory standards on independence, and has also noted the level and nature of non-audit services provided during the year 2020, which were nil (2019: Interim review services €43,401). The Audit Committee has concluded from this review, and in light of its knowledge and experience gained through the actual performance of KPMG's work, that the Auditor remains independent and objective.

Non-audit services policy

It is the Board's intention that services other than audit will not be obtained from KPMG, unless there would be considerable advantage to the Company or its Shareholders by so doing. Suitable safeguards against any possible impairment of independence of the Auditor would be implemented in the unlikely event they were retained for such work. The Board has in any event adopted a policy in respect of non-audit services which closely follows that recommended by the AIC.

Conclusion on Annual Report

The Audit Committee has reviewed the Company's financial reports as a whole to ensure that they appropriately describe the Company's activities and to ensure that all statements contained in them are consistent with the Company's financial results and their expectations. Accordingly, the Audit Committee was able to advise the Board that the Annual Report and Audited Financial Statements are fair, balanced and understandable and provide the information necessary for Shareholders to assess the Company's performance, business model and strategy.

Stephen Le Page
Chairman of the Audit Committee
6 November 2020

DIRECTORS' REMUNERATION REPORT

This Report describes how the Board has applied the principles of the AIC Code relating to Directors' remuneration.

Ms Moini resigned from the Board effective 31 July 2020. There were no other changes to the Board during the year ended 31 July 2020. All Directors will stand for reappointment at the forthcoming AGM to be held on the 8 December 2020.

At a Board meeting held on 25 June 2020, and at the recommendation of the Remuneration Committee, the Board considered the recent notable decline in the Net Asset Value of the Company, primarily caused by the impact of the COVID-19 pandemic on CLO markets and the value of the Company's assets. Accordingly, the Board resolved to reduce its fees, with effect from 1 August 2020 as follows:

Table of Directors Remuneration

| Component | Director | Fees to 31 July 2020 (€) | Fees from 1 August 2020 | Purpose of reward |
|-----------------------|---|--------------------------|-------------------------|---|
| Annual fee | Chairman of the Board Paul Meader | €120,000 | €100,000 | For commitments as non-executive Directors |
| | All other Directors | | | |
| | Graham Harrison | €88,000 | €70,000 | |
| | Stephen Le Page | €88,000 | €70,000 | |
| | Atosa Moini ¹ Paul Varotsis | €88,000 €88,000 | - €70,000 | |
| Additional annual fee | Stephen Le Page (Chairman of the Audit Committee) | €17,500 | €15,000 | For additional responsibilities and time commitment |
| | Graham Harrison (Chairman of the Risk Committee) | €6,000 | €5,000 | |
| | Paul Varotsis (Senior Independent Director) | €6,000 | None | |
| Expenses | | Ad hoc | Ad hoc | Reimbursement of expenses paid |

¹ Ms Moini resigned from the Board effective 31 July 2020.

Each Director continues to receive 30% of their Director's fee in the forms of shares. The remaining 70% of the fees are paid quarterly in cash. As previously reported the Directors' remuneration shares are purchased in the secondary market. Thus at current levels of discount between the Net Asset Value per share and the share price, the true cost to the Company is approximately 5% less than the amount quoted above. Should the shares trade at a premium to NAV in the future, the Directors may seek to amend the policy. These fee arrangements will be next reviewed in June 2023.

The Directors are required to retain their shares for at least one year from their respective dates of issuance. During fiscal year 2020 no Director sold any of their Company's shares.

In addition to these fees, the Company reimburses all reasonable travel and other incidental expenses incurred by the Directors in the performance of their duties.

The total amounts of Directors' remuneration for the financial year ended 31 July 2020 are shown in the table below.

| Director | Cash € | Shares ¹ € | Total € | Actual cost to the Company ² € |
|--------------------------------------|----------------|--------------------------|----------------|--|
| G Harrison | 65,800 | 28,200 | 94,000 | 89,856 |
| S Le Page | 73,850 | 31,650 | 105,500 | 100,849 |
| P Meader | 84,000 | 36,000 | 120,000 | 114,710 |
| A Moini | 61,600 | 26,400 | 88,000 | 84,121 |
| P Varotsis | 65,800 | 28,200 | 94,000 | 89,856 |
| Total Directors' remuneration | 351,050 | 150,450 | 501,500 | 479,393 |

¹Director remuneration (equity settlement) based on NAV per share.

²Actual directors' remuneration cost to the Company for the year ended 31 July 2020 is €479,393 (€351,050 cash settlement and €128,343 equity settlement (based on shares purchased on the secondary market - share price)). The difference between total director's remuneration and actual cost to the Company is €22,107, being made up of €22,006 realised gain on directors shares purchased at a discount to NAV (refer to note 18) and €101 transaction fee which forms part of "Other operating expenses" in the Statement of Comprehensive Income (page 41).

DIRECTORS' REMUNERATION REPORT (CONTINUED)

The share element of the Directors' remuneration, amounting to €150,450 was issued as follows:

| Director | Shares purchased in the secondary market during the year | Shares purchased in the secondary market after year end |
|-----------------|---|--|
| G Harrison | 4,128 | 1,201 |
| S Le Page | 4,635 | 1,348 |
| P Meader | 5,271 | 1,533 |
| A Moini | 3,864 | 1,124 |
| P Varotsis | 4,128 | 1,201 |
| Total | 22,026 | 6,407 |

The current Directors continue to hold these shares and no disposals of shares have been made by them to date. All remuneration of the Directors is set out above and there was no performance related compensation. None of the Directors is subject to a service contract under which any compensation would be payable upon loss of office.

Paul Varotsis
Chairman of the Remuneration Committee
6 November 2020

STATEMENT OF DIRECTORS' RESPONSIBILITIES

The Directors are responsible for preparing the Annual Report, including the Directors' Report, and the financial statements in accordance with applicable law and regulations.

The Companies (Guernsey) Law, 2008 (as amended) requires the Directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with IFRS as issued by the IASB and applicable law.

The financial statements are required by law to give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable, relevant and reliable;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to continuing as a going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for keeping proper accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that its financial statements comply with the Companies (Guernsey) Law, 2008 (as amended). They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company and to prevent and detect fraud and other irregularities.

The Directors confirm that they have complied with the above requirements in preparing the financial statements and that to the best of their knowledge and belief:

- this Annual Report includes a fair review of the development and performance of the business and the position of the Company together with a description of the principal risks and uncertainties that the Company faces;
- the Financial Statements, prepared in accordance with IFRS adopted by the IASB and interpretations issued by the IFRIC, give a true and fair view of the assets, liabilities, financial position and results of the Company; and
- the Annual Report and Financial Statements, taken as a whole, provides the information necessary to assess the Company's position and performance, business model and strategy and is fair, balanced and understandable.

This Statement of Directors' Responsibilities was approved by the Board of Directors on 6 November 2020 and was signed on its behalf by:

Paul Meader
Chairman
6 November 2020

Stephen Le Page
Chairman of the Audit Committee

Footnote:

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website, and for the preparation and dissemination of the Company's financial statements. Legislation in Guernsey governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF VOLTA FINANCE LIMITED

Our opinion is unmodified

We have audited the financial statements of Volta Finance Limited (the "Company"), which comprise the statement of financial position as at 31 July 2020, the statements of comprehensive income, changes in shareholders' equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements:

- give a true and fair view of the financial position of the Company as at 31 July 2020, and of the Company's financial performance and cash flows for the year then ended;
- are prepared in accordance with International Financial Reporting Standards; and
- comply with the Companies (Guernsey) Law, 2008.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the Company in accordance with, UK ethical requirements including FRC Ethical Standards, as applied to listed entities. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

Key audit matters: our assessment of the risks of material misstatement

Key audit matters are those matters that, in our professional judgment, were of most significance in the audit of the financial statements and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by us, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In arriving at our audit opinion above, the key audit matter was as follows (unchanged from 2019):

| | The risk | Our response |
|--|---|--|
| Financial assets at fair value though profit or loss ("Investments") | Valuation of investments: | Our audit procedures included: |
| €201,660,400; (2019: €325,525,887) | Basis: | Control evaluation: |
| Refer to page 29 of the Audit Committee Report, note 2.4 accounting policies and notes 3 Determination of fair values and 11 Financial assets at fair value through profit or loss | <p>The Company invests directly or indirectly in a portfolio of Investments representing 97% (2019: 112%) of the Company's net asset value.</p> <p>The fair values of these Investments are based on:</p> <ul style="list-style-type: none"> • reference prices ("Price Quotes") obtained by the Company's Investment Manager from an independent valuation agent ("Valuation Agent"); • discounted cash flow models generated by the Investment Manager (the "Internally Generated Models"); • the net asset values of the Company's holdings in other funds from the third party administrator of such funds; and • the principal amount invested plus accrued income less financing costs. | <p>We assessed the design and implementation of the control over the valuation of the Company's Investments.</p> <p>Evaluation of the Valuation Agent:</p> <p>We independently obtained the Valuation Agent's pricing report. We:</p> <ul style="list-style-type: none"> • assessed the objectivity, capabilities and competence of the Valuation Agent to provide Price Quotes; • assessed the methodology applied by the Valuation Agent in developing fair value Price Quotes against our own expectations; and • agreed the Price Quotes provided by the Valuation Agent to those used in the valuation of the directly held CLOs or used other Price Quotes provided by the Valuation Agent to challenge the Investment Manager's valuation of certain underlying CLO equity positions held in the capitalised manager vehicle ("CMV"). |

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF VOLTA FINANCE LIMITED (CONTINUED)

| The risk | Our response |
|--|---|
| <p>Risk:</p> <p>The valuation of the Company's Investments is considered a significant area of our audit, given that it represents the majority of the net assets of the Company.</p> <p>The valuation risk represents a risk of fraud and error given the level of significant estimates and judgements used, including the impact of COVID-19, in determining the fair value of certain investments valued by the Investment Manager.</p> | <p>Assessing fair value of the Investments</p> <p>For Investments, we performed retrospective testing on realised positions to assess the reliability and accuracy of management's applied valuation methodology and for any evidence of valuation bias.</p> <p>With the support of our KPMG valuation specialist, we:</p> <ul style="list-style-type: none"> held discussions with the Investment Manager to understand and assess the appropriateness of the valuation methodology applied against our own expectations including the impact of COVID-19 on the valuation of Investments; and determined independent reference prices for all CLO debt and a risk based selection of CLO equity positions (including those held within the CMV vehicle) through the use of fundamental cash flow modelling, sourcing key inputs and assumptions used, such as the default rates, discount margins and prepayment rates, from observable market data. For synthetic corporate credits we utilised market accepted modelling techniques sourcing key inputs, such as credit default spreads and recovery rates, from observable market data to determine independent reference prices. <p>For the remaining investments the audit team performed the following substantive procedures, as applicable to each asset class. We:</p> <ul style="list-style-type: none"> tested the discounted cash flow models for integrity, logic and material formula errors. We assessed the reasonableness of key inputs and assumptions to supporting documentation such as valuation reports; recalculated the value attributed to the warehouse position with reference to supporting documentation. We assessed the likelihood of the position converting to a CLO; and obtained independent confirmations from third party administrators of the net asset value of the Company's fund investments as at 31 July 2020 (or latest available date). Where coterminous confirmations were not |

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF VOLTA FINANCE LIMITED (CONTINUED)

| The risk | Our response |
|----------|--|
| | <p>available, we reconciled those confirmations, considering any adjustments for liquidity, using supporting documentation such as call and distribution notices, to the valuations recorded by the Company.</p> <p>Assessing disclosures:</p> <p>We also considered the Company's disclosures (see note 2.1 d) in relation to the use of estimates and judgements in determining the fair value of investments, the Company's investment valuation policies and fair value disclosures (see notes 2.4, 3 and 11) for compliance with IFRS.</p> |

Our application of materiality and an overview of the scope of our audit

Materiality for the financial statements as a whole was set at €3,914,000, determined with reference to a benchmark of net assets of €208,196,330, of which it represents approximately 2.0% (2019: approximately 2.0%).

We reported to the Audit Committee any corrected or uncorrected identified misstatements exceeding €195,000, in addition to other identified misstatements that warranted reporting on qualitative grounds.

Our audit of the Company was undertaken to the materiality level specified above, which has informed our identification of significant risks of material misstatement and the associated audit procedures performed in those areas as detailed above.

We have nothing to report on going concern

The directors have prepared the financial statements on the going concern basis as they do not intend to liquidate the Company or to cease its operations, and as they have concluded that the Company's financial position means that this is realistic. They have also concluded that there are no material uncertainties that could have cast significant doubt over its ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

In our evaluation of the directors' conclusions, we considered the inherent risks to the Company's activities including where relevant the impact of the COVID-19 pandemic and the requirements of the applicable financial reporting framework. We analysed how those risks might affect the Company's financial resources or ability to continue operations over the going concern period, including challenging the underlying data and key assumptions used to make the assessment, and evaluated the directors' plans for future actions in relation to their going concern assessment.

Based on this work, we are required to report to you if we have anything material to add or draw attention to in relation to the directors' statement in Note 2.2 to the financial statements on the use of the going concern basis of accounting with no material uncertainties that may cast significant doubt over the Company's use of that basis for a period of at least twelve months from the date of approval of the financial statements. We have nothing to report in these respects.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF VOLTA FINANCE LIMITED (CONTINUED)

Disclosures of emerging and principal risks and longer term viability

Based on the knowledge we acquired during our financial statements audit, we have nothing material to add or draw attention to in relation to:

- the directors' confirmation within the Viability Statement (pages 11 and 12) that they have carried out a robust assessment of the emerging and principal risks facing the Company, including those that would threaten its business model, future performance, solvency or liquidity;
- the Principal Risks disclosures describing these risks and explaining how they are being managed or mitigated;
- the directors' explanation in the Viability Statement (pages 11 and 12) as to how they have assessed the prospects of the Company, over what period they have done so and why they consider that period to be appropriate, and their statement as to whether they have a reasonable expectation that the Company will be able to continue in operation and meet its liabilities as they fall due over the period of their assessment, including any related disclosures drawing attention to any necessary qualifications or assumptions.

Corporate governance disclosures

We are required to report to you if:

- we have identified material inconsistencies between the knowledge we acquired during our financial statements audit and the directors' statement that they consider that the annual report and financial statements taken as a whole is fair, balanced and understandable and provides the information necessary for shareholders to assess the Company's position and performance, business model and strategy; or
- the section of the annual report describing the work of the Audit Committee does not appropriately address matters communicated by us to the Audit Committee.

We are required to report to you if the Corporate Governance Statement does not properly disclose a departure from the provisions of the UK Corporate Governance Code specified by the Listing Rules for our review.

We have nothing to report to you in these respects.

We have nothing to report on other matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Companies (Guernsey) Law, 2008 requires us to report to you if, in our opinion:

- the Company has not kept proper accounting records; or
- the financial statements are not in agreement with the accounting records; or
- we have not received all the information and explanations, which to the best of our knowledge and belief are necessary for the purpose of our audit.

Respective responsibilities

Directors' responsibilities

As explained more fully in their statement set out on page 33, the directors are responsible for: the preparation of the financial statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF VOLTA FINANCE LIMITED (CONTINUED)

The purpose of this report and restrictions on its use by persons other than the Company's members as a body

This report is made solely to the Company's members, as a body, in accordance with section 262 of the Companies (Guernsey) Law, 2008. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Dermot Dempsey

The Notes on pages 43 to 76 form part of these financial statements.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 JULY 2020

1. GENERAL INFORMATION

Information regarding the Company and its activities is provided in the Executive Summary on page 10.

2. ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to the years presented.

2.1 Basis of preparation

a) Statement of compliance

The financial statements of the Company, which give a true and fair view, and comply with the Companies (Guernsey) Law, 2008 (as amended) and have been prepared in accordance with IFRS issued by the IASB and interpretations issued by the IFRS Interpretations Committee and applicable law.

b) Basis of measurement

These financial statements have been prepared on a historical cost convention basis, except for the revaluation of financial instruments classified at fair value through profit or loss. The methods used to measure fair value are further disclosed in Note 3.

c) Functional and presentation currency

These financial statements are presented in Euro (rounded to the nearest whole Euro), which is the Company's functional and presentation currency. In the Directors' opinion, the Euro is the Company's functional currency as the Company has issued its share capital denominated in Euro and the Company partially hedges the principal of its US Dollar investments such that its principal exposure is to the Euro.

d) Use of estimates and judgements

The preparation of financial statements in accordance with IFRS requires the Board to make judgements, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities and income and expense. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis, and include consideration of the impact of COVID-19. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is included in the following:

- Note 3 – Determination of fair values; and
- Note 19 – Financial risk management.

(e) New standards, amendments and interpretations

The Company applied for the first time IFRS 16 – Leases and IFRIC 23 – Uncertainty over Income Tax Treatments, which became effective on 1 January 2019. As the Company does not participate in material leasing arrangements and the Directors have determined that, as at 31 July 2020, the Company has no uncertain tax positions, these standards/interpretations do not have an impact on the Company's financial statements.

A number of amendments and interpretations to existing standards have been issued during the year ended 31 July 2020 that are not relevant to the Company's operations and therefore have no impact on the Company's financial statements.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

2. ACCOUNTING POLICIES (CONTINUED)

2.1 Basis of preparation (continued)

(f) Standards, amendments and interpretations issued but not yet effective

There are no other standards, amendments to standards and interpretations that are effective or early adopted, that will affect the Company's financial statements.

2.2 Going concern

Statement of going concern

The Directors have considered the state of financial market conditions at the period end date and subsequently. The developing situation with respect to the economic consequences of the COVID-19 pandemic has resulted in considerable volatility in financial markets generally, and has negatively impacted the market value of the Company's Underlying Investments. These falls have also impacted the price of the Company's own shares as the discount to NAV has widened. However, the impact on cash inflows to the Company has not been as large. The Investment Manager has taken appropriate steps to minimise cash out flows through margin calls and other commitments, and the Board has reduced the dividend in proportion to NAV.

Whilst it is of course not possible to accurately predict future cash inflows – the incidence and impact of defaults in the underlying assets is impossible to predict – the Directors have concluded that any reasonably foreseeable fall in cash inflows would not have a material impact on the Company's ability to meet its liabilities as they fall due. Therefore, after making appropriate enquiries, the Directors are of the opinion that the Company remains a going concern and are satisfied that it is appropriate to continue to adopt the going concern basis in preparing the Company's financial statements.

2.3 Foreign currencies

Transactions in foreign currencies are initially translated at the foreign currency exchange rate ruling at the date of the transaction. Monetary assets and monetary liabilities denominated in foreign currencies are retranslated to Euro at the foreign currency closing exchange rate ruling at the reporting date.

Foreign currency exchange differences arising on retranslation of monetary items are recognised in the Statement of Comprehensive Income under the heading of "Net foreign exchange loss, including net gain/(loss) on foreign exchange derivatives, but excluding net foreign exchange gain/(loss) on financial assets at fair value through profit or loss".

For the purposes of foreign currency retranslation, all of the Company's investments are considered to represent monetary items as all such investments are considered to be readily convertible into money, or money's worth.

2.4 Financial instruments

Financial assets

(a) Classification

The Company classifies its investments and derivative financial instruments (as applicable – refer below) as financial assets at fair value through profit or loss. Financial assets also include cash and cash equivalents as well as trade and other receivables which are measured at amortised cost.

(b) Recognition, measurement and derecognition

Financial assets at fair value through profit or loss

While the Company holds the majority of its investments for long periods in order to collect the contractual cash flows arising therefrom, it will not necessarily hold its investments until maturity. Instead the Company will sell such investments if other investments with better risk/reward profiles are identified. In addition, debt investments may be purchased at a significant discount or premium to par. Therefore, in the opinion of the Directors, the Company's business model as defined by IFRS 9 is to manage its investments on a fair value basis. Consequently, the Company is required to classify its investments as financial assets at fair value through profit or loss. Upon initial recognition, attributable transaction costs are recognised in the Statement of Comprehensive Income when incurred. Financial assets at fair value through profit or loss are measured at fair value and changes therein are recognised in the Statement of Comprehensive Income.

Derivatives

The Company holds derivative financial instruments to minimise its exposure to foreign exchange risks and from time to time may also hold derivative financial instruments to manage its exposure to interest rate risks or for economic leveraging. Derivatives are classified as financial assets or financial liabilities at fair value through profit or loss and are initially recognised at fair value; attributable transaction costs are recognised in the Statement of Comprehensive Income when incurred. Subsequent to initial recognition, derivatives are measured at fair value and changes therein are recognised in the Statement of Comprehensive Income. The fair values of derivative transactions are measured at their market prices at the reporting date.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

2. ACCOUNTING POLICIES (CONTINUED)

2.4 Financial instruments (continued)

Financial assets (continued)

(b) Recognition, measurement and derecognition (continued)

Financial assets are initially recognised in the Company's Statement of Financial Position when the Company becomes party to the contractual provisions of a given instrument. Routine purchases and sales of financial instruments are recognised on the trade date. Gains and losses are recognised from that date. Interest accrued as at the date of acquisition is included within the cost of an investment and interest accrued as at the date of sale is included within the sale proceeds for an investment.

Financial assets are derecognised when the contractual rights to cash flows from the assets expire or the Company transfers the financial assets and substantially all of the risks and rewards of ownership have been transferred.

Financial Liabilities

(a) Classification

The Company classifies its loan financing received under the repurchase agreement at amortised cost and derivative financial instruments (as applicable – refer above) as financial liabilities at fair value through profit or loss. Financial liabilities also include interest payable on loan financing and trade and other payables which are measured at amortised cost.

(b) Recognition, measurement and derecognition

Financial liabilities are recognised initially at fair value plus any directly attributable incremental costs of acquisition or issue and are subsequently carried at amortised cost. Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled or expires.

Loan financing received under the repurchase agreement

The Company entered into a repurchase agreement with SG under the terms of which SG provided the Company with finance secured against a portfolio of USD CLO Debt securities. The Repo could be terminated by either party with repayment becoming due within one year. The finance proceeds received were classified as a financial liability at amortised cost and presented within current liabilities. Refer to note 12 for further details on the repayment of the Repo during the year ended 31 July 2020.

2.5 Share capital

Ordinary shares, Class B Ordinary share and Class C Ordinary shares (together the "Ordinary shares")

The Company's Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of Ordinary shares and share options are recognised as a deduction in equity and are charged to the share premium account. The initial set-up costs of the Company were charged to the share premium account.

2.6 Cash and cash equivalents

Cash and cash equivalents include cash in hand, money market funds and deposits held at call with banks. Cash equivalents are short term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

2.7 Net (loss)/gain on financial assets at fair value through profit or loss

The net (loss)/gain on financial assets at fair value through profit or loss comprises interest income on funds invested, dividend income, net realised gains and/or losses on disposal of financial assets, net positive and/or negative changes in the fair value of financial assets at fair value through profit or loss and foreign exchange retranslation gains and/or losses. Income from the CLOs is recognised on an accruals basis.

The net realised gains/(losses) on financial assets at fair value through profit or loss are calculated as the difference between the total sale or redemption proceeds received, including accrued interest if applicable, and the fair value of the relevant financial asset as at the beginning of the financial year or its cost including accrued interest if purchased during the financial year. Interest income is recognised on the due date of such income. Dividend income is recognised in the Statement of Comprehensive Income on the date the Company's right to receive payments is established, which is usually the ex-dividend date.

2.8 Operating expenses

Operating expenses are recognised on an accruals basis and are recognised in the Statement of Comprehensive Income.

2.9 Taxation

The Company has applied for and been granted exemption from liability to income tax in Guernsey under the Income Tax (Exempt Bodies) (Guernsey) Ordinance, 1989 as amended by the Director of Income Tax in Guernsey for the current period. Exemption must be applied for annually and will be granted, subject to the payment of an annual fee, which is currently fixed at £1,200 per applicant, provided the Company qualifies under the applicable legislation for exemption.

It is the intention of the Directors to conduct the affairs of the Company so as to ensure that it continues to qualify for exempt company status for the purposes of Guernsey taxation.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

2. ACCOUNTING POLICIES (CONTINUED)

2.10 Dividends payable

Dividends to Shareholders are recorded through the Statement of Changes in Shareholders' Equity when they are declared to Shareholders.

2.11 Segment reporting

The Directors view the operations of the Company as one operating segment, being investment in a diversified portfolio of structured finance assets. All significant operating decisions are based upon analysis of the Company's investments as one segment. The financial results from this segment are equivalent to the financial results of the Company as a whole, which are evaluated regularly by the chief operating decision-maker (the Board with insight from the Investment Manager).

2.12 Share-based payment transactions

The Directors of the Company each receive 30% of his or her Director's fee for any year in the form of Ordinary shares. The share-based payment awards vest immediately as the Directors are not required to satisfy a specified vesting period before becoming unconditionally entitled to the instruments granted.

Up until the period ended 31 January 2019, the Directors of the Company each received 30% of their fees in respect of any year in the form of newly issued Ordinary shares at a per share price equal to the most recently available NAV. These newly issued Ordinary shares were recognised as a Director fee expense, with a corresponding increase in equity.

Effective from 1 February 2019, whilst the Company's Ordinary shares continue to trade at a discount to the most recently available NAV, the Directors received 30% of their fees in respect of any year in the form of Ordinary shares purchased on the secondary market. The number of Ordinary shares purchased on the secondary market is determined using the most recently available NAV. These purchased Ordinary shares are recognised as a Director fee expense, with no corresponding increase in equity. However a gain will be recognised in the Statement of Changes in Shareholders' Equity, if the most recently available NAV used in calculating the number of Ordinary shares to be purchased on the secondary market is trading at a discount to NAV. The Directors may seek to amend the policy, should the Ordinary shares trade at a premium to NAV in the future, resulting in a loss to the Company.

2.13 Earnings per Share

The Company presents basic and diluted earnings per share ("EPS") data for its Ordinary Shares. Basic and diluted EPS is calculated by dividing the profit or loss attributable to Ordinary Shareholders by the weighted average number of Ordinary Shares outstanding during the period.

2.14 Offsetting

Financial assets and liabilities are offset and the net amount is reported within assets and liabilities where there is a legally enforceable right to set-off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

3. DETERMINATION OF FAIR VALUES

A number of the Company's accounting policies and disclosures require the determination of fair values for financial assets which have been determined based on the following methods. Where applicable, further information about the assumptions made in determining fair values is disclosed in Note 19.

Where securities have been purchased less than one month prior to the relevant reporting date and up-to-date market prices are otherwise unavailable, such securities will be valued at cost plus accrued interest, if applicable. The valuation methodologies applied, which includes the consideration of the impact of COVID-19 on valuations as applicable, to the Company's financial assets other than recently purchased securities for which up-to-date market prices are unavailable are as follows:

- Historically, CLO Equity securities were valued using non-binding quoted market prices from a third party such as the arranging bank or other market participants. With effect from 30 April 2019, the CLO Equity securities are valued using prices obtained from an independent pricing source, JP Morgan PricingDirect. The prices obtained from JP Morgan PricingDirect are derived from observed traded prices where these are available, but may be based upon non-binding quoted prices received by JP Morgan PricingDirect from arranging banks or other market participants, or a combination thereof, where observed traded prices are unavailable.
- CLO Debt securities are valued using prices obtained from an independent pricing source, JP Morgan PricingDirect. The prices obtained from JP Morgan PricingDirect are derived from observed traded prices where these are available, but may be based upon non-binding quoted prices received by JP Morgan PricingDirect from arranging banks or other market participants, or a combination thereof, where observed traded prices are unavailable.
- Fund investments are valued at net asset value.
- Warehouse transactions are valued at the lower of: (i) the principal amount invested plus accrued income net of financing costs; and (ii) the mark-to-market value of the relevant proportion of the underlying portfolio, taking into account the buffer provided by the gross arranger fee compared to the net arranger fee commonly paid in the market, plus accrued income net of financing costs.
- The majority of other investments including CMV are valued on a mark-to-model basis using discounted projected cash flow valuations.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

3. DETERMINATION OF FAIR VALUES (CONTINUED)

Regarding non-binding quoted prices, it is likely that the arranging bank or market participant determines the valuation based on pricing models, which may or may not produce values that correspond to the prices that the Company could obtain if it sought to liquidate such positions. Such valuations generally involve subjective judgements on key model inputs, particularly default and recovery rates, and may not be uniform. Banks and other market participants may be unwilling to disclose all or any of the key model inputs or discount rates that have been used to produce such valuations and it is currently standard market practice to withhold such information. In such circumstances, the valuation continues to be sourced from such arranging bank, or other market participant, despite the lack of information on valuation assumptions.

The Investment Manager reviews the market prices received from third parties for reasonableness against its own valuation models and may adjust the prices where such prices are not considered to represent a reliable estimation of fair value. Such adjustments are very rare, are only made after investigating the reasons underlying any differences identified and are also subject to approval by the Investment Manager's internal risk function. No such adjustments were made to prices as at 31 July 2020. The Investment Manager's fair value calculations for the residual and debt tranche investments in securitisation vehicles are sensitive to the following key model inputs: default rates; recovery rates; and prepayment rates; and reinvestment profiles. The Investment Manager's initial model assumptions are reviewed on a regular basis with reference to both current and projected data. In the case of a material change in the actual key model inputs, the model assumptions will be adjusted accordingly. The discount rate used by the Investment Manager when reviewing the fair value of the Company's portfolio is subject to similar review and adjustment in light of actual experience.

For certain investments targeted by the Company, the secondary trading market may be illiquid or may sometimes become illiquid. As a result, at such times there may be no regularly reported market prices for these investments. In addition, there may not be an agreed industry standard methodology for valuing the investments (e.g. in the case of residual income positions of asset-backed securitisations). In the absence of an active market for an investment and where a financial asset does not involve an arranging bank, or another market participant that is willing to provide valuations on a monthly basis, or if an arranging bank is unwilling to provide valuations, a mark-to-model approach has been adopted by the Investment Manager to determine the valuation. Such pricing models generally involve a number of valuation assumptions, many of which are based on subjective judgements. Key model inputs include (but are not limited to): asset spreads; expected defaults; expected recovery rates; and the price of uncertainty or liquidity through the interest rate at which expected cash flows are discounted. These inputs are derived by reference to a variety of market sources. The method of valuation depends on the nature of the asset.

JP Morgan PricingDirect, provide pricing for directly held CLO Debt and CLO Equity tranches, which in aggregate represent 71.4% as at 31 July 2020 (31 July 2019: 77.8%) of the Company's investment portfolio.

The Company's policy is to publish its NAV on a timely basis in order to provide Shareholders with appropriately up-to-date NAV information. However, the underlying NAVs as at the relevant month-end date for the fund investments held by the Company are normally available only after the Company's NAV has already been published. Consequently, such investments are valued using the most recently available NAV.

As at the date of publication of the Company's NAV as at 31 July 2020, approximately 10.2% (31 July 2019: 12.6%) of the Company's financial assets at fair value through profit or loss comprised investments for which the relevant NAVs as at the month-end date were not yet available.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

3. DETERMINATION OF FAIR VALUES (CONTINUED)

In accordance with Volta's valuation policy, the Company's financial assets at fair value through profit or loss as at 31 July 2020 was calculated using prices received from JP Morgan PricingDirect or other market participants for all assets except for those assets noted below:

| Asset | % of financial assets at fair value through profit or loss as at 31 July 2020 | % of financial assets at fair value through profit or loss as at 31 July 2019 | Valuation methodology |
|--|---|---|--|
| SCC BBS | 8.0% | 9.1% | Discounted projected cash flow model-based valuation using discount rates within a range of 8.0% to 12.0% (31 July 2019: 8.0% to 12.0%), constant default rates within a range of 0.3% to 3.0% (31 July 2019: 0.3% to 2.0%), prepayment rates within a range of 0.0% to 25.0% (31 July 2019: 0.0% to 25.0%) and recovery rates within a range of 51.0% to 63.0% (31 July 2019: 55.0% to 61.0%). |
| Investments in funds (includes ABS Debt, CCC Equity and SCC BBS positions) | 6.6% | 7.2% | Valued using the most recent valuation statements, or capital account statements where applicable, provided by the respective underlying fund administrators, as adjusted for any cash flows received/paid between that date and 31 July 2020 in respect of distributions/calls respectively. |
| SSC REO | 2.9% | 0.0% | Discounted projected cash-flow model-based valuation using the initial yield at acquisition (31 July 2020: 10.8%). Each month, forward cash-flows are updated, sold properties and promissory sales are forced to their sales prices, all based on the latest investor reports and internal hypothesis. The hypothesis used includes (i) Forward HPI (31 July 2020: Y1 HPI as per initial forecast, Y2-Y5: 0%) (ii) Timing (31 July 2020: Initial Business Plan timing plus six-month additional delay for properties not sold, but that should have been, under initial Business Plan). |
| Recently purchased assets | 0.5% | 0.4% | Being purchased within less than one month of the relevant reporting date, these assets were valued at cost. |
| CLO Warehouse | 4.0% | 0.0% | Warehouse transactions are valued at the lower of: (i) the principal amount invested plus accrued income net of financing costs; and (ii) the mark-to-market value of the relevant proportion of the underlying portfolio, taking into account the buffer provided by the gross arranger fee compared to the net arranger fee commonly paid in the market, plus accrued income net of financing costs. |
| ABS Residual | 2.1% | 2.7% | Discounted projected cash flow model-based valuation using a discount rate of 9.0% on the weighted average life of contractual cash flows (31 July 2019: 9.0%) for Fintake European Leasing DAC.(SANCF - 31 July 2019: 10.9%) |
| CLO - CMV | 4.5% | 2.8% | CLO notes are valued using a Discounted Cash Flow model based on cash flow projection considering market and comparable transactions parameters. |
| Total as a percentage of NAV | 28.6% | 22.2% | |

4. PUBLISHED NAV RECONCILIATION AND NAV PERFORMANCE ANALYSIS

The table below shows a reconciliation between the NAV published as at 31 July 2020 and 31 July 2019 and that contained in these financial statements.

| | 31 July 2020 € | 31 July 2019 € |
|---|-------------------|-------------------|
| Published NAV | 208,196,330 | 290,472,128 |
| Adjustments: | | |
| – Prepayments | - | 159,650 |
| – Accruals for expenses not taken into account in the published NAV | - | (41,875) |
| NAV per Statement of Financial Position | 208,196,330 | 290,589,903 |

The following table represents an analysis of NAV performance for the following periods:

| | 1 August 2019 to 31 July 2020 € | 1 August 2018 to 31 July 2019 € |
|--|---------------------------------------|---------------------------------------|
| NAV as at the beginning of the year | 290,589,903 | 305,698,524 |
| Coupons and dividends income | 39,354,931 | 42,014,105 |
| Realised (loss)/gain on sales and redemptions on financial assets at fair value through profit or loss | (7,002,936) | 516,286 |
| Unrealised loss on financial assets at fair value through profit or loss | (87,858,925) | (18,155,433) |
| Net (loss)/gain on financial assets at fair value through profit or loss | (55,506,930) | 24,374,958 |
| Other operating income and financing charges | (2,193,391) | (11,589,671) |
| Operating expenditure | (5,322,892) | (5,701,844) |
| Profit and total comprehensive income | (63,023,213) | 7,083,443 |
| Issue of Ordinary shares to Directors in respect of Directors' fees | 22,006 | 116,970 |
| Dividends paid in cash | (19,392,366) | (22,309,034) |
| NAV as at the end of the year | 208,196,330 | 290,589,903 |

| CLO – USD Debt | 1,408,828 | (2,841,015) | 11,096,059 | 9,663,872 |
| CLO – EUR Debt | (344,730) | 215,342 | 211,713 | 82,325 |
| CLO – CMV | 3 | (640,043) | 964,079 | 324,039 |
| CLO Warehouse | 425,658 | (283,996) | 2,030,343 | 2,172,005 |
| SCC BBS | 213,368 | (395,137) | 1,745,853 | 1,564,084 |
| CCC Equity | (19,620) | (824,286) | 517,450 | (326,456) |
| ABS Residual | - | (1,337,117) | 1,984,866 | 647,749 |
| ABS Debt | - | 681,110 | - | 681,110 |
| | 516,286 | (18,155,433) | 42,014,105 | 24,374,958 |

5. DIRECTORS' REMUNERATION AND EXPENSES

| | 1 August 2019 to 31 July 2020 | 1 August 2018 to 31 July 2019 |
|--|----------------------------------|----------------------------------|
| | € | € |
| Directors' fees (cash element) | 351,050 | 351,050 |
| Directors' fees (equity element, settled during the year) | 112,838 | 112,838 |
| Directors' fees (equity element, settled after the year-end) | 37,612 | 37,612 |
| Directors' expenses | 5,532 | 14,194 |
| | 507,032 | 515,694 |

On 26 June 2020, the Company announced a reduction in the directors' fees payable for the financial year commencing 1 August 2020. Refer to note 22 for further details.

On 10 July, the Company announced that Atosa Moini, a non-executive director of the Company and Chair of the Management Engagement Committee, has notified the Company of her intention to step down from her role on the Board and resign as a Director of the Company with effect from 31 July 2020.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

6. ADMINISTRATION FEES

Sanne acted as Company Secretary, Administrator and Portfolio Administrator for the Company up until 30 October 2018. During the period ended 1 August 2018 to 30 October 2018, Sanne company secretarial, administration, accountancy and portfolio administration services were incurred and billed on a time cost basis in accordance with Sanne's standard fee scales, subject to an annual cap of GBP 220,000 with respect to the activities and responsibilities as set out in the Administration, Secretarial and Portfolio Administration Agreement. In addition, Sanne administration fees totalling €50,536 were incurred with respect to matters outside the scope of the Administration, Secretarial and Portfolio Administration Agreement during the period 1 August 2018 to 31 October 2018.

On 31 October 2018, the Company signed an agreement with BNP Paribas Securities Services S.C.A., Guernsey Branch (the "Administrator") to provide administrative, compliance oversight and company secretarial services to the Company. Under the administration agreement, the Administrator will be entitled to a minimum annual fixed fee for fund administration services and company secretarial and compliance services. These fees are paid monthly in arrears. Ad hoc other administration services are chargeable on a time cost basis. In addition, the Company will reimburse the Administrator for any out of pocket expenses.

During the year ended 31 July 2020, administration fees incurred were €300,971 (31 July 2019: €323,344).

7. AUDIT, AUDIT RELATED AND NON-AUDIT RELATED FEES

The audit fee for the financial year ended 31 July 2020 was €113,667 (year ended 31 July 2019: €104,267). There were no non-audit services provided to the Company by the Auditor or its affiliates during the year (31 July 2019: interim review services at a fee of €43,401).

8. DIVIDENDS

The following dividends were declared and paid during the year ended 31 July 2020 and during the prior year ended 31 July 2019:

Paid and declared during the year ended 31 July 2020:

| Date Declared | Ex-dividend Date | Payment Date | Amount per Ordinary Share € |
|---------------|------------------|--------------|--------------------------------|
| 30/06/2020 | 09/07/2020 | 29/07/2020 | 0.11 |
| 11/05/2020 | 21/05/2020 | 16/06/2020 | 0.10 |
| 21/11/2019 | 28/11/2019 | 27/12/2019 | 0.16 |
| 28/08/2019 | 05/09/2019 | 26/09/2019 | 0.16 |

Paid and declared during the year ended 31 July 2019:

| Date Declared | Ex-dividend Date | Payment Date | Amount per Ordinary Share € |
|---------------|------------------|--------------|--------------------------------|
| 29/05/2019 | 06/06/2019 | 27/06/2019 | 0.15 |
| 28/02/2019 | 07/03/2019 | 28/03/2019 | 0.15 |
| 25/10/2018 | 29/11/2018 | 20/12/2018 | 0.16 |
| 30/08/2018 | 27/09/2018 | 27/09/2018 | 0.15 |

The Directors consider recommendation of a dividend having regard to various considerations, including the financial position of the Company and the solvency test as required by the Companies (Guernsey) Law 2008 (as amended). Subject to compliance with Section 304 of that law, the Board may at any time declare and pay dividends.

9. BASIC AND DILUTED EARNINGS PER ORDINARY SHARE

| | 1 August 2019 to 31 July 2020 € | 1 August 2018 to 31 July 2019 € |
|--|---------------------------------------|---------------------------------------|
| Total comprehensive income for the year | (63,023,213) | 7,083,443 |
| Basic and diluted earnings per Ordinary share | (1.7229) | 0.1937 |
| | Number | Number |
| Weighted average number of Ordinary shares during the year | 36,580,581 | 36,576,362 |

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

10. NAV PER ORDINARY SHARE

| | 31 July 2020 € | 31 July 2019 € |
|---------------------------------------|-------------------|-------------------|
| Net asset value | 208,196,330 | 290,589,903 |
| Net asset value per Ordinary share | 5.6914 | 7.9438 |
| | Number | Number |
| Number of Ordinary shares at year end | 36,580,580 | 36,580,580 |

11. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS

Financial assets at fair value through profit or loss are measured at fair value and changes therein are recognised in Statement of Comprehensive Income.

| | 31 July 2020 € | 31 July 2019 € |
|--|-------------------|-------------------|
| Fair value brought forward | 325,525,887 | 325,703,159 |
| Purchases | 52,334,211 | 125,226,019 |
| Sale and redemption proceeds | (81,337,837) | (107,764,144) |
| Net loss on financial assets at fair value through profit or loss (excluding coupon and dividend income) | (94,861,861) | (17,639,147) |
| Fair value carried forward | 201,660,400 | 325,525,887 |

| | 31 July 2020 € | 31 July 2019 € |
|--|-------------------|-------------------|
| Realised gain on sales and redemptions on financial assets at fair value through profit or loss | 1,749,298 | 2,155,746 |
| Realised loss on sales and redemptions on financial assets at fair value through profit or loss | (8,752,234) | (1,639,460) |
| Unrealised gain on financial assets at fair value through profit or loss | 2,155,196 | 3,629,350 |
| Unrealised loss on financial assets at fair value through profit or loss | (90,014,121) | (21,784,783) |
| Net loss on financial assets at fair value through profit or loss (excluding coupon and dividend income) | 94,861,861 | (17,639,147) |

Investments subject to restrictions due to being pledged as security under the repurchase agreement, as further detailed in Note 12 below.

| | 31 July 2020 € | 31 July 2019 € |
|-----------------------------------|-------------------|-------------------|
| Pledged assets | - | 63,209,778 |
| Unpledged assets | - | 262,316,109 |
| Fair value carried forward | - | 325,525,887 |

Fair value hierarchy

IFRS 13 - Fair Value Measurement requires an analysis of investments valued at fair value based on the reliability and significance of information used to measure their fair value.

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities. Investments, whose values are based on quoted market prices in active markets and are therefore classified within Level 1, include active listed equities. The quoted price for these instruments is not adjusted;
- Level 2 – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information; and
- Level 3 – inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

11. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS (CONTINUED)

Fair value hierarchy (continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability. The determination of what constitutes "observable" requires significant judgement by the Company. The Company considers observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market.

The following tables analyse, within the fair value hierarchy, the Company's financial assets and liabilities (by class, excluding cash and cash equivalents, trade and other receivables and trade and other payables) measured at fair value at 31 July 2020 and 31 July 2019:

| | 31 July 2020 | | | Total € |
|---|--------------|--------------|--------------|-------------|
| | Level 1 € | Level 2 € | Level 3 € | |
| Financial assets at fair value through profit or loss: | - | - | 201,660,400 | 201,660,400 |
| – Securities | - | - | 201,660,400 | 201,660,400 |
| Financial assets at fair value through profit or loss: | - | - | - | - |
| – Derivatives | - | - | - | - |
| Financial liabilities at fair value through profit or loss: | - | (61,916) | - | (61,916) |
| – Derivatives | - | (61,916) | - | (61,916) |
| | - | (61,916) | 201,660,400 | 201,598,484 |

| | 31 July 2019 | | | Total € |
|---|--------------|--------------|--------------|-------------|
| | Level 1 € | Level 2 € | Level 3 € | |
| Financial assets at fair value through profit or loss: | - | - | 325,525,887 | 325,525,887 |
| – Securities | - | - | 325,525,887 | 325,525,887 |
| Financial assets at fair value through profit or loss: | 763,474 | - | - | 763,474 |
| – Derivatives | 763,474 | - | - | 763,474 |
| Financial liabilities at fair value through profit or loss: | - | (272,980) | - | (272,980) |
| – Derivatives | - | (272,980) | - | (272,980) |
| | 763,474 | (272,980) | 325,525,887 | 326,016,381 |

All of the Company's investments are classified within Level 3 as they have significant unobservable inputs and they may trade infrequently. The Company has determined the fair values of its investments as described in Note 3. The sources of these fair values are not considered to be publicly available information. The Company's foreign exchange derivatives held as at the reporting date (open foreign exchange swaps and options positions) are classified within Level 2 as their prices are not publicly available but are derived from information that is publicly available. No interest rate derivative positions were held as at 31 July 2020. The Company's interest rate derivatives held as at 31 July 2019 (open futures and options positions) are classified within Level 1 as their prices are publicly available and they are exchange traded.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

11. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS (CONTINUED)

Financial assets at fair value through profit or loss reconciliation

The following table represents the movement in Level 3 instruments for the year ended 31 July 2020:

| | € |
|---|--------------------|
| Fair value at 1 August 2019 | 325,525,887 |
| Purchases | 52,334,211 |
| Sale and redemption proceeds | (81,337,837) |
| Realised loss on sales and redemptions on financial assets at fair value through profit or loss | (7,002,936) |
| Unrealised loss on financial assets at fair value through profit or loss | (87,858,925) |
| Fair value at 31 July 2020 | 201,660,400 |
| Change in unrealised losses on investments included in Statement of Comprehensive Income for Level 3 investments held | (87,858,925) |

The following table represents the movement in Level 3 instruments for the year ended 31 July 2019:

| | € |
|---|--------------------|
| Fair value at 1 August 2018 | 325,703,159 |
| Purchases | 125,226,019 |
| Sale and redemption proceeds | (107,764,144) |
| Realised gain on sales and redemptions on financial assets at fair value through profit or loss | 516,286 |
| Unrealised loss on financial assets at fair value through profit or loss | (18,155,433) |
| Fair value at 31 July 2019 | 325,525,887 |
| Change in unrealised losses on investments included in Statement of Comprehensive Income for Level 3 investments held | (18,155,433) |

The appropriate fair value classification level is reviewed for each of the Company's investments at each year end. Any transfers into or out of a particular fair value classification level are recognised at the beginning of the year following such re-classification at the fair value as at the date of re-classification. There were no such transfers between fair value classification levels during the year or during the prior year.

Sensitivity analysis

In the opinion of the Directors, the following analysis gives an approximation of the sensitivity of the different asset classes to market risk as at 31 July 2020 that is reasonable considering the current market environment and the nature of the main risks underlying the Company's assets. This sensitivity analysis presents an approximation of the potential effects of events that could have been reasonably expected to occur as at the reporting date. Where valuations were based upon prices received from arranging banks or other market participants, or on a NAV provided by the underlying fund administrator, the sensitivity analysis are not necessarily based upon the assumptions used by such sources as these are not made available to the Company, as explained in Note 3.

The sensitivity of the fair values of most of the assets held by the Company to the traditional risk variables is not the most relevant in the current environment. For example, the sensitivity to interest rates is interdependent with other, more significant, market variables. This analysis reflects the sensitivity to some of the most relevant determinants of the risks associated with each asset class. While every effort has been made to assess the pertinent risk factors, there is no assurance that all the risk factors have been considered. Other risk factors could become large determinants of the fair value.

CLO tranches

Two of the main risks associated with CLO tranches are the occurrence of defaults and prepayments in the underlying portfolio.

The Directors believe it is reasonable to test the sensitivity of these assets to the following reasonably plausible changes to the base case scenarios, which have been derived from historically observed default rates and prepayment rates:

The rate of occurrence of defaults at the underlying loan portfolio level.

The base case scenario is to project the rate of occurrence of defaults at the underlying loan portfolio level at 6.0% for the first 12 months, then 3.0% for the following 6 months and then 2.0% per year which was assumed to approximate the market consensus projected default rate as at 31 July 2020 (base case scenario as at 31 July 2019: 2.0% per year). A reasonably plausible change in the default rate is considered to be an increase to 1.5 times the base case default rate (a decrease to 0.5 times the base case default rate would have approximately an equal and opposite impact, so this is not presented in the table below). For further information, the projected impact of a change in the default rate to 2.0 times the base case default rate is also presented in the table on the following page.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

11. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS (CONTINUED)

Sensitivity analysis (continued)

CLO tranches (continued)

The rate of occurrence of prepayments is measured by the CPR at the underlying loan portfolio level.

The base case scenario is to project a CPR at circa 20% per year for the US and Europe. The Directors consider that reasonably plausible changes in the CPR would be a decrease in the CPR of the underlying loan portfolios from 20% to 10% for the US and Europe. The impact of the CPR is approximately linear, so the impact of an opposite test would be likely to result in an equal and opposite impact. The projected impact of a decrease in CPR from 20% to 10% for the US and Europe is detailed in the below table:

The increase in default rate and the decrease in CPR is combined with an increase in discount margin (DM) at which projected cash flows might be discounted in such scenario. In the below table DM (both for CLO debt and CLO Equity positions) has been widened by 300 bp with the increase in default rate to 1.5 times base case scenario, 500 bp for the 2 times scenario and 150 bp for the stress scenario concerning CPR.

As at 31 July 2020

| Asset class | % of NAV | Impact of an increase in default rate to 1.5x base case scenario | | Impact of an increase in default rate to 2.0x base case scenario | | Decrease in CPR from 20% to 10% for US and Europe | |
|-------------------------|--------------|--|----------------|--|----------------|---|---------------|
| | | Price impact | Impact on NAV | Price impact | Impact on NAV | Price impact | Impact on NAV |
| USD CLO Equity | 25.4% | (42.0)% | (10.7)% | (74.2)% | (18.8)% | (8.1)% | (2.1)% |
| EUR CLO Equity | 21.2% | (41.8)% | (8.8)% | (73.7)% | (15.6)% | (7.3)% | (1.5)% |
| USD CLO Debt | 19.0% | (10.9)% | (2.1)% | (18.9)% | (3.6)% | (3.7)% | (0.7)% |
| EUR CLO Debt | 3.2% | (13.2)% | (0.4)% | (21.0)% | (0.7)% | (4.6)% | (0.1)% |
| All CLO tranches | 68.8% | | (22.0)% | | (38.7)% | | (4.5)% |

As at 31 July 2019

| Asset class | % of NAV | Impact of an increase in default rate to 1.5x base case scenario | | Impact of an increase in default rate to 2.0x base case scenario | | Decrease in CPR from 30% to 15% for US and from 25% to 10% for Europe | |
|-------------------------|--------------|--|---------------|--|----------------|---|---------------|
| | | Price impact | Impact on NAV | Price impact | Impact on NAV | Price impact | Impact on NAV |
| USD CLO Equity | 27.0% | (11.2)% | (3.0)% | (23.9)% | (6.4)% | (0.9)% | (0.2)% |
| EUR CLO Equity | 21.3% | (12.9)% | (2.7)% | (26.8)% | (5.7)% | (2.8)% | (0.6)% |
| USD CLO Debt | 37.6% | 0.0% | 0.0% | 0.0% | 0.0% | 0.0% | 0.0% |
| EUR CLO Debt | 0.9% | 0.0% | 0.0% | 0.0% | 0.0% | 0.0% | 0.0% |
| All CLO tranches | 86.8% | | (5.7)% | | (12.1)% | | (0.8)% |

As presented above, a reasonably plausible increase in the default rate in the underlying loan portfolios would have a negative impact on both the debt and equity tranches of CLOs. A decrease in the CPR would have a negative impact on the debt tranches (as principal payment will occur later) and would negatively impact equity tranches as shown above (in such an event excess cash flows to the equity tranches would last longer).

As the CMV is ramping CLO Equities in the US and Europe, sensitivity of the CMV position should be inferred from US and European CLO Equity sensitivity analysis.

EUR CLO Warehouse

The warehouse return provides a leveraged investment in a loan portfolio that is being purchased and which should be transferred at cost into the CLO. As such, the sensitivity is asymmetric: should the CLO execution occur, Volta will receive the levered carry on the loan portfolio. Should the CLO execution fail to occur (usually linked to loan price volatility), the loan portfolio should be divested either through loan prepayments or active loan sale by the manager. In such context, the Investment Manager believes that the sensitivity of Volta's NAV to the CLO warehouse is: in case of CLO execution, +6bps; in case that CLO execution fails and loan prices drop by 10%: -220bps.

Synthetic Corporate Credit Bank Balance Sheet transactions

The investments within this asset class (representing 12.2% (31 July 2019: 12.8%) of the NAV) are first-loss exposures to diversified portfolios of investment grade and sub-investment grade corporate credits. The Directors consider a reasonably plausible change in then currently assumed default rate to be a decrease to 0.5 times or an increase of 1.5 times. Such a change in defaults would be likely to lead to a 6.2% increase or 6.7% decrease respectively in the average prices of these assets, thereby leading to a 0.8% increase or 0.8% decrease respectively in the NAV (31 July 2019: decrease in historical default rate to 0.5x with a price impact of 3.9% with a 0.4% increase in the NAV; increase in default rate to 1.5x with a price impact of (3.9)% with a 0.4% decrease in the NAV).

11. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS (CONTINUED)

Sensitivity analysis (continued)

Synthetic Corporate Credit Bank Balance Sheet transactions (continued)

As at 31 July 2020

| Asset class | % of NAV | Impact of an increase in assumed default rate to 1.5x | | Impact of a increase in assumed default rate to 0.5x | |
|-------------|----------|---|---------------|--|---------------|
| | | Price impact | Impact on NAV | Price impact | Impact on NAV |
| SCC – BBS | 12.2% | (6.7%) | (0.8%) | 6.2% | 0.8% |

As at 31 July 2019

| Asset class | % of NAV | Impact of an increase in assumed default rate to 1.5x | | Impact of a decrease in assumed default rate to 0.5x | |
|-------------|----------|---|---------------|--|---------------|
| | | Price impact | Impact on NAV | Price impact | Impact on NAV |
| SCC – BBS | 12.8% | (3.9%) | (0.4%) | 3.9% | 0.4% |

Synthetic Credit – Real Estate Owned Transactions

The Portuguese REO investment comprises residential properties through the country, gathered by the bank through the resolution of its NPL processes and then sold on a portfolio basis. The investment is levered through a financing facility. The investment was initially underwritten with a cumulative 4.8% House Price Index (“HPI”). Should the Portuguese HPI drop by 5%, the NAV of the Company would go down by 13bps. Should the HPI increase by 5%, the NAV of the Company would increase by 76bps.

Cash Corporate Credit Equity transactions

As at 31 July 2020, the Company held two investments in this asset class (Tennenbaum Opportunities Fund V and Crescent European Specialty Lending Fund, representing 0.9% and 1.7% of the NAV, respectively) (31 July 2019: Tennenbaum Opportunities Fund V and Crescent European Specialty Lending Fund, representing 1.1% and 1.3% of the NAV, respectively). These assets have exposures to diversified portfolios of investment grade and sub-investment grade corporate credits. The Directors consider that the main risks associated with these assets are the occurrence of defaults in the underlying portfolio and/or the severity of any such defaults.

Tennenbaum Opportunities Fund V has a short remaining life, given that the fund is due to mature during October 2021. More than 62% of its current portfolio comprises unlisted equities (the largest equity representing 23% of the fund) while the remainder comprises corporate debt positions. A sensitivity analysis is difficult to model as most of the value may be derived from the exit price the Tennenbaum Opportunities Fund V investment manager may be able to achieve for the underlying assets. As such, the value of this investment is dependent on default rates and discount rates applied to the corporate debt assets and revenue and EBITDA multiples applied to the equity assets. An increase in default or discount rates may decrease the value of the investment while an increase in revenue and EBITDA multiples may increase the value of the investment.

Crescent European Specialty Lending Fund is fully drawn down and in its amortising period. As the largest investment represents circa 9.5% of its current portfolio, a default of this investment with a 65% recovery rate would lead to a 5 basis points drop in the Company’s NAV.

ABS Residual positions

As at 31 July 2020, the Company held one investment in this asset class (Fintake European Leasing DAC, representing 2.0% of the NAV) (31 July 2019: Fintake European Leasing DAC and SANCF 2014-1 Class E, representing 1.9% and 1.0% of the NAV, respectively).

For Fintake European Leasing DAC, the main risk associated with this position is considered to be the level of credit losses in the underlying French leases collateral.

In prior year for SANCF 2014-1 Class E, the main risk associated with this position was considered to be the rate of occurrence of prepayments in the underlying Spanish auto loans collateral. The Directors considered that an increase in the CPR at the underlying portfolio level from 10% to 20% was reasonably plausible and would be likely to decrease the price of the asset by 1.5% and decrease the Company NAV by an insignificant amount.

ABS Debt positions

As at 31 July 2020, the Company held one investment in this asset class (St Bernard Opportunity Fund I) (31 July 2019: one, St Bernard Opportunity Fund I) representing 2.0% of the NAV (31 July 2019: 3.1%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

11. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS (CONTINUED)

Sensitivity analysis (continued)

ABS Debt positions (Continued)

St Bernard Opportunity Fund I is a complex fund and it has not been feasible for the Company to determine a simple stress test that could be implemented. Nevertheless, for the period from the inception of this fund to 31 July 2020, the average annual volatility has been 5.32% (31 July 2019: 3.4%) for an annualised performance of 9.56% (31 July 2019: 10.6%) (the respective figures over the last twelve months were volatility of 9.52% (31 July 2019: 1.5%) for an annual performance of (1.08)% (31 July 2019: 4.8%)). The Investment Manager believes that this gives a reasonable indication of the risk profile of this investment.

12. LOAN FINANCING RECEIVED UNDER REPURCHASE AGREEMENT

| | 31 July 2020 | 31 July 2019 |
|---|--------------|--------------|
| | € | € |
| Loan financing received under repurchase agreement, opening | 35,945,363 | 42,715,000 |
| Loan financing repaid | (36,837,437) | (8,816,165) |
| Proceeds received from additional loan financing | - | - |
| Foreign exchange movement | 892,074 | 2,046,528 |
| Loan financing received under repurchase agreement, ending | - | 35,945,363 |

The Company entered into a repurchase agreement under the terms of which the counterparty SG, provided the Company with finance through the purchase of a portfolio of USD CLO Debt securities which were subject to repurchase each quarter. Interest was payable on amounts drawn under the Repo at the relevant three-month USD Libor rate plus a margin of 1.50%. The Company had a Repo drawdown balance of \$40.0 million as at 31 July 2019. On the 13 December 2019, the Company reduced the loan financing under the Repo from \$40.0 million to \$35.0 million. As a consequence of market uncertainties, mainly due to COVID-19, the Company sought to mitigate its liquidity risk by reducing the Repo drawdown balance to €nil. On the 8 May 2020, the loan financing under the Repo was fully repaid and terminated.

Interest incurred under the Repo during the financial year totaled €818,655 (31 July 2019: €1,633,017) and accrued unpaid interest under the Repo as at 31 July 2020 was €nil (as at 31 July 2019: €185,345).

Collateral delivered under Repo

As at 31 July 2020 there was no collateral provided by the Company as the Repo position was terminated. As at 31 July 2019, the collateral comprised USD CLO Debt securities with an aggregate market value of €63.2 million (\$70.3 million).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

13. DERIVATIVES AT FAIR VALUE THROUGH PROFIT OR LOSS

Foreign exchange swaps and options are held to hedge some of the currency exposure generated by US Dollar assets held by the Company (see note 19). The hedge has been structured taking into account the fact that derivative positions, such as simple foreign exchange swaps, could cause the Company to require cash to fund margin calls on those positions. Considering this, the Company decided to use foreign exchange call and put options to limit the liquidity risk that could be created in the event of significant margin calls. As a consequence of this limitation, there is no certainty that hedging some of the currency exposure generated by US Dollar assets could continue to be performed in the future in case of high volatility in the US Dollar/Euro cross rate. Foreign exchange derivatives are entered into with Crédit Agricole, Merrill Lynch and Citi Bank, with a margin requirement being applicable upon revaluation of such transactions, as outlined in the applicable master offset agreements. The balance on the margin account is included within the total value of the foreign exchange derivative transactions open as at the period-end as presented in the Condensed Statement of Financial Position. Interest rate derivatives may be entered into with Goldman Sachs.

As at 31 July 2020, there were four (31 July 2019: seven) forward foreign exchange positions, fourteen (31 July 2019: sixteen) foreign exchange option positions, and nil (31 July 2019: two) interest rate derivative positions open.

FOR THE YEAR ENDED 31 JULY 2020

16. SHARE CAPITAL

| | 31 July 2020 Number of shares | 31 July 2019 Number of shares |
|---|----------------------------------|----------------------------------|
| Ordinary shares of no par value each | Unlimited | Unlimited |
| Class B convertible Ordinary share of no par value | 1 | 1 |
| Class C non-voting convertible Ordinary shares of no par value each | Unlimited | Unlimited |

With respect to voting rights at general meetings of the Company, the Ordinary shares and Class B share confer on the holder of such shares the right to one vote for each share held, while the holders of Class C shares do not have the right to vote. Each class of share ranks pari passu with each other with respect to participation in the profits and losses of the Company.

The Class B share is identical in all respects to the Company's Ordinary shares, except that it entitles the holder of the Class B share (an affiliate of AXA S.A.) to elect a single Director to the Company's Board of Directors. At such time as the holdings of the AXA Group investors decline to less than 5% of the Company's equity capitalisation (with the Class B share and the other issued and outstanding Ordinary shares and Class C shares taken together), the Class B share shall be converted to an Ordinary share.

There are no Class C shares currently in issue and there is currently no mechanism by which any Class C shares can be issued in the future (31 July 2019: Nil Class C shares held).

Issued and fully paid

| | Number of Ordinary shares in issue | Number of Class B shares in issue | Number of Class C shares in issue | Total number of shares in issue | Warrants: potential number of shares |
|-------------------------------------|---|--|--|---------------------------------------|---|
| Balance at 31 July 2018 | 36,566,636 | 1 | - | 36,566,637 | - |

| Balance at 31 July 2019 | 36,580,580 | 1 | - | 36,580,581 | - |
| Issued to Directors during the year | - | - | - | - | - |
| Balance at 31 July 2020 | 36,580,580 | 1 | - | 36,580,581 | - |

A total of nil (31 July 2019: 13,944) Ordinary Shares were issued to Directors during the year.

On 5 April 2019, the Company announced that with effect from the quarter ended 30 April 2019 the part-payment of Directors' fees in shares would be satisfied through the purchase of shares on the secondary market rather than the issue of new shares. The Company purchased the following ordinary shares on the secondary market during the year ended 31 July 2020:

- 1 August 2019: 4,760 Ordinary shares at an average price of €7.02 per share.
- 1 November 2019: 4,891 Ordinary shares at an average price of €6.64 per share.
- 3 February 2020: 4,942 Ordinary shares at an average price of €6.60 per share.
- 1 May 2020: 7,433 Ordinary shares at an average price of €4.00 per share.

Ordinary shares purchased on the secondary market during the year ended 31 July 2019:

- 1 August 2019: 4,760 Ordinary shares at an average price of €7.02 per share.

As at 31 July 2020 and 31 July 2019, the Company held no treasury shares. Please refer to page 17 for information on Director holdings in the Company's Ordinary shares.

17. SHARE PREMIUM ACCOUNT

| | Ordinary shares € | Class B share € | Class C shares € | Total € |
|-------------------------------------|----------------------|--------------------|---------------------|------------|
| Balance at 31 July 2018 | 35,695,308 | - | - | 35,695,308 |
| Issued to Directors during the year | 112,812 | - | - | 112,812 |
| Balance at 31 July 2019 | 35,808,120 | - | - | 35,808,120 |
| Issued to Directors during the year | - | - | - | - |
| Balance at 31 July 2020 | 35,808,120 | - | - | 35,808,120 |

The share premium account represents the issue proceeds received from, or value attributed to, the issue of share capital, except for the share premium amount of €285,001,174 arising from the Company's initial issue of share capital upon its IPO, which was transferred to other distributable reserves on 26 January 2007, following approval by the Royal Court of Guernsey (see Note 18).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

18. RESERVES

| | Other distributable reserves € | Accumulated gain € |
|---|--------------------------------------|-----------------------|
| At 31 July 2018 | 100,928,524 | 169,074,692 |
| Total comprehensive income for the year | - | 7,083,443 |
| Realised gain on Director shares purchased at a discount to NAV | 4,158 | - |
| Dividends paid in cash | (22,309,034) | - |
| At 31 July 2019 | 78,623,648 | 176,158,135 |
| Total comprehensive loss for the year | - | (63,023,213) |
| Realised gain on Director shares purchased at a discount to NAV | 22,006 | - |
| Dividends paid in cash | (19,392,366) | - |
| At 31 July 2020 | 59,253,288 | 113,134,922 |

Other distributable reserves represent the balance transferred from the share premium account on 26 January 2007, less dividends paid. The initial purpose of this reserve was to create a reserve from which dividend payments could be paid under the law prevailing at that time and the Company's Articles. However, the Companies (Guernsey) Law 2008 (as amended) became effective from 1 July 2008. Under this law, dividends may now be paid from any source, provided that a company satisfies the relevant solvency test as prescribed under the law and the Directors make the appropriate solvency declaration.

The accumulated gain reserve represents all profits and losses recognised through the Statement of Comprehensive Income to date.

19. FINANCIAL RISK MANAGEMENT

The main risks arising from the Company's financial instruments are market risk, valuation risk, interest rate risk, currency risk, credit and counterparty risk, concentration risk and liquidity risk.

Market risk

Market risk is the risk of changes in market prices, such as foreign exchange rates, interest rates, credit spreads and equity prices, affecting the Company's income and/or the value of its holdings in financial instruments.

The Company's exposure to market risk is reflected through movements in the value of its investments.

The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimising return. The Company's strategy for the management of market risk is driven by its investment objective to preserve capital across the credit cycle and to provide a stable stream of income to its Shareholders through dividends by investing in a variety of assets selected for the purpose of generating overall stable and predictable cash flows. The Company's exposure to market risk is managed on a daily basis by the Investment Manager.

The Company seeks to mitigate market risk by pursuing where possible a diversified investment strategy involving direct and indirect investments in a number of asset types that naturally tend to involve a diversification of underlying market risk. The Company uses derivatives to manage its exposure to foreign currency risks and may also use derivatives from time to time to manage its exposure to interest rate and credit risks. The instruments used include interest rate swaps, forward contracts, futures and options. The Company does not apply hedge accounting. The Company's market positions are reviewed on a quarterly basis by the Board of Directors.

Valuation risk

Valuation risk is the risk that the investments are incorrectly valued and do not reflect the true value of the investments. The markets for many of the Company's investments, including residual income positions, are illiquid. Accordingly, many of the Company's investments are or will be illiquid. In periods of market uncertainty or distress, the markets for the Company's investments may become increasingly illiquid or even cease to function effectively for a period of time. In addition, investments that the Company may purchase in privately negotiated (also called "over-the-counter" or "OTC") transactions may not be registered under relevant securities laws or otherwise may not be freely tradable, rendering them less liquid than other investments. Tax or other attributes of securities or loans in which the Company invests may make them attractive to only a limited range of investors. There may also be contractual or other restrictions on transfers of the Company's investments. As a result of these and other factors, the Company's ability to vary its portfolio in a timely fashion and to receive a fair price in response to changes in economic and other conditions may be limited and the Company may be forced to hold investments for an indefinite period of time or until their maturity or early redemption.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

19. FINANCIAL RISK MANAGEMENT (CONTINUED)

Valuation risk (continued)

Furthermore, where the Company acquires investments for which there is not a readily available market, the Company's ability to obtain reliable information about the resale value of such investments or the risks to which such investments are exposed may be limited. Illiquidity contributes to uncertainty about the values ascribed to investments when NAV determinations are made, which can cause those determinations to vary from amounts that could be realised if the Company were to seek to liquidate its investments. The Company could also face some difficulties when collecting reliable information about the value of its assets if some or all of the participants in the relevant market were to experience significant business difficulties or were to suspend their market activities. This could affect both the timing and the process for assessing the value of the Company's investments.

Although the Company and its agents are able to refer to reported OTC trading prices and prices from brokers when valuing its investments, for most investments the Company's pricing sources frequently need to rely on financial pricing models based on assumptions concerning a number of variables, some of which involve subjective judgements and may not be uniform.

If the Company were unable to collect reliable information about the value of its assets the Investment Manager has agreed to provide a monthly valuation based on pricing models. The Company engages an independent third party to review semi-annually the main assumptions employed by the Investment Manager and to report the fairness and reasonableness of those assumptions and valuations to the Board.

Interest rate risk

Changes in interest rates can affect the Company's net interest income, which is the difference between the interest income earned on interest earning investments and the interest expense incurred on interest bearing liabilities. Changes in the level of interest rates can also affect, among other things, the Company's ability to acquire loans and investments, the value of its investments and the Company's ability to realise gains from the settlement of such assets.

The CLO Equity tranches held by the Company would be negatively impacted even by a modest increase in Euribor rates as these assets currently benefit from the existence of Euribor floors attached to underlying loans. Conversely, any increase in such interest rates would benefit the Company's floating rate assets.

The Company may enter into hedging transactions for the purposes of efficient portfolio management, where appropriate, to protect its investment portfolio from interest rate fluctuations. These instruments may be used to hedge as much of the interest rate risk as the Investment Manager determines is in the best interests of the Company, given the cost of such hedges. The Company may bear a level of interest rate risk that could otherwise be hedged when the Investment Manager believes, based on all relevant facts, that bearing such risk is advisable.

Interest rate risk is analysed by the Investment Manager on a daily basis and is communicated to and monitored by the Board through the quarterly business report.

It should be noted that the Company does not present an effective interest figure for its investments held and therefore does not calculate the effective interest rates applicable to its investments. In the Directors' opinion, it is not feasible to accurately estimate the effective interest rates applicable to many of the Company's financial assets. In the Directors' opinion, market interest rate risk on the Company's investments is not considered to be material when compared to the risk factors that are considered to be significant, as described in the sensitivity analyses given earlier.

Currency risk

Currency risk is the risk that the values of the Company's assets and liabilities are adversely affected by changes in the values of foreign currencies by reference to the Company's functional currency.

The Company's accounts are presented in Euro, the Company's functional and reporting currency, while investments are made and realised in both Euro and other currencies. Changes in rates of exchange may have an adverse effect on the reported value, price or income of the investments. A change in foreign currency exchange rates may adversely impact reported returns on the Company's non-Euro denominated investments. The Company's principal non-Euro currency exposures are currently expected to be the US Dollar, Sterling and Swiss francs, but this may change over time.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

19. FINANCIAL RISK MANAGEMENT (CONTINUED)

Currency risk (continued)

The Company's policy is to partially hedge its currency risk on an overall portfolio basis. The Company may bear a level of currency risk that could otherwise be hedged where the Investment Manager considers that bearing such risk is advisable or is in the best interest of the Company considering the liquidity risk that is attached to any derivative contracts that could be used (e.g. margin calls on those contracts). The Investment Manager had put into place arrangements to hedge into Euro part of the US Dollar exposure associated with the US Dollar-denominated assets. In order to reduce the risk of having to post a potentially unlimited amount of cash with respect to forward Euro/US Dollar foreign exchange swaps, the Investment Manager has capped and floored those amounts using short to mid-term options. Consequently, there is no guarantee that hedging the currency exposure generated by US Dollar assets can continue to be performed in the future if volatility in the US Dollar/Euro cross rate is very high.

Currency risk, and any associated liquidity risk, is analysed by the Investment Manager on a daily basis and is communicated to and monitored by the Board through the quarterly business report.

| <i>Currency risk profile as at 31 July 2020</i> | Denominated in EUR € | Denominated in USD € | Denominated in GBP € | Denominated in CHF € | Total € |

Credit counterparty risk

Credit and counterparty risk is the risk of financial loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The carrying amounts of financial assets best represent the maximum credit risk exposure at the reporting date. At the reporting date, the Company's financial assets exposed to credit risk are financial assets at fair value through profit or loss, open foreign exchange contracts, interest rate derivatives and cash and cash equivalents. The Company was exposed to counterparty risk regarding the performance of SG under the terms of the Repo. The aggregate value of the Company's securities pledged as security under the Repo which are therefore exposed to such counterparty risk is now nil as disclosed in Note 12.

The positions in the CLO asset class are residual or mezzanine debt tranches of CLOs, which may suffer losses depending upon the level of losses that occur in the underlying loan portfolio and the rate at which such losses might occur. Residual tranches are the first tranche in a CLO capital structure that would suffer losses, followed by mezzanine tranches according to their relative levels of seniority. However, being term leveraged structures at a fixed margin, it is possible for residual tranches to generate more excess payments through re-investments when markets are under stress for relatively short periods than under normal circumstances. A residual position on a CLO also gives access to the amount that remains in the structure once the debt tranches are paid back (at maturity if the normal process of deleveraging the structure takes place, sooner if the deal is called by the residual holders). It can be possible to measure the principal amount of the underlying loan portfolios (defaulted loans are valued at their market value) against the principal amount of the outstanding CLO Debt tranches at any point in time.

CLO residual positions are negatively exposed to an increase in default rates, to an increase in the percentage of assets rated CCC or below and to a significant decrease in underlying loan prices. Nonetheless, the spread tightening impact can also be mitigated through a refinancing or reset of the CLO liabilities at any point in time after the end of the CLO non-call period.

As at 31 July 2020, the Company directly held 17 positions in debt tranches of CLOs (31 July 2019: 32) accounting for 22.1% of Volta's end-of-year NAV (31 July 2019: 39.1%). The investments in debt tranches of CLOs have been in tranches initially rated between BB (second loss position) and BBB (generally third loss position). These positions, as for the residual holdings, have cash flows that are sensitive to the level of defaults and the percentage of assets rated CCC or lower in the underlying loan portfolio. Nevertheless, these tranches are structured to be able to absorb a higher level of defaults in the underlying loans portfolio than residual holdings, given their second, third and even higher loss ranking.

Each CLO Debt asset held by the Company, at the time of purchase, was expected to repay its principal in full at maturity and was expected to be able to sustain a certain level of stress. Depending on the ability to find opportunities in the market and on the timing of the purchases, the Company has been able to purchase assets with different levels of initial subordination and IRR.

As at the reporting date, the Company held one (31 July 2019: nil) CLO Warehouse investments.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

19. FINANCIAL RISK MANAGEMENT (CONTINUED)

Credit counterparty risk (continued)

The Company is also exposed to a global Capitalised Manager Vehicle which is exposed to similar risks as CLO Equity and Warehouse exposures. The targeted return from the investment is in the mid to high-teens for a six to nine-year weighted average life. In addition to the first-loss Warehouse and CLO Equity risks defined above, it is also exposed to liquidity risk and to regulation risk given that a change in regulation in the US or in Europe could alter the business purpose of the entity and imply either a limited drawing of the Company's committed capital or even certain levels of restructuring costs. As it is capitalising a single entity, it is also incorporating correlation risks between the various sub-investments as well as a strong reliance on key people and processes inside each CLO manager's entity.

The ABS positions comprise two (31 July 2019: three) different investments: a position in a fund mainly investing in US RMBS debt tranches (St Bernard Opportunity Fund I), representing 49.4% (31 July 2019: 51.0%) of the fair value of this asset class and 2.0% (31 July 2019: 3.1%) of the NAV; and one French leases ABS Residual position (Fintake European Leasing DAC), representing 50.6% (31 July 2019: 31.8%) of the fair value of this asset class and 2.0% (31 July 2019: 1.9%) of the NAV. In the prior year, a junior debt position was held in a Spanish auto loan securitisation (SANCF 2014-1 Class E), representing 17.2% of the fair value of this asset class and 1.0% of the NAV

The COVID-19 crisis that started in March 2020 has negatively impacted the valuation of the Company's assets during the year, including the ABS positions. However, its impact remained relatively modest on ABS, with limited marginal credit risk on the ABS positions.

The Cash Corporate Credit assets include two positions: one loan fund (Tennenbaum) and one private debt fund (Crescent). The Synthetic Corporate Credit bucket comprises first-loss positions in credit portfolios, representing 12.3% (31 July 2019: 12.8%) of the NAV. There have not been any credit event on loan fund positions during the year. It is expected that the COVID-19 crisis will cause, a loss of the equivalent of one year's revenue.

As previously stated, the Company is subject to credit risk with respect to its investments. The Company and its Investment Manager seek to mitigate credit risk by actively monitoring the Company's portfolio of investments and the underlying credit quality of its holdings. The Company's multi-asset-class investment strategy is designed to diversify credit risk by pursuing investments in assets that are expected to generate cash flows from underlying portfolios that have, in aggregate at the time of purchase, diverse characteristics such as low historical default rates and/or high expected recovery rates in the event of default and/or significant granularity.

Prior to the transfer of Depositary to BNP on 1 August 2018, substantially all of the cash held by the Company at the reporting date was held at State Street Bank and Trust Company in the name of State Street Custody Services (Guernsey) Limited. On 1 August 2018, the Company appointed BNP as Depositary and, subsequently, the majority of the Company's cash was held with BNP. Bankruptcy or insolvency by BNP may cause the Company's rights with respect to the cash held there to be delayed or limited. In order to limit the Company's exposure to any single counterparty, the Board has requested that the Investment Manager should avoid holding cash balances in excess of 6% of GAV at BNP, or in excess of 3% of GAV at any other single counterparty, other than on a short-term basis if necessary. Cash in excess of this level for any significant length of time is invested in short-term money market funds, short-term government treasury bills or other cash equivalents.

The Company may invest in forward foreign currency transactions, foreign currency options, total return swaps, credit default swaps and other derivatives with various financial institution counterparties for the purposes of hedging or securing investment exposure to portfolios of diverse underlying reference obligations. The Company is exposed to counterparty credit risk in respect of these transactions. The Investment Manager employs various techniques to limit actual counterparty credit risk, including the requirement for cash margin payments or receipts for foreign currency derivative transactions on a weekly basis, or more frequently during years of high volatility. As at and during the financial year end, the Company's derivative counterparties were Crédit Agricole Corporate, Merrill Lynch International and Citi Bank.

The Company monitors its counterparty risk by monitoring the credit ratings of Crédit Agricole, Merrill Lynch International, Citi Bank, Goldman Sachs, and BNP Paribas S.A. as reported by Standard & Poor's, Moody's or Fitch, and analyses any information that could imply deterioration in the financial position of its counterparties.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

19. FINANCIAL RISK MANAGEMENT (CONTINUED)

Credit risk and counterparty risk (continued)

The current long-term issuer credit ratings assigned to each of these counterparties as at 31 July 2020 are as follows:

| Counterparties | Moody's | Standard & Poor's | Fitch |
|-----------------------------|----------------|-------------------|----------------|
| Crédit Agricole | Aa3 (positive) | A +(stable) | A+ (stable) |
| Merrill Lynch International | - | A+ (stable) | AA- (stable) |
| Citi Bank | Aa3 (stable) | A+ (stable) | A+ (negative) |
| Goldman Sachs | A1 (stable) | A+ (stable) | A (Negative) |
| BNP Paribas S.A. | Aa3 (stable) | A+ (Negative) | AA- (Negative) |

The Company's investment guidelines establish criteria for certain investment exposures and synthetic arrangements entered into by the Company that are intended to limit the investment risk of the Company. Shareholders should, however, be prepared to bear the risks of direct and indirect investment in special purpose structured finance vehicles and arrangements, which often involve reliance on techniques intended to achieve bankruptcy remoteness and protection through security arrangements that may not function as intended in unexpected scenarios.

Risk relating derivatives

The Company's transactions using derivative instruments and any credit default or total return swap arrangements or other synthetic investments entered into by the Company or any of its funding vehicles may involve certain additional risks, including counterparty credit risk. Moreover, as referred to in the preceding paragraph, the Company has established criteria for synthetic arrangements that are intended to limit its investment risk. Certain derivative transactions into which the Company may enter may be sophisticated and innovative and as a consequence may involve tax or other risks that may be misjudged.

Concentration risk

Concentration risk is risk of loss in value of an investment portfolio if an individual or group of exposures move together in an unfavorable direction. The Company may be exposed at any given time to any one corporate credit, counterparty, industry, region, country or asset class or to particular services or asset managers (in addition to the Investment Manager). As a result it may therefore be exposed to a degree of concentration risk. However, the Board considers that the Company is, in general, very diversified and that concentration risk is therefore not significant.

Nevertheless, the Company monitors the concentration of its portfolio and from time to time and, as long as market opportunities and liquidity permit, might rebalance its investment portfolio accordingly, although there can be no assurance that it will succeed. This is because in a stressed situation, which may be characterised by high volatility in the value of the Company's assets and/or significant changes in the market expectation of default rates and/or significant changes in the liquidity of its assets, the ability of the Company to mitigate its concentration risk could be significantly affected.

As the Company invests primarily in structured finance assets, it is exposed to concentration risks at two levels: direct concentration risk from the Company's positions in particular deals/transactions and indirect concentration risk arising from the exposures underlying those positions.

A measure of the direct exposure to certain asset types as at the reporting date is given below:

| Main asset class | Detailed classification | As at | As at |
|----------------------------|---|------------------|------------------|
| | | 31 July 2020 | 31 July 2019 |
| | | % (based on NAV) | % (based on NAV) |
| CLO | USD CLO Equity | 25.6 | 27.3 |
| | EUR CLO Equity | 21.7 | 21.3 |
| | USD CLO Debt | 19.2 | 38.2 |
| | EUR CLO Debt | 3.2 | 0.9 |
| | CMV | 4.4 | 3.2 |
| | EUR CLO Warehouse | 3.8 | - |
| | USD CLO Warehouse | - | - |
| Synthetic Corporate Credit | Bank Balance Sheet transactions | 12.5 | 12.8 |
| Cash Corporate Credit | Cash Corporate Credit Equity | 2.5 | 2.4 |
| ABS | ABS Residual | 2.0 | 2.9 |
| | ABS Debt | 2.0 | 3.1 |
| Net position | (includes cash, other liquid assets, trade payables and Repo) | 3.1 | (12.3) |

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

19. FINANCIAL RISK MANAGEMENT (CONTINUED)

Concentration risk (continued)

Indirect exposures to underlying concentrations can be complex and will vary by asset type and factors such as subordination. In general, the Company's investment portfolio is well diversified. The Company's principal concentration exposures are derived from its positions in CLO Equity tranches. Based on reports provided to the Investment Manager, the largest 20 underlying exposures aggregated across all the Company's CLO Equity tranches are listed in the table below. These exposures are stated as the gross exposure to the individual issuers listed below of the underlying CLO collateral pool before taking into account the effect of leverage due to the relative subordination of the CLO tranche held by the Company:

| As at 31 July 2020 | | Average exposure to individual issuers in the underlying CLO Equity sub- portfolios as a % of Volta's total CLO Equity positions | Average exposure to individual issuers in the underlying CLO Equity sub- portfolios as a % of Volta's NAV |

| Misys | Computers & Electronics | 0.39% | 0.20% |

Based on the current weighting of CLO Equity positions 47.3% of NAV (31 July 2019: 48.6% of NAV), the default as at 31 July 2020 of one underlying loan representing for example 1% (31 July 2019: 1%) of all the CLO Equity underlying portfolios would have caused a decline of approximately 1.7% (31 July 2019: 0.17%) of NAV on a mark-to-market basis, assuming: liquidation of the relevant CLO Equity tranches rather than the continuation of ongoing cash flow receipts from such CLO Equity tranches; a standard recovery rate on the defaulted loan of 65% (31 July 2019: 65%); and, that CLO Equity positions represent, on average, approximately a ten times leverage on the underlying loan portfolios). In practice, at the time of such default, it is likely that the impact on NAV would be mitigated by the fact that CLO Equity valuations take into account the ongoing payments from these positions as well as the liquidation value. As a result, the Company has limited exposure to indirect concentration risk. Accumulation of defaults at the level of the underlying credit portfolios represents a greater risk to the Company.

Re-investment risk

A majority of the Company's directly held investments (CLO Debt, most of the Bank Balance Sheet transactions and CLO Equity positions) may be sensitive to spread compression. Spread compression in the loan market might increase the prepayment rate of loans causing the underlying loan portfolio of CLOs to carry a lower spread and then leading to lower ongoing cash flows for the CLO Equity positions. This may be counter-balanced by the ability of CLOs to refinance and/or reset the cost of their liabilities in order to re-establish better terms for the CLO Equity position. CLO Debt and Bank Balance Sheet transactions are issued with a non-call period (usually between two and three years), after such non-call period, in the event of spread compression in these markets, Volta might experience these assets being called and might face the challenge of reinvesting in a context of a lower spread environment. One virtue of having a multi-asset-class strategy is that flexibility exists to re-allocate between asset classes in such cases.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

19. FINANCIAL RISK MANAGEMENT (CONTINUED)

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. Many of the assets in which the Company invests are illiquid. Changes in market sentiment may make significant portions of the Company's investment portfolio rapidly more illiquid, particularly with regard to types of assets for which there is not a broad well-established trading market or for which such a market is linked to a fewer number of market participants. Portfolio issuers and borrowers may experience changes in circumstance that adversely affect their liquidity, leading to interruptions in cash flows. The Company can seek to manage liquidity needs by borrowing, but turns in market sentiment may make credit expensive or unavailable. Liquidity may also be addressed by selling assets in the Company's portfolio, but selling assets may in some circumstances be significantly disadvantageous for the Company or even almost impossible if liquidity were to disappear for the Company's assets. In the event of such adverse liquidity conditions the Company might be unable to fund margin calls on its derivative positions and might consequently be unable to fund the payment of dividends. Liquidity risk is analysed by the Investment Manager on a daily basis and is communicated to and monitored by the Board through the quarterly business report.

In addition, the Company had entered into a Repo transaction under which a significant proportion of its most liquid assets were provided as collateral to the Repo counterparty. As detailed in Note 12, the collateral provided as at 31 July 2020 was €nil (31 July 2019: €63.2 million).

Maturity profile

The following tables show the legal maturity of the securities:

Maturity profile as at 31 July 2020

| | 55,650,666 | - | - | 55,650,666 |

Risks relating to leveraged exposure

The Company's investment strategy involves a high degree of exposure to the risks of leverage. Investors in the Company must accept and be able to bear the risk of investment in a highly leveraged investment portfolio. Predominantly the leverage is provided through investment in structured leveraged instruments (embedded leverage) with no recourse to the Company's assets, but the Company may also participate in direct leverage transactions with recourse and consequent increased liquidity needs such as the loan financing received under the Repo, as detailed in Note 12.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

19. FINANCIAL RISK MANAGEMENT (CONTINUED)

Liquidity risk (continued)

Capital risk management

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the Company. The Company's capital is represented by the shares, share premium account, other distributable reserves and accumulated gain reserve. The capital of the Company is managed in accordance with its investment policy, in pursuit of its investment objectives. The Company seeks to attain its investment objectives by pursuing a multi-asset-class investment strategy. The investment strategy focuses on direct and indirect investments in, and exposures to, a variety of assets selected for the purpose of generating cash flows for the Company. The Board of Directors also monitors the level of dividends to Ordinary Shareholders.

There were no changes in the Company's approach to capital management during the year, with exception to repayment of the Repo.

20. INTERESTS IN OTHER ENTITIES

Interests in unconsolidated structured entities

IFRS 12 defines a structured entity as an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to the administrative tasks only and the relevant activities are directed by means of contractual agreements.

A structured entity often has some of the following features or attributes:

- A.) restricted activities;
- B.) a narrow and well defined objective;
- C.) insufficient equity to permit the structured entity to finance its activities without subordinated financial support; And
- D.) financing in the form of multiple contractually linked instruments that create concentrations of credit or other risks.

Involvement with unconsolidated structured entities

The company has concluded that positions in which it invests, that are not subsidiaries for financial reporting purposes, meet the definition of structured entities because:

- the voting rights in the positions are not the dominant rights in deciding who controls them, as they relate to administrative tasks only;
- each of the positions activities are restricted by its prospectus; and
- the positions have narrow and well-defined objectives to provide investment opportunities to investors.

The Company's purpose is to provide access to various forms of underlying credit assets and it does this by investing in various entities which are structured in such a way as to enable the Company to obtain access to a diversified pool of such assets. These entities are created and promoted by various parties (and sometimes by the Company's own investment manager), to facilitate such access by various investors, but never solely for the Company's benefit. The Company's maximum notional holding out of all the notional holdings of any single entity is 20.67%. Other than uncalled commitments totalling €13,3m, the Company has no contingent liabilities to any of these entities or to other participants in them, nor does it provide financial support, or intend to provide financial support, to any party. The Company fair values all such structured entities and so the maximum loss it can suffer is capped at the current carrying value plus uncalled commitments.

IFRS 12 requires certain information to be disclosed in respect of "unconsolidated structured entities" to enable users of its financial statements to evaluate:

- the nature of, and risks associated with, its interests in an unconsolidated structured entity; and
- the effects of those interests on its financial position, financial performance and cash flows.

The Directors believe that such information is provided in various places in these financial statements, and in the paragraph above, but the following table summarises the information required by IFRS12 in respect of the principal classes of structured entities held by the Company.

The Company has a percentage range of 0.2% - 23.3% notional holding out of the entire outstanding notional balances of the structured entities as at 31 July 2019.

During the financial year ended 31 July 2019, the Company did not provide financial support to the unconsolidated structured entities and has no intention of providing financial or other support. The assessment was done for the Company as a whole.

* The investments are non-recourse securities with no contingent liabilities, where the Company's maximum loss is capped at the current carrying value.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

21. RELATED PARTIES

Transactions with Directors

For disclosure of Directors' remuneration, refer to Note 5. As at the year ended 31 July 2020, Directors' fees to be paid in cash of €nil (31 July 2019: €87,763) had been accrued but not paid. Directors' fees to be paid in shares of €37,612 (31 July 2019: €37,612) had been accrued but not paid and Directors' expenses of €nil (31 July 2019: €nil) had been accrued but not paid.

As at 31 July 2020, the Directors of the Company owned 0.86% (31 July 2019: 0.77%) of the voting shares of the Company.

Transactions with the Investment Manager

As announced on 2 October 2017, the Company agreed a revised Management Fee and Performance Fee basis with its Investment Manager, under an amended and restated IMA which is effective from 1 August 2017.

Under the revised fee basis, AXA IM is entitled to receive from the Company an investment manager fee equal to the aggregate of:

- a) an amount equal to 1.5% of the lower of NAV and €300 million; and
- b) if the NAV is greater than €300 million, an amount equal to 1.0% of the amount by which the NAV of the Company exceeds €300 million.

The investment management fee is calculated for each six-month period ending on 31 July and 31 January of each year on the basis of the Company's NAV as of the end of the preceding period and payable semi-annually in arrears. The investment management fee payable to AXA IM is subject to reduction for investments in AXA IM Managed Products as set out in the Company's Investment Guidelines. During the year, the investment management fees earned were €3,949,976 (year ended 31 July 2019: €4,183,666). Investment management fees accrued but unpaid as at 31 July 2020 were €1,976,356 (year ended 31 July 2019: €2,022,277).

Under the amended and restated IMA, the Investment Manager is also entitled to receive a performance fee of 20% of any NAV outperformance over an 8% hurdle on an annualised basis, subject to a high-water mark and adjustments for dividends paid, share issuances, redemptions and buybacks. The performance fee will be calculated and paid annually in respect of each twelve-month period ending on 31 July (each an "Incentive Period"). Notwithstanding the foregoing, performance fees payable to AXA IM in respect of any Incentive Period shall not exceed 4.99% of the NAV at the end of such Incentive Period.

There were no performance fees paid or accrued for the year ended 31 July 2020 (year ended 31 July 2019: €nil).

The Investment Manager also acts as investment manager for the following of the Company's investments held as at the year-end which together represented 8.0% of NAV as at 31 July 2020: Adagio V CLO DAC Subordinated Notes; Adagio VI CLO DAC Subordinated Notes; Adagio VII CLO DAC Subordinated Notes; Adagio VIII CLO DAC Subordinated Notes; Bank Capital Opportunity Fund; Bank Deleveraging Opportunity Fund and St Bernard Opportunity Fund I (Series 6). (31 July 2019: 7.3% of NAV: Adagio V CLO DAC Subordinated Notes; Adagio VI CLO DAC Subordinated Notes; Adagio VII CLO DAC Subordinated Notes; Bank Capital Opportunity Fund; Bank Deleveraging Opportunity Fund and St Bernard Opportunity Fund I (Series 6)).

Each of these investments is classified as AXA IM Managed Product except for Adagio V CLO DAC Subordinated Notes, Adagio VI CLO DAC Subordinated Notes, Adagio VII CLO DAC Subordinated Notes and Adagio VIII-X CLO DAC Subordinated Notes, which are classified as Restricted AXA IM Managed Products.

The Investment Manager earns investment management fees, including incentive fees where applicable, directly from each of the above investment vehicles, in addition to its investment management fees earned from the Company. However, with respect to the Company's investments in Bank Deleveraging Opportunity Fund, Bank Capital Opportunity Fund and St Bernard Opportunity Fund I, there is no duplication of investment management fees as adjustment for these investments is made in the calculation of the investment management fees payable by the Company such that AXA IM earns investment management fees only at the level of the Company.

Due to the fact that the Company's investments in Adagio V CLO DAC Subordinated Notes, Adagio VI CLO DAC Subordinated Notes and Adagio VII CLO DAC Subordinated Notes are classified as Restricted AXA IM Managed Products, AXA IM earns investment management fees at the level of the Restricted AXA IM Managed Product rather than at the Company level. Therefore, it is possible for AXA IM to earn incentive fees at the level of both the Restricted AXA IM Managed Product and the Company.

Except for the Company's Restricted AXA IM Managed Products and AXA IM Managed Products, (as detailed above), all other investments in products managed by the Investment Manager were made by way of secondary market purchases on a bona fide arm's length basis from parties unaffiliated with the Investment Manager. Therefore, the Company pays investment management fees with respect to these investments calculated in the same way as if the investment manager of these deals were an independent third party.

AXA group held 30.23% (31 July 2019: 30.23%) of the voting shares in the Company as at 31 July 2020 and 30.23% (31 July 2019: 30.23%) as at the date of approval of this report.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

22. COMMITMENTS

As at 31 July 2020, the Company had the following uncalled commitments outstanding:

- a) CMV – \$2,976,785 (31 July 2019: \$8,184,990) remaining commitment from an original commitment of \$20,000,000;
- b) Crescent European Specialty Lending Fund (a Cash Corporate Credit Equity transaction exposed to sub-investment grade corporate credits) – €2,295,788 (31 July 2019: €2,782,144) remaining commitment from an original commitment of €7,500,000; and
- c) REO transaction 2019-1 – €2,868,961 (31 July 2019: €6,904,949) remaining commitment from an revised commitment of €8,805,075.
- d) Warehouse Transaction 2019-1 – €4,603,771 (31 July 2019: €12,500,000) remaining commitment from an original commitment of €12,500,000.

23. SUBSEQUENT EVENTS

Management has evaluated subsequent events for the Company from 1 August 2020 to 6 November 2020, the date the financial statements were available to be issued. No particular event has materially affected the Company. However, the following points are pertinent:

- With effect from 1 August 2020 the Board resolved to reduce its fees as follows:

| Component | Director | Fees to 31 July 2020 (€) | Fees from 1 August 2020 | Purpose of reward |
|-----------------------|---|--------------------------|-------------------------|---|
| Annual fee | Chairman of the Board Paul Meader | €120,000 | €100,000 | For commitments as non-executive Directors |
| | All other Directors | | | |
| | Graham Harrison | €88,000 | €70,000 | |
| | Stephen Le Page | €88,000 | €70,000 | |
| | Atosa Moini ¹ | €88,000 | - | |
| | Paul Varotsis | €88,000 | €70,000 | |
| Additional annual fee | Stephen Le Page (Chairman of the Audit Committee) | €17,500 | €15,000 | For additional responsibilities and time commitment |
| | Graham Harrison (Chairman of the Risk Committee) | €6,000 | €5,000 | |
| | Paul Varotsis (Senior Independent Director) | €6,000 | None | |

¹ Ms Moini resigned from the Board effective 31 July 2020.

- On 21 September 2020, the Company declared a quarterly interim dividend of €0.11 per share, which was paid on the 29 October 2020, amounting to €4.24 million.

ALTERNATIVE PERFORMANCE MEASURES DISCLOSURE

FOR THE YEAR ENDED 31 JULY 2020

Alternative performance measures disclosure

In accordance with ESMA Guidelines on APMs the Board has considered what APMs are included in the Annual Financial Report and financial statements which require further clarification. An APM is defined as a financial measure of historical or future financial performance, financial position, or cash flows, other than a financial measure defined or specified in the applicable financial reporting framework. APMs included in the financial statements, which are unaudited and outside the scope of IFRS, are deemed to be as follows:

NAV to market price discount / premium

The NAV per share is the value of all the Company's assets, less any liabilities it has, divided by the total number of Ordinary Shares. However, because the Company's Ordinary shares are traded on the Euronext Amsterdam and London Stock Exchange, the share price may be higher or lower than the NAV. The difference is known as a discount or premium. The Company's discount / premium to NAV is calculated by expressing the difference between the share price (closing price)¹ and the NAV per share on the same day compared to the NAV per share on the same day.

The discount or premium per Ordinary share is a key indicator of the discrepancy between the market value and the intrinsic value of the Company.

At 31 July 2020, the Company's Ordinary shares traded at €4.38 on the Euronext Amsterdam (31 July 2019: €7.00). The Ordinary shares traded at a discount of 23.0% (31 July 2019: discount of 11.8%) to the NAV per Ordinary share of €5.6914 (31 July 2019: €7.9438).

Ongoing charges

The ongoing charges ratio for the year ended 31 July 2020 was 2.13% (31 July 2019: 1.93%). The AIC's methodology for calculating an ongoing charges figure is based on annualised ongoing charges of £5,238,923 (31 July 2019: £5,691,347) divided by average NAV in the period of €246,263,447 (31 July 2019: €295,420,327).

Calculating ongoing charges

The ongoing charges are based on actual costs incurred in the year excluding any non-recurring fees in accordance with the AIC methodology. Expense items have been excluded in the calculation of the ongoing charges figure when they are not deemed to meet the following AIC definition:

"Ongoing charges are those expenses of a type which are likely to recur in the foreseeable future, whether charged to capital or revenue, and which relate to the operation of the investment company as a collective fund, excluding the costs of acquisition/disposal of investments, financing charges and gains/losses arising on investments. Ongoing charges are based on costs incurred in the year as being the best estimate of future costs."

Please refer below for ongoing charges reconciliation for the years ended 31 July 2020 and 31 July 2019:

| | 31 July 2020 £ | 31 July 2019 £ |
|--|----------------------|----------------------|
| Total operating expenses for the year: | (5,322,892) | (5,701,844) |
| Expenses included in the calculation of ongoing charges figures, in accordance with AIC's methodology: | | |
| Management fees | (3,949,976) | (4,183,666) |
| Legal and professional fees | (192,003) | (333,561) |
| Administration fees | (808,002) | (839,039) |
| Sundry expenses | (288,942) | (335,081) |
| Total ongoing charges for the year | (5,238,923) | (5,691,347) |

Calculating an average NAV

The AIC's methodology for calculating average NAV for the purposes of the ongoing charges figure is to use the average of NAV at each NAV calculation date. On this basis the average NAV figure has been calculated using the monthly published NAVs over the years ended 31 July 2020 and 31 July 2019.

Internal Rate of Return

The Internal Rate of Return is calculated as the gross projected future return on Volta's investment portfolio as at 31 July 2020 under standard AXA IM assumptions. As at 31 July 2020 the IRR is 17.7% (31 July 2019: 11.6%).

The Board consider IRR of overall Company investment portfolio when determined using sustainability of dividends as well as on a quarterly basis prior to declaring any dividend.

The IRR is calculated using projected cash flows and a DCF model from the investment portfolio, which are consistent with the Company's accounting policies.

ALTERNATIVE PERFORMANCE MEASURES DISCLOSURE (CONTINUED)

FOR THE YEAR ENDED 31 JULY 2020

Alternative performance measures disclosure (continued)

Annualised dividend yield

Dividend yield is calculated as total dividends paid during the financial period divided by the share price as at 31 July 2020 and 31 July 2019.

Annualised dividend yield is calculated to measure the Company's distribution of dividends to the Company's Ordinary Shareholders relative to share price to allow comparability to other companies in the market.

Annualised dividend yield is calculated as follows:

| | 31 July 2020 |
|---|---------------------|
| Dividends declared and paid for the quarter ended 30 September 2019 | 0.16 |
| Dividends declared and paid for the quarter ended 31 December 2019 | 0.16 |
| Dividends declared and paid for the quarter ended 30 April 2020 | 0.10 |
| Dividends declared and paid for the quarter ended 31 July 2020 | 0.11 |
| Total dividends declared in respect of the year ended 31 July 2019 | 0.53 |
| Share price as at 31 July 2020 | 4.38 |
| Annualised Dividend Yield | 12.1% |

| | 31 July 2019 |
|---|---------------------|
| Dividends declared and paid for the quarter ended 30 September 2018 | 0.16 |
| Dividends declared and paid for the quarter ended 31 December 2018 | 0.15 |
| Dividends declared and paid for the quarter ended 31 March 2019 | 0.15 |
| Dividends declared and paid for the quarter ended 30 June 2019 | 0.15 |
| Total dividends declared in respect of the year ended 31 July 2019 | 0.61 |
| Share price as at 31 July 2019 | 7.00 |
| Annualised Dividend Yield | 8.7% |

NAV total return

NAV total return per share is calculated as the movement in the NAV per share plus the total dividends paid per share during the financial year, with such dividends paid being re-invested at NAV, as a percentage of the NAV per share as at year end.

The six months period NAV total return is calculated over the period 1 January 2020 to 31 July 2020.

The one year NAV total return is calculated over the period 1 August 2019 to 31 July 2020.

The five years NAV total return is calculated over the period 1 August 2015 to 31 July 2020.

NAV total return since inception is for the period 31 October 2006 to 31 July 2020.

NAV total return summarises the Company's true growth over time while taking into account both capital appreciation and dividend yield.

NAV total return per share has been calculated as follows:

| | 1 August 2019 to 31 July 2020 | 1 August 2018 to 31 July 2019 |
|---|--|--|
| | € | € |
| Opening NAV per share as disclosed in the SOFP | 7.9438 | 8.3600 |
| Closing NAV per share as disclosed in the SOFP | 5.6914 | 7.9438 |
| | (2.2524) | (0.4162) |
| Dividends paid during the year as disclosed above | 0.5300 | 0.6100 |
| NAV total return per share | (1.7224) | 0.1938 |
| Impact of dividend re-investment | (0.8)% | 0.2% |
| NAV total return per share (%) | (22.5)% | 2.5% |

Share Price Performance¹

Share price performance is calculated as the movement in the share price plus the total dividends paid per share during the financial year, with such dividends paid being re-invested at the share price, as a percentage of the share price as at year end.

LEGAL AND REGULATORY DISCLOSURES

Alternative Investment Fund Managers Directive

The AIFM Directive seeks to regulate managers (“AIFMs”) of alternative investment funds (“AIFs”) that are marketed or managed in the European Economic Area. In compliance with the AIFMD, the Company has appointed AXA IM to act as its AIFM and had appointed State Street to act as its Depositary until 31 July 2018. From 1 August 2018, the Company appointed BNP to act as its Depositary.

AXA IM is authorised to act as the Company’s AIFM by the Autorité des Marchés Financiers (the “AMF”) in France. In order to maintain such authorisation and to be able to continue to undertake this role, AXA IM is required to comply with various obligations prescribed under the AIFMD. In conformity with Article 53 of the Commission delegated regulation (EU) No. 231/2013, AXA IM has established appropriate policies and procedures regarding the credit risk of each of the structured credit positions (positions arising from the securitisation of underlying exposures) held by Volta, in order to monitor information regarding the performance of the underlying exposures on a timely basis and to manage such credit risk where applicable and possible. Such policies and procedures are considered as being appropriate to the risk/return profile of these positions. AXA IM also regularly implements stress tests on these positions.

Information on the investment strategy, geographic and sector investment focus, and principal exposures is included in the Investment Manager’s Report and Note 19 to the financial statements. Information regarding the total amount of leverage employed by the Company is disclosed in Note 12 to the financial statements. None of the Company’s assets are subject to special arrangements arising from their illiquid nature, where “special arrangements” refers to arrangements such as side pockets, gates or other similar arrangements, whereby the rights of some investors, usually over certain assets, differ from those of other investors. Note 19 to the financial statements and the Principal Risk Factors section commencing on page 20 of this report describe the risk profile and risk management systems in place.

Certain regulatory changes have arisen from the implementation of the AIFMD that may, in some circumstances, impair the ability of the Investment Manager to manage the investments of the Company and this may adversely affect the Company’s ability to carry out its investment strategy and achieve its investment objectives. In addition, the AIFMD may limit the Company’s ability to market future issuances of its shares in some EU jurisdictions. Certain EU member states may impose stricter rules or interpretations of the AIFM Directive on the AIFM in respect of the marketing of shares than those either required under the AIFMD or as interpreted by other EU member states, as the Company is a non-EU AIF. The Board and the Company’s advisors will continue to monitor implications of the AIFM Directive.

Staffing and remuneration disclosures regarding the AIFM

Remuneration paid for the calendar year 2019 and 2018 to all AXA Investment Managers Group personnel, split into fixed and variable remuneration paid ⁽¹⁾

| | 2019 | 2018 |
|--|--------------|--------------|
| | Total | Total |
| Fixed remuneration ⁽²⁾ (€ million) | 229.3 | 233.6 |
| Variable remuneration ⁽³⁾ (€ million) | 262.3 | 274.2 |
| Number of staff ⁽⁴⁾ | 2,530 | 2,547 |

LEGAL AND REGULATORY DISCLOSURES (CONTINUED)

Staffing and remuneration disclosures regarding the AIFM (continued)

Aggregate remuneration paid and/or awarded⁽¹⁾ for the calendar year 2019 and 2018 to senior management and members of staff whose actions have a material impact on the risk profile of Volta

| | Managers and other employees having a direct impact on the risk profile of Volta | Other senior executives | 2019 Total |
|--|---|--------------------------------|-------------------|
| Fixed remuneration ⁽²⁾ and variable ⁽³⁾ remuneration (€ million) | 110.9 | 109.5 | 220.3 |
| Number of staff ⁽⁴⁾ | 224 | 101 | 325 |

| | Managers and other employees having a direct impact on the risk profile of Volta | Other senior executives | 2018 Total |
|--|---|--------------------------------|-------------------|
| Fixed remuneration ⁽²⁾ and variable ⁽³⁾ remuneration (€ million) | 144.9 | 86.0 | 230.9 |
| Number of staff ⁽⁴⁾ | 255 | 71 | 326 |

Notes:

(1) Information on remuneration does not include employer contributions.

(2) Fixed remuneration comprises the base salary and all other components of fixed remuneration paid in the calendar year.

(3) Variable remuneration comprises discretionary, immediate and deferred elements of variable pay and includes:

- amounts allocated on account of the performance of the previous year and paid out in full during the calendar year (variable, non-deferred remuneration);
- amounts allocated on account of the performance of previous years and the calendar year and paid out in instalments subject to maintaining the performance over several years (variable deferred remuneration); and
- long term incentive bonuses awarded by the AXA Group.

(4) The total number of employees includes permanent and temporary contracts other than internships at calendar year.

BOARD OF DIRECTORS

BOARD OF DIRECTORS (CONTINUED)

01. Graham Harrison

Independent Director - appointed 19 October 2015

Mr Harrison is co-founder and Group Managing Director of ARC Group Limited, a specialist investment advisory and research company. ARC was established in 1995 and provides investment advice to ultra-high net worth families, complex trust structures, charities and similar institutions. Mr Harrison has fund Board experience spanning a wide range of asset classes including hedge funds, commodities, property, structured finance, equities, bonds and money market funds. Prior to setting up ARC, he worked for HSBC in its corporate finance division, specialising in financial engineering. Mr Harrison is a Chartered Wealth Manager and a Chartered Fellow of the Chartered Institute of Securities and Investment. He holds a BA in Economics from the University of Exeter and an MSc in Economics from the London School of Economics.

02. Stephen Le Page

Independent Director – appointed 16 October 2014

Mr Le Page holds a number of non-executive roles with a range of collective investment schemes and two insurance companies. His experience as a non-executive spans the full life cycle of a company, from formation through IPO, additional fundraisings and mergers to winding up and liquidation. This portfolio has built on his previous experience as a partner with PricewaterhouseCoopers in the Channel Islands, where he worked with many different types of financial organisation as both auditor and advisor. He also served as the senior partner of that firm, carrying out the role of chief executive and leading considerable growth in the business. Mr Le Page is a Fellow of the Institute of Chartered Accountants in England and Wales and a Chartered Tax Advisor. He is a past president of the Guernsey Society of Chartered and Certified Accountants and a past Chairman of the Guernsey International Business Association.

03. Paul Meader

Chairman and Independent Director – appointed 15 May 2014

Mr Meader is an independent director of investment companies, insurers and investment funds. Until the autumn of 2012 he was Head of Portfolio Management for Canaccord Genuity, based in Guernsey, prior to which he was Chief Executive of Corazon Capital, Guernsey. He has over 30 years' experience in financial markets in London, Dublin and Guernsey, holding senior positions in portfolio management and trading. Prior to joining Corazon Capital he was Managing Director of Rothschild's Swiss private banking subsidiary in Guernsey. Mr Meader is a Chartered Fellow of the Chartered Institute of Securities & Investments, a past Commissioner of the GFSC and past Chairman of the Guernsey International Business Association. He is a graduate of Hertford College, Oxford.

04. Atosa Moini

Independent Director – appointed 19 June 2017, resigned 31 July 2020

Ms Moini retired from Goldman Sachs International in September 2016 where she was Head of Origination and Distribution of Asset-backed Products and Loans in EMEA and previous to that she was Co-Head of EMEA Credit Sales. Ms Moini was also a member of the Securities Division Client and Business Standards Committee. Ms Moini has extensive product origination and distribution experience across a wide range of asset classes including corporate and leverage loans, corporate bonds, CLOs and asset-backed products in the real estate, transportation and renewable energies sectors. Ms Moini has an MBA from the London Business School and a BA Honours Degree in Industrial Engineering from the University of Surrey.

05. Paul Varotsis

Senior Independent Director – appointed 9 November 2006

Mr Varotsis was a partner at Reoch Credit Partners LLP until March 2011 where he worked as a consultant for financial institutions and advised investors, asset managers, intermediaries and software vendors on structured credit solutions. Mr Varotsis was Director of CDOs at Barclays Capital from 2002 to 2004. Prior to that, he was Executive Director, Structured Credit Trading, at Lehman Brothers from 2000 to 2002 and spent approximately ten years (1991 to 2000) at Chase Manhattan Bank and its predecessors; his last position at Chase was Head of Credit and Capital Management (Europe, Africa, Middle East). He was European Chairman of the ISDA committee that participated in the drafting of the 2003 Credit Derivatives Definitions and advised the Bank of England and other regulators on the appropriate framework for the market's development. Mr Varotsis holds an MBA from the Stanford Graduate School of Business, a diplôme from the Institut d'Études Politiques de Paris and a diplôme from the Institut Supérieur de Gestion.

GLOSSARY

Definitions and explanations of methodologies used:

| Terms | Definitions |
|---------------------------------------|--|
| ABS | Asset-backed securities. |
| AGM | Annual General Meeting. |
| ABS Residual positions | Residual income positions, which are a sub-classification of ABS, being backed by any of the following: residential mortgage loans; commercial mortgage loans; automobile loans; student loans; credit card receivables; or leases. |
| AIC | the Association of Investment Companies, of which the Company is a member. |
| AIC Code | the AIC Code of Corporate Governance effective from 1 January 2019. |
| AFM | the Netherlands Authority for the Financial Markets (the "Autoriteit Financiële Markten" or "AFM"), being the financial markets supervisor in the Netherlands. |
| AIFM | Alternative Investment Fund Manager, appointed in accordance with the AIFMD. |
| AIFMD | the Alternative Investment Fund Managers Directive. |
| AMF | The Autorité des marchés financiers is the stock market regulator in France. |
| Annualised Dividend Yield - APM | calculated as total dividends paid during the financial period divided by the share price as at 31 July 2020. |
| Annualised cash flow yield | Calculated as sum of coupons over the last financial year divided by opening NAV. |
| APM | We assess our performance using a variety of measures that are not specifically defined under IFRS as adopted by the EU and are therefore termed alternative performance measures. The APMs that we use may not be directly comparable with those used by other companies. The APMs disclosed in the Annual Report and Audited Financial Statements reflect those measures used by management to measure performance. These APMs provide readers with important additional information and will enable comparability of performance in future periods. The calculation methodology of each APM has been disclosed on pages 77 to 78. |
| Articles | the Articles of Incorporation of the Company. |
| AXA IM, Investment Manager or Manager | AXA Investment Managers Paris S.A. |
| Bank Balance Sheet transactions | synthetic transactions that permit banks to transfer part of their exposures such as exposures to corporate loans, mortgage loans, counterparty risks, trade finance loans or any classic and recurrent risks banks take in conducting their core business. |
| BNP Paribas | BNP Paribas Securities Services S.C.A. Guernsey Branch. |
| Board | the Board of Directors of the Company. |
| Capitalised Manager Vehicle or CMV | a CMV is a long-term closed-ended structure which is established to act as a CLO manager and to also provide capital in order to meet risk retention obligations when issuing a CLO and also to provide warehousing capabilities. |
| CCC or Cash Corporate Credit | Deals structured credit positions predominantly exposed to corporate credit risks by direct investments in cash instruments (loans and/or bonds). |
| CCC Equity | Cash Corporate Credit Equity. |
| Cenkos, Corporate Broker or Broker | Cenkos Securities plc. |
| CLOs or CLO | Collateralised Loan Obligations. |
| Company or Volta | Volta Finance Limited, a close-ended limited liability company registered in Guernsey under the Companies (Guernsey) Law 2008 (as amended) with registered number 45747. |
| CPR | Constant prepayment rate. |
| CRS | Common Reporting Standard. |
| Discount - APM | Calculated as the NAV per share as at 31 July 2020 less Volta's closing share price on Euronext Amsterdam as at that date, divided by the NAV per share as at that date. |
| ECB | European Central Bank. |
| EU | The European Union. |
| EU PRIIPs rules | The European Union rules in relation to packaged retail and insurance-based investment products. |
| Euronext Amsterdam | Euronext in Amsterdam, a regulated market of Euronext Amsterdam N.V. |
| EPS | Earnings per share. |
| FAFVTPL | Financial assets at fair value through profit and loss. |
| FATCA | United States of America Foreign Account Tax Compliance Act. |
| Financial year | The period from 1 August 2019 to 31 July 2020. |
| FRC | Financial Reporting Council (United Kingdom). |
| GAV | Gross Asset Value includes: all of the assets in the Company's portfolio revalued to the month-end fair value, as adjusted for any amounts due to/from brokers/counterparties; all of the Company's cash; all open derivative positions revalued to the month-end fair value, net of any margin amounts paid or received. |
| GFC | Global Financial Crisis 2008. |
| GFSC | Guernsey Financial Services Commission. |
| HPI | House price index. |
| IGA | Intergovernmental Agreement. |
| IASB | International Accounting Standards Board. |
| IFRIC | International Financial Reporting Interpretations Committee. |
| IFRS | International Financial Reporting Standards. |
| IFRS 9 | International Financial Reporting Standards 9, "Financial Instruments". |
| IMA | Investment Management Agreement. |
| IRR | internal rate of return. |
| JP Morgan Pricing Direct | An independent valuation service which is a wholly-owned subsidiary of JPMorgan Chase & Co. |
| KPMG | KPMG Channel Islands Limited. |
| LSE | London Stock Exchange. |
| Memorandum | the Memorandum of Incorporation of the Company. |
| NAV | Net asset value. |
| NAV total return | NAV total return per share is calculated as the movement in the NAV per share plus the total dividends paid per share during the financial year, with such dividends paid being re-invested at NAV, as a percentage of the NAV per share as at year end. |
| NPL | Non performing loan |

GLOSSARY (CONTINUED)

| | |
|---|--|
| Ordinary shares | Ordinary shares of no par value in the share capital of the Company. |
| O&G Crisis | Oil and Gas Crisis 2014. |
| Projected portfolio IRR | Calculated as the gross projected future return on Volta's investment portfolio as at 31 July 2020 under standard AXA IM assumptions. |
| Prospectus | Final prospectus dated 4 December 2006. |
| REO | Real Estate Owned. |
| Repo | Repurchase agreement entered into with Société Générale. |
| RMBS | Residential mortgage-backed securities, which are a sub-classification of ABS. |
| SCC BBS | Synthetic Corporate Credit Bank Balance Sheet. |
| SG | Société Générale S.A. |
| Share or Shares | All classes of the shares of the Company in issue. |
| Shareholder | Any Ordinary Shareholder. |
| Share price performance | The percentage increase or decrease in the share price on Euronext Amsterdam plus the total dividends paid per share during the reference period, with such dividends re-invested in the shares. Obtained from Bloomberg using the TRA function. |
| Sharpe ratio | the Sharpe ratio is a measure of risk-adjusted return and is calculated as the average return earned, based on the published monthly Estimated NAVs as adjusted for dividends paid, in excess of three-month Euribor, as an assumed risk-free rate, per unit of volatility or total risk (measured as the standard deviation of the adjusted monthly Estimated NAVs). |
| SME | Small and medium-sized enterprises. |
| SOFP | Statement of Financial Position. |
| SSC or Synthetic Corporate Credit Underlying Assets | Structured credit positions predominantly exposed to corporate credit risks by synthetic contracts. The assets that the Company may invest in either directly or indirectly include, but are not limited to, corporate credits; sovereign and quasi-sovereign debt; residential mortgage loans; commercial mortgage loans; automobile loans; student loans; credit card receivables; leases; and debt and equity interests in infrastructure projects. |
| UK code | UK Corporate Governance Code 2018, effective from 1 January 2019. |
| US | United States of America. |
| USD | United States Dollar. |
| Warehouse | a Warehouse is a short-term structure put in place before a CLO happens in order to accumulate assets in order to facilitate the issue of the CLO. A Warehouse is leveraged and can be marked to market. |
| WAL | weighted average life. |

NOTICE OF MEETING

Volta Finance Limited

A closed-ended limited liability company registered in Guernsey under the Companies (Guernsey) Law, 2008 (as amended) with registered number 45747 and registered with the Netherlands Authority for the Financial Markets pursuant to Section 1:107 of the Dutch Financial Markets Supervision Act (the "Company").

Notice of the fourteenth Annual General Meeting of the Company

In accordance with the Company's Articles of Incorporation (the "Articles"), notice is hereby given that the fourteenth Annual General Meeting of the Company will be held at the Company's registered office, BNP Paribas House, St Julian's Avenue, St Peter Port, Guernsey GW1 1WA, Channel Islands, at 1:00 p.m. (GMT) on 8 December 2020.

Agenda

Ordinary business

To consider and, if thought fit, pass the following as Ordinary Resolutions:

- (1) To adopt the audited financial statements of the Company for the year ended 31 July 2020, including the reports of the Board of Directors of the Company (the "Board") and the Auditor (together the "Accounts").
- (2) To re-appoint KPMG Channel Islands Limited of Gategny Court, Gategny Esplanade, St Peter Port, Guernsey GY1 1WR as the Company's Auditor to hold office until the conclusion of the next AGM.
- (3) To authorise the Board to negotiate and fix the remuneration of the Auditor in respect of the year ending 31 July 2021.
- (4) To re-elect Graham Harrison* as an Independent Director of the Company.
- (5) To re-elect Stephen Le Page* as an Independent Director of the Company.
- (6) To re-elect Paul Meader* as an Independent Director of the Company.
- (7) To re-elect Paul Varotsis* as an Independent Director of the Company.
- (8) To approve the quarterly dividend policy of paying approximately 8% of NAV per annum, absent of a notable change in circumstances, with a dividend payment date in January, April, July and October.

Special Business

To consider and, if thought fit, pass the following as Special Business:

Special Resolution

- (9) **THAT** in accordance with Article 5(7) of the Articles, the Board be and is hereby authorised to issue equity securities (within the meaning of the Articles) as if Article 5(2) of the Articles did not apply to any such issue, provided that this power shall be limited to the issue of up to a maximum number of 3,658,058 Ordinary shares (being not more than 10% of the number of Ordinary shares in issue as at the date of this notice) or such other number being not more than 10% of the Ordinary shares in issue at the date of the AGM, whether in respect of the sale of shares held as treasury shares, the issue of newly created shares or the grant of rights to subscribe for, or convert securities into, shares which, in accordance with the Listing Rules, could only be issued at or above net asset value per share (unless offered pro rata to existing Shareholders or pursuant to further authorisation by Shareholders). This authority will expire on the conclusion of the next AGM of the Company unless previously renewed, varied or revoked by the Company at a general meeting, save that the Company shall be entitled to make offers or agreements before the expiry of such power which would or might require equity securities to be allotted after such expiry and the Directors shall be entitled to allot equity securities pursuant to any such offer or agreement as if the power conferred hereby had not expired. For further information, please see Note 11.

NOTICE OF MEETING (CONTINUED)

Ordinary Resolution

- (10) That the Company be generally and unconditionally authorised to make market purchases, for the purposes of Section 315 of the Companies (Guernsey) Law, 2008 (as amended), of Ordinary shares in the Company on such terms and in such manner as the Directors may from time to time determine, provided that:
- the maximum number of Ordinary shares hereby authorised to be acquired is 5,483,429, representing not more than 14.99% of the issued Ordinary share capital of the Company as at the date of this notice;
 - the minimum price (excluding expenses) payable by the Company for each Ordinary share is €0.01. The maximum price (excluding expenses) which may be paid for any such Ordinary share is the higher of (i) an amount equal to 105% of the average of the middle market quotations for an Ordinary share in the Company as derived from The London Stock Exchange Daily Official List for the five business days immediately preceding the day on which such share is contracted to be purchased; and (ii) the amount stipulated by Article 3(2) of the EU Buy-back and Stabilisation Regulation (2016/1052/EU) being the higher of the price of the last independent trade and the highest current independent bid for an Ordinary share in the Company on the trading venues where the market purchases by the Company pursuant to the authority conferred by this resolution will be carried out (provided that (ii) shall not apply where the purchases would not bear the risk of breaching the prohibition on market abuse);
 - the authority hereby conferred shall expire at the end of the next Annual General Meeting of the Company unless previously renewed, varied or revoked by the Company in general meeting; and
 - the Company may make a contract to purchase the Ordinary shares under the authority hereby conferred prior to the expiry of such authority, which contract will or may be executed wholly or partly after the expiry of such authority, and may purchase its Ordinary shares in pursuance of any such contract.

* See directors biographies on page 82

Notes

- The Company's Accounts were published on 6 November 2020.
- Copies of the Company's Memorandum and Articles of Incorporation and its 2020 Accounts are available for inspection at the Company's registered office during normal business hours and are available on request free of charge from the Company Secretary, BNP Paribas Securities Services S.C.A. Guernsey Branch, BNP Paribas House, St Julian's Avenue, St Peter Port, Guernsey GY1 1WA, Channel Islands (guernsey.bp2s.volta.cosec@bnpparibas.com) and from the Listing Agent, ING Bank N.V., Bijlmerplein 888, 1102 MG Amsterdam, The Netherlands, or from the Company's website (www.voltafinance.com).
- Only those investors holding Ordinary shares as at close of business (GMT time) on 3 December 2020 shall be entitled to attend and/or exercise their voting rights attached to such shares at the AGM.
- To be valid a Form of Proxy must be deposited, by hand or by post, at the offices of Computershare Investor Services (Guernsey) Limited, c/o The Pavilions, Bridgwater Road, Bristol, BS99 6ZY no later than 1:00pm on Friday 4 December 2020.
- Investors holding Ordinary shares via a broker/nominee who wish to attend or to exercise the voting rights attached to the shares at the AGM should contact their broker/nominee as soon as possible.
- Should the Class B Shareholder being entitled to vote wish to attend or exercise the voting rights attached to the share at the AGM they should contact the Company Secretary as soon as possible.
- A Shareholder who is entitled to attend, speak and vote at the AGM is entitled to appoint one or more proxies to attend, speak and vote instead of him or her. A proxy need not be a member of the Company.
- More than one proxy may be appointed provided each proxy is appointed to exercise the rights attached to different shares.
- The quorum requirements for the conduct of Ordinary Business and Special Business are set out under Article 17 of the Articles.
- In accordance with the Articles, the notice period for an AGM of the Company is 21 clear calendar days (plus 24 hours deemed service of notice).
- Article 5 of the Articles requires that where Ordinary shares are issued, or rights to subscribe for, or convert any securities into, Ordinary shares are granted, wholly for cash, or where Ordinary shares are sold out of treasury wholly for cash, either Shareholder approval must be sought to make a non-pre-emptive offer or a pre-emptive offer must be made to all existing Shareholders.
- Electronic receipt of proxies
CREST members who wish to appoint and/or give instructions to a proxy or proxies through the CREST electronic proxy appointment service may do so for the Annual General Meeting and any adjournment(s) thereof by using the procedures described in the CREST Manual. CREST personal members or other CREST sponsored members, and those CREST members who have appointed a voting service provider(s), should refer to their CREST sponsor or voting service provider(s), who will be able to take the appropriate action on their behalf.

In order for a proxy appointment or instruction made using the CREST service to be valid, the appropriate CREST message (the CREST Proxy Instruction) must be properly authenticated in accordance with Euroclear UK & Ireland Limited's ("Euroclear") specifications and must contain the information required for such instructions, as described in the CREST Manual. The message, regardless of whether it constitutes the appointment of a proxy or an amendment to the instruction given to a previously appointed proxy must, in order to be valid, be transmitted so as to be received by Computershare Investor Services (Guernsey) Limited (CREST participant 3RA50) by no later than 1.00pm on Friday 4 December 2020. For this purpose, the time of receipt will be taken to be the time (as determined by the timestamp applied to the message by the CREST Applications Host) from which Computershare Investor Services (Guernsey) Limited is able to retrieve the message by enquiry to CREST in the manner prescribed by CREST. After this time, any change of instructions to proxies appointed through CREST should be communicated to the appointee through other means.

CREST members and, where applicable, their CREST sponsors or voting service providers should note that Euroclear does not make available special procedures in CREST for any particular messages. Normal system timings and limitations will therefore apply in relation to the input of CREST Proxy Instructions, it is the responsibility of the CREST member concerned to take (or, if the CREST member is a CREST personal member or sponsored member or has appointed a voting service provider(s) to procure that his or her CREST sponsor or voting service provider(s) take(s)) such action as is necessary to ensure that a message is transmitted by means of the CREST system by any particular time. In this regard, CREST members and, where applicable, their CREST sponsors or voting service providers are referred, in particular, to those sections of the CREST Manual concerning practical limitations of the CREST

NOTICE OF MEETING (CONTINUED)

system and timings. The Company may treat as invalid a CREST Proxy Instruction in the circumstances set out in Regulation 35(5)(a) or the Uncertificated Securities Regulations 2001.

For and on behalf of
